Platform:

I would be an excellent Senator for the College of Agriculture because agriculture is my passion. There is a very dividing line between the College of Agriculture and the rest of the university and that needs to change. An agriculture awareness month or agriculture facts day needs to be implemented. The problem goes both ways, just because someone does not know about agriculture does not mean that they are a bad person. I hope by being elected senator I will be able to improve relations from both sides of campus.

Platform: I would consider myself to be a good candidate for College of Business Senator because of my strong passion and attention to fiscal responsibility. By doing this, I believe I look out for the interest of current and future Auburn Students. Finally, it will always be my first and foremost priority to be "Taking Care of Business".
