

BUS Drop-Off and Pick-Up AND Car Parking

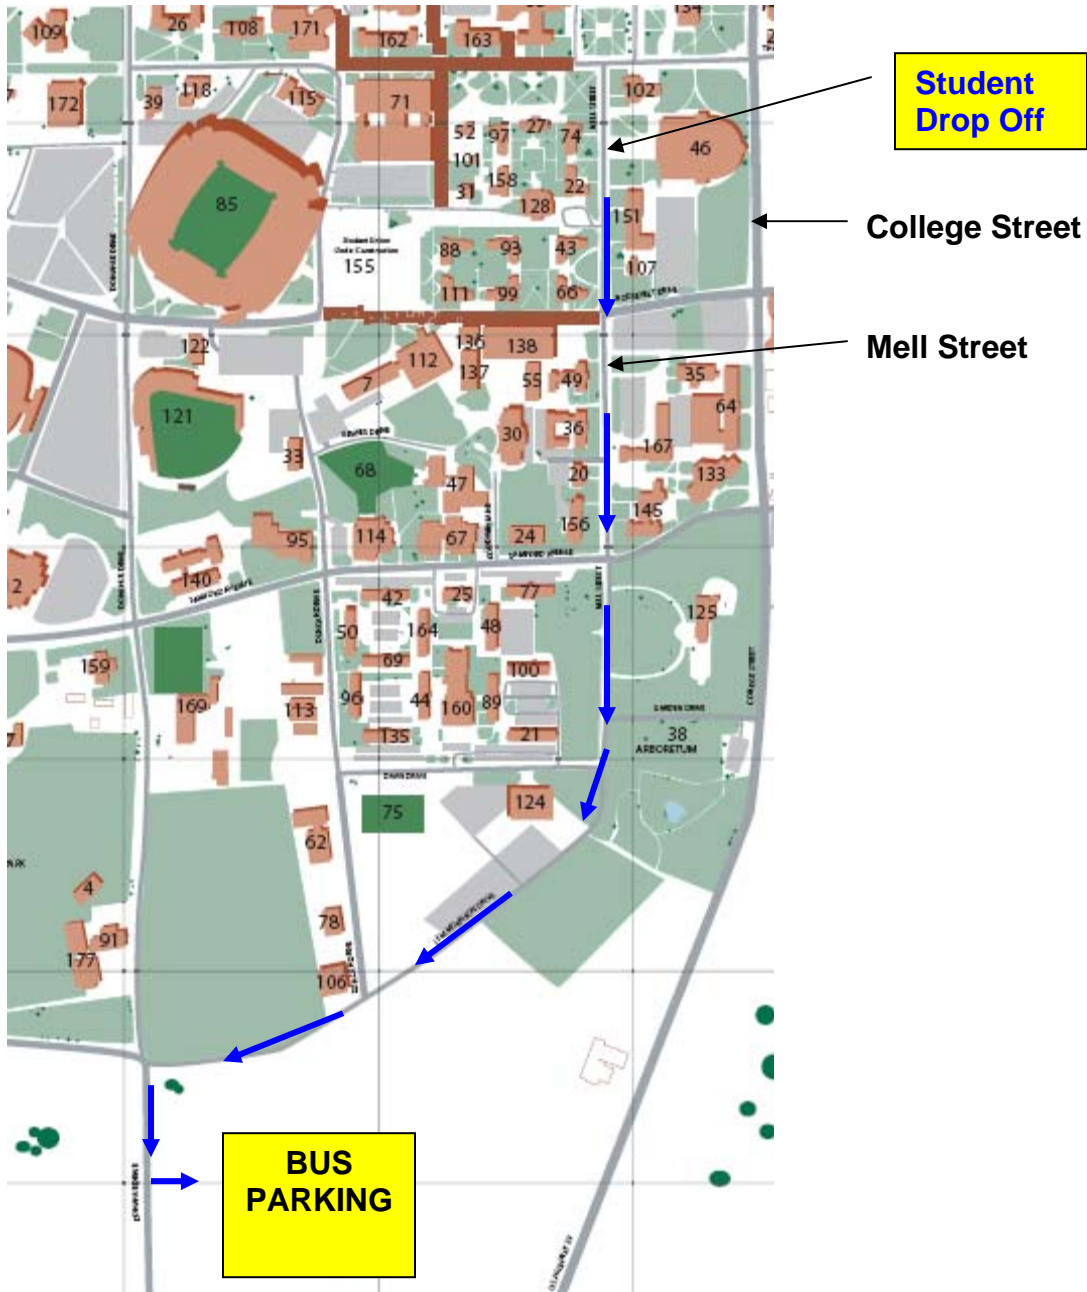

STUDENT DROP-OFF

Buses should travel on College Street, turning into campus at Thach Avenue (next to Samford Hall – the historic bell tower building). Travel a short distance on Thach Ave. and turn left onto Mell Street at the stop sign. Student drop-off stations will be located along the right side of Mell Street, across from the AU library. Parking attendants will be present to help facilitate this process.

BUS PARKING

After dropping students at Mell, buses should continue on Mell, through 2 stop signs, until they reach the traffic light at Donahue. Take a left at the light, onto Donahue. Almost immediately, you should see an entrance on the LEFT that leads into a large grass field. Buses may park anywhere in this field. (See map below) (Note that Mell Street changes names to Lem Morrison Drive)

STUDENT PICK-UP

Buses should exit the Parking Lot and turn **RIGHT** onto Donahue. Go through the traffic light to the next traffic light, which should be Samford Avenue. Take a right onto Samford Avenue and travel all the way back to College Street. Take a **LEFT** onto College Street. Go two traffic lights and take a **LEFT** onto Thach Ave., then a left onto Mell at the stop sign, following the same path as you did for student Drop-Off earlier in the day. Pick up students on the right side of Mell Street, across from the Library.

NOTE: It is the responsibility of the bus drivers and teachers to stay in contact with each other about their designated pick up time. We do not have a means of communicating with the bus drivers once they are parked in the far lot.

CAR PARKING

Those traveling by car may park in the Stadium Parking Deck on the corner of Roosevelt and Duncan Ave. To reach the deck, turn into campus at Samford Ave. from College Street. Follow Samford Avenue until you reach the traffic light at Duncan Drive. Take a right onto Duncan Drive, which will dead end into the Parking Deck. You will not need a special tag to park in the deck during AU Explore.
