

Auburn Conference on Designs, Graphs, and Codes

January 29-31, 2016

(Friday afternoon to Sunday afternoon)

Timed to coincide with the

60th birthday of Chris Rodger

Samford Hall, Auburn University

The focus of the conference will be on the advancement of research in combinatorics, with specific emphasis on graph theory, design theory, and coding theory, as well as outreach in mathematics (K-20 education).

Plenary speakers:

Anthony J. W. Hilton (The University of Reading and Queen Mary, University of London). Hung-Lin Fu (National Chiao Tung University, Taiwan) Curt Lindner (Auburn University)

In addition, we will have a number of invited talks, as well as contributed talks.

This conference is being supported by the NSF. We encourage participants (especially junior participants), to apply for funding.

For more information, or to register, apply for funding, or submit an abstract for consideration, please go to:
