imProve Grant

The Program Learning Research (imProve) Grant supports programs interested in:

- Developing new student learning outcomes for an academic degree program
- Designing reliable and valid measures for assessing one or more student learning outcomes.
- Hosting a retreat for thoughtful reflection of student learning outcome assessment results.
- Designing curricular interventions for program improvement, rooted in strong assessment results.

Please note the following change:

***In 2019, the Office of Academic Assessment will consider grant applications up to $10,000***

The imProve grant is managed by the Office of Academic Assessment; the grant review and selection panel is composed of members of the University Assessment Council (UAC).

The imProve Grant Request for Proposals

Award winner(s) will be announced early in the Spring semester (2020). Projects are expected to start late Spring 2020 or early Fall 2020 and completed during the 2020-21 academic year. Funds would need to be dispursed prior to the end of the fiscal year ending, September 30th, 2021.

The purpose of the imProve grant is to encourage high quality programmatic assessment work and learning improvement initiatives through financial support of a selected project(s). Projects should directly benefit the program with an end goal of improving student learning at the program level. Banta, Jones, and Blaich (2009) reviewed 150 of the best examples of assessment in the nation AND only 6% of these “best” examples demonstrated learning improvement. For examples of established learning improvement projects consider visiting the Learning Improvement Community website.

The strongest examples of high-quality assessment include three steps:

- Gathering quantitative data to tell a story about student learning (Prove)
- Identifying opportunities for program improvement (making a data-informed change)
- Re-assessing and ultimately proving that your change was indeed and improvement (improve)

Eligibility

An academic degree program from any college or school, with currently enrolled students may apply for the imProve grant. Submission may be prepared by any faculty member on staff but must indicate how the grant will benefit the majority of program faculty and students.

Preference will be given to programs that can demonstrate a truly collaborative effort with a majority of faculty involved in the grant. It is recommended that programs have strong student learning outcomes, that are comprehensive of the discipline prior to applying for the imProve grant. All grants must focus on the program level (not the individual course level).
imProve Grant

Permitted Use of Funds (examples)

- Consulting and travel expenses to bring recognized disciplinary assessment experts to Auburn University to conduct workshops are fundable.
- Travel expenses to participate in off-campus conferences (workshops or other programs), which promote excellent assessment and improvement of learning, are fundable.
- Assessment instruments, such as, standardized tests, assessment software, video equipment, and other supplies that may be used to effectively assess student learning are fundable.
- Faculty retreats focused on assessment and/or learning improvement are fundable.
- Curricular redesign efforts requiring external support are fundable.
- Supporting undergraduate/graduate student labor related to assessment of student performance is fundable.

Prohibitive Use of Funds

- Faculty salaries (including summer term and release time) are NOT fundable.

Additional Resources Available

In addition to funding, awardees will have dedicated personnel support from the Office of Academic Assessment to complete their project.

Disclosure of Other Sources of Funds

If the amount of funding to fully complete the project exceeds the limit of $10,000 the program must disclose matching or supplemental funding sources. All applications for funds from other sources for the proposed project or travel must also be disclosed. (See the budget section below.) The Office of Academic Assessment encourages programs to seek matching funds.

Final Reporting and Dissemination

Awardees will be required to share the assessment work completed as a result of winning the imProve Grant during a Spring Office of Academic Assessment meeting/workshop/event, after completion of the project. The Office of Academic Assessment requests the programs provide their PPT slides and/or materials for the Office of Academic Assessment to keep as record, rather than requiring a final report.

We encourage programs to consider sharing their work with colleagues and peers on campus and other external events (disciplinary conference or assessment conference).
imProve Grant

APPLICATION PROCEDURE

Submit a single PDF document including all the following. Each proposal must meet the following guidelines or will not be considered for funding.

- Application Form/Cover Page (provided with this RFP). Sign, scan and attach to PDF.
- An abstract of 200 words or less of the proposed project.
- A narrative description of the proposed project (no longer than five (5) pages).
- Provide a brief introduction to the program (e.g., number of faculty, students, program identity)
- State the outcomes of the proposed project in terms of its contributions to programmatic assessment and/or the improvement of student learning.
- Describe the project proposed.
- Explain how the project will benefit your program.
- Indicate how program faculty will be involved, indicating faculty names and roles.
- Indicate the specific course(s) or tools that will be involved.
- Articulate what the expected final deliverable will be.
- Discuss how the program plans to collaborate with the Office of Academic Assessment (if necessary).

Timeline

Describe the timeline and procedures the program will use to achieve the project objectives. Of note, the timeline should begin and conclude within a single calendar year. (Exceptions will be reviewed on a case by case basis).

Assessment and Dissemination of Effectiveness

Please discuss your project, what will you do with the funds? Reflect on how the funds will impact assessment in the program or how the curricular project has the potential to improve student learning. Discuss any ways you plan to assess improved learning and how you plan to disseminate the results of the project.

Budget

Provide a detailed budget for the project with justifications for all expenditures. List any other sources of funds currently available and any other applications made for funds for the project.

TIMELINE

• Call for proposals - Fall semester
• Proposals are due by – December 6th, COB
• Review of Proposals – late Fall, early Spring
• Dissemination of funds and use of funds – following academic year
• Presentation during Academic Assessment meeting – Spring Semester, once completed
