

# Ornamental Fish For Sale!

Juvenile captive-bred **two-band anemonefish** (*Amphiprion bicinctus*)

Two-band anemonefish are native to the Red Sea and associate with giant sea anemones in the wild. Captive-raised anemonefish can be kept comfortably in saltwater aquaria without anemones, and grow to about 4 inches long.

**How many:** 10 juvenile fish for sale, with more to come.

**How big:** 0.5-1.5 inches (2 months old).

**How much:** \$15 - below market price, no shipping fees.

**Benefits:**

- Up to 1 year of “tech support” from AU biologists on how to keep your fish happy and healthy in your home aquarium.
- High survival rate: no fish stress from collection and shipping.
- You support marine conservation by purchasing cultured ornamental fish rather than wild ones harvested from coral reefs.
- All proceeds go back into AU's anemonefish culture program.
