Auburn University is offering a sustainable technologies and practices course in Pamplona, Spain. The four-week summer course is open to sophomores, juniors and seniors and includes:

- Classroom instruction in renewable energy, efficient building design, transportation and more
- Onsite visits at wind and solar farms as well as biomass conversion facilities
- Sightseeing at Guggenheim Museum in Bilbao and the Royal Palace of Olite
- Six hours of academic credit offered in two 3-hour sections of ENGR 3970
- One 3-hour elective may be applied for sustainability minor

Deadline for course registration is March 1, 2016.

Nathan McWhirter
senior in mechanical engineering
“It was exciting to see firsthand how sustainable energy and waste treatment technologies are being implemented in Spain. The Pamplona program inspired me to work toward sustainability in engineering.”
