Project Information

Project Name or Project/ Program Title	Peer Stress in Preadolescence: Psychophysiological and Coping Responses	Activity Codes (NAICS or NTEE-NPC) (up to 10)
Quarterly Activities/ Project Description	<p>Six graduate research assistants were trained to conduct the lab protocol, collect psychophysiological data, and interview participants. Computers, physiological data acquisition equipment, questionnaires, and other lab supplies were purchased and utilized. Preadolescent participants, parents, and teachers were recruited for the study. To date, 122 preadolescents (about 53% female, 46% ethnic minority; and one parent and teacher per preadolescent) have participated in the project. At Time 1, preadolescents and parents visited our research lab to complete questionnaires about school, social, and psychological adjustment, and preadolescents participated in a lab protocol designed to simulate peer stress experiences. Physiological, observational, and interview data were collected during the lab protocol. Questionnaire data were collected from teachers. At Time 2, preadolescents and their parents and teachers completed questionnaires. Cohort 1 participants have completed Time 1 and Time 2 data collection, and all Cohort 1 data have been entered. Observational coding (emotion, social skills, coping strategies) and analysis of Cohort 1 data is underway. Two papers based on data from Cohort 1 participants were presented at the Society for Research in Child Development (SRCD) in April 2011, and one publication is currently under review for journal publication.
