MISSION

The Alabama Board of Licensure for Professional Engineers and Land Surveyors was established by legislative action in 1935. Its charter is to protect the public by helping to safeguard life, health, and property, and to promote the public welfare by providing for the licensing and regulation of persons in the practices of engineering and land surveying.

PROGRAMS AND SERVICES

The Board reviews applications, administers the national licensing examinations, develops and administers the state specific licensing examination, licenses qualified applicants, and regulates the professional practice of licensees throughout the State. They also have the power to discipline those individuals who are not licensed in the State but who are performing engineering or land surveying in the State.
