Victims to Victors

Helping Students overcome Bullying

Bullying produces self-loathing, low self-esteem, and stunts social development.

Bullying behavior is learned, therefore it can be changed.

Victims:
Do not isolate yourself. Make sure you tell someone.
Recognize that you have value as a person.
Make a conscious effort to overcome fear of social situations.

Teachers:
Do not expect students to automatically tell you about bullying.
Do not treat bullying as a conflict.
Do not blame the victim.

Administrators:
Do not bully the bully. Show your students that you C.A.R.E.
Confront the issue
Address the behavior
Reverse the pattern
Empower your students

Additional Notes:
Kel Jackson is a speaker, engineer, entrepreneur, political strategist, community servant and writer.

He currently works as an Engineer in the Aviation industry with Pratt & Whitney of United Technologies Corporation (UTC), a Fortune 100 Company.

A native of Birmingham, AL, he holds a Bachelor's degree in Mechanical Engineering from Auburn University. While at Auburn, he served as the founding President of The Harold A. Franklin Society, Assistant VP of Facilities with Auburn’s Student Government Association, and mounted an aggressive and competitive campaign for the SGA Presidency.

Entrepreneurial from an early age, Kel has founded two companies. His first achieved sales across the globe, and his second provides creative real estate solutions to homeowners.

Residing in Columbus, Georgia, he is active in the community. He serves as a Board Member of the Columbus Building Authority, a body that has issued hundreds of millions of dollars in bonds to finance public projects.

He is also a Board Member at Large with the Young Professionals of Columbus – a part of the Greater Columbus, Georgia Chamber of Commerce. In the past, he has served as Vice-Chair of Governmental Affairs with this vital organization.

A strong believer in the power of government to change lives for better or worse, he is actively involved in political efforts on federal and local levels.

Additionally, he is a published columnist and regularly writes articles on a wide range of issues.

Kel is a versatile and dynamic speaker, with expertise in topics including Motivation, Anti-Bullying, Developing student organizations, and helping minorities chart successful careers in STEM fields (Science, Technology, Engineering and Mathematics).

Various articles, in addition to speeches and his services as a speaker are available at www.KelJackson.com.
