

School of Nursing

BARBARA S. WITT, *Dean*
JENNIFER HAMNER, *Assistant Dean*

THE SCHOOL OF NURSING, established in 1979, offers a program of study leading to the degree of Bachelor of Science in Nursing. The nursing curriculum prepares beginning professional nurse generalists who are capable of functioning as members of the healthcare team in providing care for individuals and groups in diverse settings. The program also provides an educational base for advancement in formal study, research and practice. The facilities and resources of the university are used to provide a broad academic background in the humanities and sciences. Graduates are eligible to make application to the NCLEX-RN examination to become registered nurses.

A pre-professional program in Nursing Science is required of students seeking admission to the professional curriculum. The first two years of course work are designated Pre-Nursing (PNUR). The traditional Professional Program (NURS) requires four semesters and one summer of study, including classroom, laboratory and clinical experiences.

Curriculum in Nursing-Traditional

Admission

Freshman eligibility is determined by the University Admissions Office. Admission requirements are stated elsewhere in this bulletin. High school mathematics, chemistry and biology courses are strongly recommended, along with other college preparatory courses in social science, history, literature and English composition. Students are strongly encouraged to see the academic adviser in the School of Nursing on a regular basis.

Transfers from other institutions must apply through the University Admissions Office. Review of transcripts by the School of Nursing will determine the amount of credit allowed for the pre-nursing requirements. Students may be considered for transfer into Pre-Nursing from another school on campus if they have an overall unadjusted grade-point average of at least 2.5 on all courses attempted at Auburn University. Students planning to transfer are encouraged to contact the School of Nursing as soon as possible for advisement on transfer of credits. Students must possess the functional ability to perform the skills and behaviors required of a professional nurse. These abilities include but are not limited to:

1. Adequate vision, such as that required to observe changes in physical conditions, to read small print on labels and markings on syringes, and to discern subtle changes in color;
2. Adequate hearing, such as that required to distinguish muted sounds through a stethoscope;
3. Fine motor skills and manual dexterity, such as that required to handle small, delicate equipment;
4. Strength to turn and assist with lifting adults, and to lift and carry children;
5. The mobility to respond quickly in emergency situations;
6. The ability to communicate and interact effectively with others, orally and in writing;
7. The ability to detect odors; and
8. The ability to read independently and to comprehend the written word.

Professional Program: Admission to the professional program is open annually in fall semester. Pre-nursing students must formally apply in February to the School of Nursing. Applicants are notified in writing of acceptance or non-acceptance. Due to limited enrollment, all students who meet minimum criteria may not be admitted. Criteria for consideration for admission include a minimum grade-point average of 2.5, completion of the pre-nursing requirements, references and a completed application. Admission decisions are based on unadjusted grade-point averages.

Registered nurses: An Educational Advancement for Registered Nurse (EARN) Program in which RN students may complete the requirements for the BSN degree in one calendar year of full-time study is offered at the Auburn University Montgomery campus. The Auburn University School of Nursing adviser's office should be contacted for further information.

Accelerated Nursing Degree Program: The School of Nursing offers an Accelerated Nursing Degree (AND) Program which enables students who hold a bachelor's or higher degree in another field to progress through the professional nursing curriculum in three semesters and one summer of full-time study. Students interested in the AND Program must complete specified pre-nursing courses prior to being considered for admission to the Professional curriculum. An undergraduate grade-point average of at least 2.5 is required for admission to the AND Program. Admission decisions are based on unadjusted grade-point averages. The School of Nursing should be contacted for further advisement.

Academic Regulations

Advanced placement or CLEP credit in pre-nursing courses is granted according to university policies stated elsewhere in the bulletin. No advanced standing is allowed in the natural sciences by the School of Nursing. Proficiency examinations or Advanced Placement (CEEB), with accepted score, may be used for advanced placement.

An overall grade-point average of 2.0 must be maintained for progression through the professional program. Pre-nursing students who do not attain an overall grade-point average of at least 2.5 at the end of their freshman year should consider alternative fields of study.

A minimum grade of C is required in pre-nursing courses. Transfer credit will not be granted for courses in which a grade less than C is earned.

In the professional program, a minimum grade of C must be achieved in all courses. Because the professional nursing curriculum is designed for progressive development of nursing knowledge and skills, students

who earn a grade less than C in a professional program course are not allowed to progress to the next clinical course. The course in which the student earns a grade less than C may be repeated one time only. Students who earn a grade less than C in two or more professional program courses or whose grade-point average falls below a 2.0 will be dropped from the professional program and are not eligible for readmission. Transfer credit is not generally allowed for courses in the professional program.

The Professional Program

Facilities: The School of Nursing is housed in Miller Hall, where classrooms, a computer lab, an auditorium, a skills laboratory and faculty offices are located. Facilities for clinical nursing experiences include East Alabama Medical Center and other hospitals in the area, Mental Health Centers, clinics, nursing homes, physicians' offices, Public Health Departments, public schools and industrial sites. Students are responsible for complying with policies and procedures required by agencies in which clinical work is done.

Expenses: Students accepted into the professional program should expect to incur additional expenses. Uniforms, equipment, transportation to clinical sites, exit exams, content exams, NCLEX reviews, a health examination and liability and health insurance coverage are among the requirements. Students are required to have a drug screening test and maybe required to undergo a background check, depending on clinical agency policy. The costs of such requirements will be the responsibility of the students. Detailed information is furnished by the dean's office at the time of admission.

Accreditation: The School of Nursing operates with full approval of the Alabama Board of Nursing and is fully accredited by the National League for Nursing Accrediting Commission, 61 Broadway, New York, NY, 10006, Telephone 1-800-669-1656, www.nlnac.org
