Auburn University Harrison School of Pharmacy

Standards of Professional Attire
Revised 05/23/2019

Upon acceptance and entry into Auburn University's Harrison School of Pharmacy, students begin a process of developing the knowledge, skills and attitudes that comprise the fundamental core of the profession of Pharmacy. Although assimilation of competencies and transformation to Doctoral Pharmacy Practitioners takes several years, early initiation of professional behaviors facilitates the developmental and professionalization process.

Just as all obligations and responsibilities of the profession require some effort and sacrifice, assumption of a professional image requires an active individual resolution and may necessitate modification of lifestyle practice upon entering the professional program. By entering the Harrison School of Pharmacy, students willingly accept the obligations of the profession and are expected to act accordingly. Abiding by the standards of attire at the Harrison School of Pharmacy is a component of the educational process that internalizes esteem and emphasizes professionalization.
