Job Summary
Assists researchers in planning, maintaining or completing research programs and/or projects involved in the discovery of new knowledge, techniques, and concepts which require advanced level scientific/research knowledge, skills and abilities following relevant policies, procedures, regulations and laws.

Essential Functions
1. Develops or assists in the development of complex project proposals, plans, and protocols.
2. Conducts non-routine experiments, investigations and/or studies related to programs and projects in pursuit of new knowledge, techniques and concepts.
3. Coordinates or assists logistics of research to include equipment, materials, and labor needs.
4. Collects data/samples related to others' research and in complex cases.
5. Records, compiles, processes and analyzes data/samples.
6. Documents results and observations in writing as well as presenting results to others.
7. May prepare research results for publication or presentation at conferences to include performing literature reviews and writing results and discussions.
8. May instruct students and/or supervise others' research in area of expertise.
9. May maintain project budgets and/or coordinate funding.

Supervisory Responsibility
May supervise employees but supervision is not the main focus of the job.

The above essential functions are representative of major duties of positions in this job classification. Specific duties and responsibilities may vary based upon departmental needs. Other duties may be assigned similar to the above consistent with the knowledge, skills and abilities required for the job. Not all of the duties may be assigned to a position.
