

II. Biogrant Review Committee

This committee recommends policy, reviews preproposals, and recommends proposals for funding to the Associate Provost and Vice President for Research.

Committee members are nominated by the Associate Deans of the Colleges and Schools.

Committee members who are currently collaborating with either a P.I. or Co-P.I. can serve on the committee. However, they must recuse themselves from reviewing their collaborator's Biogrant application and excuse themselves from the discussion of the preproposal and/or proposal during the selection committee meeting.

Should a sitting member of the committee wish to be a P.I., a Co-P.I., or a consultant on a Biogrant, the committee member must recuse himself from committee obligations for that program year. A substitute will be selected by the associate dean at the committee member's college/school, and the term of the committee member will be extended for one year.
