Letters of Recommendation

Distance Traveled - Overcoming adversity

Notice to applicants: Feedback from the Admissions Committee is provided as a service to applicants to aid them in potentially strengthening their applications for the coming admissions year. It is important to be aware that there is no assurance that the applicant will be admitted if all items of feedback are addressed by the applicant. Since each application year is a different experience and the applicant will be evaluated in light of the applicant pool each admissions year, addressing the recommended improvements may not be adequate to achieve admission in a subsequent year. Given the number of variables in the admissions process it is impossible to predict with certainty that an applicant will be successful based on addressing identified areas of weakness in their applications. Re-applicants are advised to maintain ongoing medically related and service activities in order to be competitive. Commitment to becoming a physician is demonstrated by continued actions to improve one's application.
