ASSISTIVE TECHNOLOGY: TOGETHER WE CAN

2017 OCTOBER 19 - 20
Auburn University Student Center

See the latest in assistive technologies, practices and services for persons with disabilities. The Alabama Assistive Technology Expo and Conference (ALATEC) provides professional development and training and the opportunity to gather information relative to the accessibility and availability of assistive technology.

BREAKOUT SESSIONS

- Universal Design for Learning
- AT Education
- AT for Employment
- AT for Independent Living
- AT for the Blind
- AT for the Deaf & Hard of Hearing

KEYNOTE SPEAKER

Scott Renner had a successful career with Lincoln Mercury as a Quality Control Manager before a diving accident in 1992, which resulted in quadriplegia. Scott earned his Bachelor’s degree in Business from Northeast Louisiana University in Monroe, Louisiana, and a Master’s in Social Work from Grambling State University. He graduated from Auburn University with a Ph.D. in Special Education and Rehabilitation Services with a focus on Assistive Technology (AT) in 2015. Scott works at the Auburn University Office of Accessibility as the Assistant Director of Accessible Electronic and Information Technology. Scott is a daily user of Assistive Technology and will share how AT has impacted his life. In his keynote address, Scott will be joined by three individuals with disabilities that are daily users of AT and share how it has impacted their lives.
