Auburn University Job Description

Job Title: Sr Cybersecurity Eng-Central
Job Code: MA41
FLSA status: Exempt

Job Summary
Under minimal supervision, serves as technical lead for information technology (IT) security analysis projects and services. Responsible for overseeing and improving the function of the suite of IT security tools utilized by the University to protect the institution's informational assets. Participates in active troubleshooting of data flows as well as evaluates and collaborates on the implementation of new security tools. Functions as the technical and engineering subject matter expert for specific cybersecurity technology areas and is a primary interface to the University's IT community. (Employee must work in central IT unit. Exceptions require CIO prior approval.)

Essential Functions
1. Serves as the subject matter expert in operating systems, network devices and protocols, security technologies, cloud technologies, and security data sharing workflows. Leads small projects when necessary.
2. Assists and, at times, leads efforts for incident response activities. Works with vendors to define mitigation strategies when incidents are identified and responded to.
3. Validates and tests information security architecture and design solutions to produce detailed engineering specifications with recommended vendor technologies. Integrates large amounts of intelligence information on threats into context in order to draw insights about the possible implications.
4. Compiles relevant data and integrates data into a coherent whole. Considers the information's reliability, validity, relevance, and time sensitivity.
5. Works with stakeholders to identify strategies to mitigate and remediate vulnerabilities as they are identified.
6. Provides peer level review to work performed by other team members in order to mentor and elevate the team's overall effectiveness.
7. Aides in identifying and evaluating assets, trends, and patterns of threat actors. Performs tailored analysis to develop comprehensive target definition for far-reaching strategic threats to support operational planning and to identify opportunities for neutralizing or degrading activities of threat actors.
8. Trains other team members on new information security solutions and transitions ownership, where possible, upon successful implementation.
9. May serve as a lead within the team, coordinating the work of others and serving as the primary contact.
10. Performs other related duties as assigned by the supervisor.

Supervisory Responsibility
May be responsible for training, assisting or assigning tasks to others. May provide input to performance reviews of other employees.
Auburn University Job Description

The above essential functions are representative of major duties of positions in this job classification. Specific duties and responsibilities may vary based upon departmental needs. Other duties may be assigned similar to the above consistent with the knowledge, skills and abilities required for the job. Not all of the duties may be assigned to a position.
