Award Description Through its biological engineering research programs, Auburn University is well positioned to address the global challenges of providing renewable sources of energy, clean and abundant sources of water, healthy environment, and safe and plentiful supplies of food and other value-added products necessary for life. This project responds to the program goal of enhancing the Nations existing research facilities to enable a next-generation research infrastructure by creating state-of-the-art laboratories. This project will ultimately allow research and research training on bioenergy and bioproducts engineering, ecological engineering, food safety engineering, and automation and sensor technologies to improve management of our national resources.
