Project Information

Project Name or Project/ Program Title	Quarterly Activities/ Project Description	Activity Codes (NAICS or NTEE-NPC) (up to 10)
Conduct inventories for Federally listed plant taxa	Systematic surveys of federally listed and sensitive species were conducted on landholdings of the U. S. Army Corps of Engineers along the Alabama River from the vicinity of Montgomery to Clark and Monroe counties. Existing records of nine plant species have been updated and six new occurrences previously undocumented by the Alabama Natural Heritage Program have been recorded. One federally listed species, the Price's potato-bean, is known from one site survey. The Mississippi witch hazel, a species currently represented by seven populations worldwide, has been documented from Haines Island during the course of this project. Surveys will continue in 2011, focusing on spring flora and fauna. The final report is currently in preparation.
