ONE DAY SEMINAR-MINICONFERENCE IN

REAL ANALYSIS

Friday afternoon, May 11, 1984

10:00-11:00 A. M., Miklos Laczkovich, Etovos Lorand University, Budapest, "Convexity conditions and smooth functions".

11:30-12:30 A. M., Lunch at Jack Brown's house.

1:00-1:20 P. M., Jack Brown, Auburn Univ., "Baire, Blumberg, and co-Blumberg spaces".

1:20-1:40 P. M., John Walsh, Auburn Univ., "Generalized Lusin sets".

1:40-2:00 P. M., Harvey Rosen, Univ. of Ala., Tuscaloosa, "A connectivity function from In onto Im whose graph is dense in InxIm".

2:00-2:20 P. M., Fred Roush, Ala. State Univ., Montgomery, "On uniform limits of Darboux and connectivity functions".

2:20-2:40 P. M., Jerry Gibson, Columbus College, Columbus, Ga., "Uniform limits of peripherally continuous functions".

2:40-3:00 P. M., Geraldo de Souza, Auburn Univ., "A simplified version of the Carleson-Hunt theorem on the convergence of Fourier series".

3:00-3:20 P. M., Zbignew Piotrowski, Univ. of Wroclaw, visiting Auburn Univ., "Near continuity in product spaces".

3:20-3:40 P. M., Janusz Kaniewski, Warsaw Univ., visiting Auburn Univ., "Continuous restrictions and sigma-ideals".

3:40-4:10 P. M., Refreshments in Rm. 216.

4:10-5:00 P. M., Miklos Laczkovich, "Sectionwise properties of functions of two variables".

5:00-10:00 P. M., (BYOB) Departmental party at Jack Brown's.
