

Auburn University Summer Experience

2008 ACADEMIC CAMPS

These one-week camps provide opportunities for students to stretch their minds while experiencing a collegiate lifestyle on our campus. Academic work is balanced with supervised social and recreational activities designed to allow campers to make new friends and meet professionals who share their interests. The camps are a valuable journey of discovery – of self, of the greater world, and of the Auburn University environment. Early enrollment is encouraged!

Additional information available on each website or by calling 334-844-5100

- **ARCHITECTURE CAMP – C080622B** Sunday-Friday June 22-27
High school students interested in architectural design will enjoy this exciting camp led by School of Architecture faculty assisted by professional guest presenters. Classes involve basic design concepts, hands-on exercises, and technical demonstrations. Camp culminates with an exhibition of the students' projects.

- **BUILDING CONSTRUCTION CAMP – C080615B** Sunday-Friday June 15-20
How does the concept for a building become a reality? Students in grades 8 – 12 will learn construction basics and how to integrate building design with site, climate, function, and 'green' considerations. This camp is an excellent starting point for teens considering a career in architecture or building science.

- **DESIGN WORKSHOP – C080615** Sunday-Friday June 15-20
Creative students with a flair for art and an interest in design will learn design fundamentals and progress to more advanced concepts. Studio classes taught by AU faculty will provide hands-on work and individual guidance as each student conceives of and completes a project using photo, computer, wood, and plastic fabrication labs.

- **ENGINEERING TIGERS CAMP I – C080615A** Sunday-Friday June 15-20
Rising 9th-10th graders who have interest in problem-solving, math, and science are invited to explore engineering through sessions led by faculty from various departments in the College of Engineering. Previous participants in the 7th and 8th grade TIGERS camp are encouraged to attend, but it is not a prerequisite.

- **MUSICAL THEATRE CAMP – C080713A** Sunday-Friday July 13-18
Students entering grades 7-12 can sing, dance, and "play" for a week as they rehearse for a spectacular musical theatre finale on the last day of camp. AU faculty from the departments of Music and Theatre, along with a guest professional, will provide individualized instruction in dance, vocal training, acting, and movement.

- **WORLD AFFAIRS YOUTH SEMINAR – C080713B** Sunday-Friday July 13-18
High school students interested in debate, current events, social studies, leadership, politics, or public service are invited to participate in a program that focuses on international affairs. The purpose of the annual seminar is to promote world peace tomorrow by training tomorrow's leaders today! Model United Nations sessions provide the vehicle for promoting individual involvement in a debate of international issues.
