

# College of Architecture, Design and Construction

DAN BENNETT, *Dean*  
 BETTY J. FENDLEY, *Associate Dean*

**T**HE COLLEGE OF ARCHITECTURE, DESIGN AND CONSTRUCTION offers undergraduate programs in the academic areas of Architecture, Building Science, Industrial Design and Interior Architecture. Graduate programs are offered in Building Science, Community Planning and Industrial Design. A professional master's program is offered in Landscape Architecture.

The College of Architecture, Design and Construction maintains the right to limit enrollment in all programs and may retain student work for exhibition or for records and accreditation purposes.

## School of Architecture

Entering Freshmen – Eligibility for acceptance to Architecture, Interior Architecture and Landscape Architecture is based on performance in courses in the first year of the model curriculum and the cumulative GPA on these courses which must be a minimum of 2.8.

Transfer Students from non-architectural programs are required to begin the design sequence with first year. Transfer students from accredited schools of Architecture will be required to present a portfolio of their work to the Design Review Committee for evaluation. Assuming acceptance, the Committee will determine the level of placement in the design sequence.

Urban Studies Program - The School maintains an urban studies center in downtown Birmingham. All students in the Architecture and Interior Architecture/Architecture programs are required to spend one semester in Birmingham during their fourth year.

Special Opportunities are offered for qualified students: a Foreign Studies Program with an organized itinerary of travel and study; a Rural Studies program to work hands-on in helping communities and individuals in the rural South meet needs for shelter and an improved quality of life. Professional experience in a related field is recommended prior to the last year of study.

Academic Standards and Policies - All design studio courses must be taken in sequence and in observance of the pre-requisite courses as stated. All students completing the second year design sequence will be reviewed for continuance into the third year design sequence. Any student receiving a grade below C in ARCH 1010 or ARCH 2010, 2020 will be reviewed by the Design Review Committee at the end of the year for approval to continue in the design sequence. Similarly, a student with a majority of grades at the C level may be reviewed by the Committee.

In the event a grade of D is received in any of the upper level design sequences or in the event a grade of F is assigned (3000- 4000- or 5000-level design courses), a review is required for continuance in the program including the option of being required to repeat the entire design sequence for that year, or to withdraw from the program.

To proceed to the beginning sequence of a design studio at third-, fourth- or fifth-year levels, the student must have completed all required courses prior to that level or have the approval of the Design Review Committee. Enrollment in 3000- and 4000-level BLSC courses will be limited to those with an overall GPA of 2.5 or above and third-year standing in design.

## Department of Building Science

Entering Freshmen who meet the general admission requirements of Auburn University will be admitted to the Pre-Building Science program.

Transfer Students must have a minimum GPA of 2.8 and will be accepted on a space-available basis as determined by the department head.

Academic Standards and Policies — To be classified as 03 BSCI, the student must have completed all course work shown in the first two years of the model curriculum, have a 2.8 cumulative GPA on all courses attempted at Auburn University, and have a minimum of 64 semester hours. The department reserves the right to limit enrollment.

## Department of Industrial Design

Entering Freshmen who meet the general admission requirements of Auburn University will be admitted to the Pre-Industrial Design Program.

Transfer Students from other institutions must meet the university admission requirements. Students transferring from other design disciplines will be required to present examples of their work to determine studio placement. Internal transfer students should contact the department head to determine eligibility.

Summer Design Program — Transfer students who have completed courses in the first year of the model curriculum may qualify for the Summer Design Program. This program allows students to complete the first year Industrial Design Studio requirements. After completion, students may enter the sophomore design studio sequence in the fall semester. Contact the department head for more information.

Academic Standards and Policies — Design courses must be taken in sequence and may not be taken simultaneously with pre-requisites. All courses in the freshman year must be completed before entering the sophomore year of study. A grade of C or higher must be made in studio courses. Grades below C in studio courses 1310 through 4210 must be repeated. Any student with two grades at the C level or below in INDD 1310, 1320, 2110 or 2210 may be reviewed by the Design Review Committee for approval to continue in the design sequence. Admission to the Industrial Design curriculum in the second and third years requires a 2.5 cumulative GPA. The department maintains the right to select the most highly qualified students for admission to and continuation in the program and to retain original work accomplished as part of course instruction. A portfolio and presentation are required for graduation.

## Architecture

The Bachelor of Architecture degree is awarded upon the completion of the five-year curriculum. Qualified students may elect to pursue concurrently a Master of Community Planning degree or a Bachelor of Interior Architecture.

The Cooperative Education program is available to students after the second year of studio. Active participation in the Intern Development Program (IDP) is encouraged after completion of the third year in the curriculum. IDP is a pre-requisite to licensing in the State of Alabama.

In the United States, most state registration boards require a degree from an accredited professional degree program as a pre-requisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes two types of degrees: the Bachelor of Architecture and the Master of Architecture. A program may be granted a five-, three- or two-year term of accreditation, depending on its degree of conformance with established educational standards.

Master's degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree, which, when earned sequentially, comprise an accredited professional education. However, the pre- professional degree is not, by itself, recognized as an accredited degree.

The five-year Bachelor of Architecture degree is accredited by the National Architectural Accrediting Board. The four-year pre-professional Bachelor of Science in Environmental Design is not an accredited degree.

Auburn University is a member of the Association of Collegiate Schools of Architecture.

Students are encouraged to work at an architect's office, a construction site or other approved professional endeavor prior to their fourth year.

**Interior Architecture**

Interior Architecture is the making of "place," and to pursue this to the fullest extent, Auburn has integrated Interior Architecture and Architecture resulting in the granting of two degrees upon completion of the fifth year of study. The graduate who receives a Bachelor of Interior Architecture degree and a Bachelor of Architecture degree is a person trained in interior design who also is qualified to sit for an Architectural License Exam.

**Admissions Requirements**

A student transferring from another university into the MLA Program must have a minimum academic equivalent of three years of college with evidence of course work sufficient to meet the Auburn University core requirements plus course work that satisfies the MLA requirements of three semesters of Biology and one semester of Geology.

A student entering the MLA Program from another university with a baccalaureate degree in any field should have satisfied the requirements of three semesters of biology and one semester of geology. Deficiencies in these areas shall be addressed through equivalent course offerings prior to entry into Level III of the MLA Program.

For students transferring into the professional MLA Program from within Auburn University or for entering freshmen, they must fulfil the core requirements and the following additional course work.

ARTS	1710	1720	Introduction to Art History I & II .....	3	3
BIOL	1000		Introduction to Biology.....	4	
BIOL	1000		Introduction to Biology.....	3

**Building Science**

Students in the Building Science program learn the basic principles of science, architecture, engineering, business and construction. The four-year curriculum leads to the degree of Bachelor of Science in Building Construction, accredited by the American Council for Construction Education. Graduates qualify for positions in all areas of the construction industry.

The Cooperative Education Program is offered after completion of two semesters of study at Auburn.

Non-majors will be accepted in BSCI classes on a space-available basis.

### Industrial Design

Students of Industrial Design learn the basic principles of design, engineering, human factors, marketing and sociology. They acquire such technical skills as computer-aided design and drafting, prototype fabrication, photography, sketching and graphics techniques. Students are introduced to design methods, color theory, product planning, visual statistics, materials, manufacturing methods, consumer psychology and environmental studies.

The four-year curriculum, which is accredited by the National Association of Schools of Art and Design, leads to the professional degree of Bachelor of Industrial Design. Graduates will qualify for positions in industrial design consultant offices and in various industries. Motivated students will be considered for admission to the Graduate Program in Industrial Design. The Cooperative Education Program is offered at the completion of the second year of studio.

### Environmental Design

Any student in the College, during the third year of study, may apply to be a degree candidate for the Bachelor of Science in Environmental Design. This four-year, non-accredited degree is available at the recommendation of the head of the student's academic unit, and with the approval of the dean. If a Bachelor of Science in Environmental Design degree is received, a graduate must apply for re-admission to be a candidate for any other degree offered by the College. Some candidates for Master's programs may complete the requirements for the Bachelor of Science in Environmental Design, as a second baccalaureate degree, at the completion of undergraduate studies as qualification requirements for entry to graduate studies.
