

HARRISON  
SCHOOL OF PHARMACY

*“Making Medications Work  
Through Innovative Research,  
Education and Patient Care”*

**Innovative Research**

Faculty will discover and develop new drugs, and improve how existing medications can be used more effectively. Our groundbreaking research enterprise will engage in interdisciplinary collaboration with other researchers across the globe to save and improve patients' lives.

**Innovative Education**

Through an innovative, team-based approach to pharmacy education, the Auburn graduate will be ready to adapt to a changing practice environment and provide leadership to capitalize on those changes for the betterment of patient care and the profession. Graduates will be exceptionally prepared to contribute to a safe and effective drug distribution system, increase access to primary care and ensure that patients' drug therapy is optimized.

**Innovative Patient Care**

By directly engaging patients and health care systems, we will improve health outcomes and promote progressive changes in practice. The School will establish, maintain and evaluate collaborative inter-professional patient care practices for the betterment of patient health and advancement of the profession.
