Auburn University is an equal opportunity educational institution/employer.

## **Education & Training Plan** **Holistic Healing Professional Certificate Program with Externship**

Student Full Name: \_\_\_\_\_

Start Date: \_\_\_\_\_ End Date: \_\_\_\_\_

**Program includes National Certification & an Externship Opportunity**  
**Mentor Supported**

### **Holistic Healing Professional Certificate Program with Externship**

Course Code: AU-MT-HEAL  
Program Duration: 6 Months  
Course Contact Hours: 375  
Student Tuition: \$3,999

#### **The Holistic Healing Professional**

There are a wide range of opportunities available for today's holistic healing professional and there are many different potential business relationships that will be encountered throughout a typical career. Learning more about the business world will serve to equip the holistic healing professional with information and tools that will inevitably be required as you begin your career.

#### **The Holistic Healing Professional Program**

This program provides an overview of the theoretical principles for common massage therapy systems and manual techniques. The course discusses the historical influences from a variety of cultures in order to best understand the massage therapy industry and profession today. The course also serves to introduce both the theoretical basis as well as the demonstration of fundamental manual techniques in the traditional discipline of Western Massage (i.e. Swedish massage), and the contemporary systems of Myofascial Massage, Trigger Point Therapy, and Reflexology. This program further overviews anatomy and physiology, and human pathology in order to understand all the inner working of the human body, how you think about the human body as a health care professional, how they communicate to colleagues and clients respectively about their bodies, and prepares you for continued studies for the applications of massage therapy. Finally, this program discusses each body system in terms of the major anatomical structures and functions and explains how each system participates in homeostasis of the body. In addition, the course discusses selected major pathologies, including disease definitions and causes, signs and symptoms, diagnostic procedures, and possible treatments and changes in the body throughout the human lifespan.

## Education and National Certifications

- Students should have or be pursuing a high school diploma or GED.
- There are no state approval and/or state requirements associated with this program.
- There is a National Certification exam available to students who successfully complete this program:
  - **Microsoft Office Specialist (MOS) Certification Exam.**

## Program Objectives

At the conclusion of this program, students will:

- Comprehend foundational knowledge for understanding and applying massage therapy.
- Gain insight into the philosophical and historical background of massage therapy.
- Explain the effects and benefits as well as clinical applications of massage.
- Understand the principles, and explain the techniques used in Western Massage
- Understand the principles of joint range of motion and Myofascial Massage
- Understand the basic physiology of trigger points, and explain the manual techniques used to treat trigger points
- Understand the principles of Reflexology and explain the basic techniques used to treat the various systems of the body with the application of manual reflexology methods.
- Define and differentiate Anatomy, Physiology, Kinesiology, and Pathology.
- Understand the basic knowledge of the major body systems and homeostasis
- Describe selected human diseases in terms of definition, cause, signs and symptoms, diagnostic procedures, and possible treatments for each of the body systems
- Describe common issues or changes that occur in each major body system throughout the lifespan
- Use Microsoft Office

## National Certification

Upon successful completion of this Auburn University program, students would be eligible to sit for the Microsoft Office Specialist (MOS) exam. Although there are no state approval, state registration or other state requirements for this program, students who complete this program at Auburn University will be prepared and are eligible to sit for this national certification exam. Students who complete this program are encouraged to complete the externship option with their program. Students who complete this program can and do sit for the MOS national certification exams and are qualified, eligible and prepared to do so. Auburn University works with each student to complete the exam application and register the student to take their national certification exam.

## Externship / Hands on Training / Practicum

Although not a requirement, once students complete the program, they have the ability to participate in an externship and/or hands on practicum so as to practice the skills necessary to perform the job requirements of a professional in this field. Students will be assisted with completing a resume and/or other requirements necessary to work in this field. All students who complete this program are eligible to participate in an externship and will be placed with a participating organization near their location. Auburn University works with national organizations and has the ability to place students in externship opportunities nationwide.

**Auburn University contact:** If students have any questions regarding this program including national certification and externships, **they should call Shavon Williams of Auburn University at | 334-844-3108 or via email at [szw0063@auburn.edu](mailto:szw0063@auburn.edu)**

Note: No refunds can be issued after the start date published in your Financial Award document.

## About Auburn University!

**Welcome to Auburn University!** Auburn University was established in 1856 as the East Alabama Male College, 20 years after the city of Auburn's founding.

**OUR MISSION:** The Office of Professional and Continuing Education (OPCE) makes the educational resources of Auburn University available for non-credit education programs and conferences designed to promote lifelong learning, regardless of age, interest, or location. Our programs fall into five general categories: Professional Development, Certificate Programs, Personal Enrichment, Summer Youth Programs, and Conferences.

### **Auburn University and Pearson Education**

The Auburn University's Office of Professional and Continuing Education eLearning programs were developed in partnership with Pearson Education to produce the highest quality, best-in-class content and delivery necessary to enhance the overall student learning experience, boost understanding and ensure retention. Pearson Education is the premier content and learning company in North America offering solutions to the higher education and career training divisions of colleges and universities across the country aimed at driving quality education programs to ensure student success. Please visit us at [www.pearson.com](http://www.pearson.com).

### **About Pearson Education**

Welcome to Pearson. We have a simple mission: to help people make more of their lives through learning. We are the world's leading learning company, with 40,000 employees in more than 80 countries helping people of all ages to make measurable progress in their lives. We provide a range of education products and services to institutions, governments and direct to individual learners, that help people everywhere aim higher and fulfil their true potential. Our commitment to them requires a holistic approach to education. It begins by using research to understand what sort of learning works best, it continues by bringing together people and organizations to develop ideas, and it comes back round by measuring the outcomes of our products.

## **Holistic Healing Professional Program Detailed Student Objectives:**

### **HISTORY AND PERSPECTIVE OF MASSAGE THERAPY**

- Describe massage in the context of a natural healing art, and understand the traditional influences that helped to shape today's massage therapy profession.
- Define massage and describe fundamental massage techniques commonly used.
- Explain the concept of wellness, and understand how massage therapy is complimentary to Western medicine.
- Comprehend the basic terminology used to describe the various types of massage styles and techniques commonly used.

### **THE BENEFITS AND APPLICATIONS OF MASSAGE**

- Explain the various massage techniques and the effects they have on the body, mind, and emotions.
- Identify how and when massage therapy fits into the healing process of tissue repair.
- Explain the primary effects that massage has on each of the body systems, and on the organism level overall.
- Explain how massage therapy is used in treating human pathologies.
- Understand how research literacy and the evidence-based practice is important for the massage therapy profession.
- Explain the basic massage applications for each system of the body, and how massage is used to compliment standard medical treatment in hospitals and nursing homes.

### **CONTRAINDICATIONS AND MASSAGE GUIDELINES**

- Describe the major endangerment sites of the body, which require knowledge and caution to avoid injury during massage.
- Explain the principles for general, regional, and local contraindications for massage.
- Explain the common medications and understand the implications for giving massage to medicated clients.
- Describe the major components for maintaining a professional presence, including sanitation and hand washing practices.
- Explain the primary considerations for self-care as a massage therapist.
- Describe the primary elements of massage applications, including topical substances, proper draping, safety and comfort of the client, and use of techniques.
- Explain the paramount ethical and moral considerations for the professional of massage therapy, and confidentiality as a client's right to privacy.

### **WESTERN MASSAGE TECHNIQUES & JOINT MOVEMENTS**

- Identify the primary manual techniques used in Western Massage, and the variations for each
- Describe the variations of each of the primary western massage techniques, and how they can provide specific effects
- Understand how to use western massage techniques appropriately in a session
- Distinguish between active and passive movements, joint mobilization techniques, and stretching
- Explain the therapeutic benefits of massage
- Understand the application of mobilizing and stretching techniques for different joints and areas of the body, as well as the guidelines for applying joint movements

### **CONTEMPORARY MASSAGE AND BODYWORK**

- Identify three contemporary massage and bodywork systems that are popular within the industry
- Explain the basic history and physiological basis of myofascial massage

- Identify the primary guidelines, contraindications, and basic myofascial techniques used
- Explain the basic history and physiological basis of trigger point therapy
- Explain how to locate trigger points, and how they can radiate pain in predictable patterns
- Identify the primary deactivation techniques used to treat trigger points
- Explain the basic history and energetic basis of reflexology
- Explain zone therapy and the guidelines in giving reflexology sessions, including positioning the receiver and body mechanic considerations for the therapist
- Identify the primary foot reflexology techniques

### **INTRODUCTION TO BODY STRUCTURE & ORGANIZATION**

- Describe body planes, cavities, regions, and directional terms
- Define homeostasis and its importance to the human body
- Outline the levels of organization of the body, including the body systems
- Identify the structures and functions of the organelles of a typical human cell

### **THE SKELETAL SYSTEM**

- Describe the organization of the skeletal system
- Explain the functions of bone, including its contribution to homeostasis
- Identify the anatomical structures of the skeletal system, including the major bones of the body
- Describe selected skeletal system diseases and disorders
- Describe issues and changes related to the skeletal system at different points in the lifespan

### **THE MUSCULAR SYSTEM**

- Identify the anatomical structures of the muscular system, including the major muscles of the body
- Explain the basic concept of muscle contraction
- Describe how the muscular system contributes to homeostasis of the body
- Describe selected muscular system diseases and disorders
- Describe issues and changes related to the muscular system at different points in the lifespan

### **THE NERVOUS SYSTEM AND SPECIAL SENSES**

- Describe the organization of the nervous system
- Identify the anatomical structures of the nervous system and special senses and their functions
- Explain how an electrical impulse is conducted through a nerve
- Explain how the nervous system contributes to the homeostasis of the body
- Describe selected nervous system and special senses diseases and disorders
- Describe issues and changes related to the nervous system and special senses at different points in the lifespan

**Note: This program can be completed in 6 months. However, students will have online access to this program for a 24-month period.**

## **MICROSOFT OFFICE Module**

- Use an integrated software package, specifically the applications included in the Microsoft Office suite
- Demonstrate marketable skills for enhanced employment opportunities
- Describe proper computer techniques for designing and producing various types of documents
- Demonstrate the common commands & techniques used in Windows desktop
- List the meaning of basic PC acronyms like MHz, MB, KB, HD and RAM
- Use WordPad and MSWord to create various types of documents
- Create headings and titles with Word Art
- Create and format spreadsheets, including the use of mathematical formulas
- Demonstrate a working knowledge of computer database functions, including putting, processing, querying and outputting data
- Define computer terminology in definition matching quizzes
- Use the Windows Paint program to alter graphics
- Use a presentation application to create a presentation with both text and graphics
- Copy data from one MS Office application to another application in the suite
- Use e-mail and the Internet to send Word and Excel file attachments
- Demonstrate how to use the Windows Taskbar and Windows Tooltips
- Explain how copyright laws pertain to data and graphics posted on the Internet
- Take the college computer competency test after course completion
- Follow oral and written directions and complete assignments when working under time limitations

**Note:** Although the Microsoft Office Module is not required to successfully complete this program, students interested in pursuing free Microsoft MOS certification may want to consider completing this Microsoft Office Module at no additional cost.

### **System Requirements:**

#### **Windows Users:**

- Windows 8, 7, XP or Vista
- 56K modem or higher
- Soundcard & Speakers
- Firefox, Chrome or Microsoft Internet Explorer

#### **Mac OS User:**

- Mac OS X or higher (in classic mode)
- 56K modem or higher
- Soundcard & Speakers
- Apple Safari

#### **iPad Users:**

- Due to Flash limitations, eLearning programs are NOT compatible with iPads

#### **Screen Resolution:**

- We recommend setting your screen resolution to 1024 x 768 pixels.

#### **Browser Requirements:**

- System will support the two latest releases of each browser. When using older versions of a browser, users risk running into problems with the course software.
- Windows Users: Mozilla Firefox, Google Chrome, Microsoft Internet Explorer
- Mac OS Users: Safari, Google Chrome, Mozilla Firefox

#### **Suggested Plug-ins:**

- Flash Player
- Real Player
- Adobe Reader
- Java
