Points of Contact
The Graduate School is open 7:45-11:45 a.m. and 12:45-4:45 p.m., Monday through Friday.
Telephone: (334) 844-4700. Fax: (334) 844-4348.
E-mail: gradadm@auburn.edu Web: www.grad.auburn.edu
Mailing Address: 106 Hargis Hall, Auburn, AL 36849-5122.
Assistantships: Call the head or chair of the department in which the student wishes to enroll.

Graduate Assistantships
Graduate assistant appointments are temporary. Continuation depends upon availability of funds, level of enrollment, and research needs. Salaries are paid in accordance with the budget policies and pay-roll procedures of the university. The Board of Trustees is obligated to pay certain fixed charges against the institution and thereafter pay salaries in full insofar as funds are available. If for any reason beyond the control of the Board of Trustees funds are not available, salaries will be prorated.

Each graduate assistant must be in a degree-seeking program and registered in the classification of MST, EDS, PHD, EDD, or GPR. The student also must be registered for at least one course (during each academic term of the assistantship), must satisfy the minimum course load specifications of the individual departments and must be making satisfactory progress toward the degree.

Workloads for graduate assistants are defined on the basis of a normal teaching load or the equivalent time in other duties as determined by each department head and the dean of the school or college in which the assistant is employed. For example, a one-third workload is one-third of a normal teaching load. Graduate students may hold multiple assistantships and the assistantships may come from different units on campus, but together they cannot add up to more than a 100 percent appointment. Maximum course loads for graduate assistants are determined by individual departments. It is recommended that graduate students working more than half-time not carry a full academic load.

Graduate students enrolled in academic degree programs are guided by plans of study approved by their major professors/advisers. Each plan of study includes but is not limited to didactic course work which addresses the requirements established by the Graduate Faculty for each graduate degree program. For thesis and dissertation students, the plan of study also includes research/thesis and research/dissertation hours which reflect the academic research requirements for the degree program and the involvement of the faculty in working with the students in mastering those requirements. Accordingly, requirements that graduate students register for hours not included in the plan of study as a condition of employment or to enhance credit hour production for administrative purposes are inappropriate. Similarly, requiring hours on the plan of study beyond the degree requirements established by the Graduate Faculty for such administrative purposes is also inappropriate unless the additional requirements are required by university policy.

International graduate students on F1 visas cannot hold a greater than 50 percent work appointment. International graduate students on F2 visas cannot hold a work appointment. Multiple assistantships for international graduate students cannot add up to more than a 50 percent work appointment.

International graduate teaching assistants who are assigned to scheduled lecture or laboratory sections must first be certified in spoken English proficiency. Certification may be attained through a minimum score of 50 on the Test of Spoken English (TSE) offered by the Educational Testing Service or approval by the director of the English as a Second Language Program (ESL). Applicants who hold a baccalaureate degree from an accredited institution whose instruction is in English may be exempted from this requirement.

Non-Alabama resident graduate assistants may receive an out-of-state tuition waiver if they are on at least a 25 percent graduate assistantship and are paid a minimum monthly stipend set each year by the Provost. Such graduate assistants who have been on assistantship for at least two consecutive semesters will automatically have their out-of-state tuition waived for the next semester whether or not they are on assistantship that semester.

Graduate Fellowships
Auburn University provides in-state tuition fellowships to most of its students holding graduate assistantships. Though administered through the Graduate School, applicants should contact the specific academic departments concerning eligibility and availability.

Oak Ridge Associate Universities
Auburn University has been a sponsoring institution of the Oak Ridge Associated Universities (ORAU) since 1946. ORAU is a private, not-for-profit consortium of 82 colleges and universities and a management and operating contractor for the U.S. Department of Energy (DOE) with principal offices located in Oak Ridge, Tennessee. Founded in 1946, ORAU provides and develops capabilities critical to the nation’s technology infrastructure, particularly in energy, education, health and the environment. ORAU works with and for its member institutions to help faculty and students gain access to federal research facilities; to keep members informed about opportunities for fellowship, scholarship and research appointments; and to organize research alliances among our members in areas where their collective strengths can be focused on issues of national importance.

ORAU manages the Oak Ridge Institute for Science and Education (ORISE) for DOE. ORISE is responsible for national and international programs in science and engineering education, training and management systems, energy and environment systems and medical sciences. ORISE’s competitive programs bring students at all levels, K-12 through postgraduate, and university faculty members into federal and private laboratories. Other ORAU activities include the sponsorship of conferences and workshops, the Visiting Scholars program and the Junior Faculty Enhancement Awards. Contact Dr. Bryan A. Chin, (334) 844-4784, for more information about ORAU programs.

General Regulations
Regulations governing the Graduate School equal or exceed the standards of the Conference of Southern Graduate Schools and the Commission on Colleges and Universities of the Southern Association of Colleges and Schools. Regulations listed here represent the minimums of the Graduate School. However, individual departments may impose more stringent requirements and students will be governed by them.

Application for Admission
To apply for graduate study, one must submit to the Office of Graduate Admissions:
1. A formal application. Applications for admission may be made online at www.grad.auburn.edu or forms may be obtained from the Graduate School offices at 106 Hargis Hall, Auburn University, Auburn, AL 36849-5122. Domestic applications must be accompanied by a fee of $25; international applications must be accompanied by a fee of $50. These fees may be paid online via credit cards or by checks or money orders (made payable to Auburn University).
2. Two official transcripts of all undergraduate- and graduate-level study from each school previously attended. An applicant who, because of current enrollment, cannot provide final transcripts at the time of application, must submit transcripts of all completed study, as well as incomplete transcripts from the current institution. Applicants do not need to provide transcripts for credits earned at Auburn University.
3. Standardized Graduate Record Examinations (GRE) general test scores. Management, Finance, Marketing, Business Administration, and Accounting applicants must submit scores on the Graduate Management Admission Test (GMAT). Management will accept the GRE or GMAT. The Master of Business Administration program will allow the substitution of the GRE for the GMAT under some circumstances. International applicants must also submit Test of
English as a Foreign Language (TOEFL) scores. In addition to the GRE General Test, the following departments require the GRE Subject Test for admission to their doctoral programs: Discrete and Statistical Sciences, English, Mathematics and Biological Sciences. Applications and dates for these tests may be obtained at many colleges and universities; by writing the Educational Testing Service, P.O. Box 6000, Princeton, NJ 08541-6000; by telephoning (609) 771-7670 for the GRE, (609) 771-7330 for the GMAT, or (609) 771-7100 for the TOEFL; or by accessing the Educational Testing Service web site at www.ets.org.

4. Additional Materials. Academic programs typically require additional materials in order to evaluate an applicant's potential for graduate study. Prospective students must also contact the department in which they wish to study to obtain information regarding additional admission requirements, such as writing samples and letters of recommendation. With the exception of the application, official transcripts, and standardized test scores, which should be sent to the Graduate School, materials requested by programs should be sent directly to the academic department.

Admission to any graduate degree program is granted by the dean of the Graduate School upon the recommendation of the department of proposed study. Applications and all other relevant material must be received by the Graduate School at least forty-five days before the first day of class of the semester in which the student wishes to begin graduate study. International applicants should submit all required materials at least ninety days before the first day of class of the semester in which the student wishes to begin graduate study. Deadlines set by the Graduate School are listed in the front of the Auburn University Bulletin. However, most academic units make admission decisions several months in advance. Thus, applicants should check with the department to which they seek admission to determine when materials should be submitted. Approval is valid for a maximum of twelve months beyond the entrance date given on the application. If the student does not register during this period, a new request for approval must be submitted. Application materials become the property of Auburn University and may not be returned to the applicant or forwarded to other institutions. Admission Requirements

Departments make admissions decisions based on the compatibility of the applicant's goals with departmental resources, the availability of spaces for new students, and a holistic evaluation of the applicant's potential for success in the program. Other considerations might typically include standardized test scores, grades and/or grade-point averages, letters of recommendation, writing samples, research or applied experience, and interviews.

To be considered for admission, the applicant must satisfy the following requirements:

1. The applicant must hold a bachelor's degree from an accredited U.S. institution, or the equivalent from an international institution.

2. The applicant must be in academic good standing at the institution last attended.

3. The applicant must submit standardized examination scores (GRE, GMAT, and/or TOEFL). Applicants with an earned doctorate (Professional, Ed.D., Ph.D.) from an accredited institution whose instruction is in English may be exempted from this requirement.

4. The successful applicant normally will meet one of the following: a) a grade-point average of at least 2.75 on all undergraduate course work at an accredited United States institution in fulfillment of the requirements for a baccalaureate degree; b) a grade-point average of at least 3.0 on the last 60 semester hours of undergraduate course work at an accredited United States institution in fulfillment of the requirements for a baccalaureate degree; c) a grade-point average of at least 3.0 on all graduate course work at an accredited United States institution in fulfillment of the requirements for a graduate degree; or d) an acceptable GRE or GMAT score as determined by the program to which the applicant applies.

5. Applicants whose native language is not English must submit either TOEFL scores of at least 550 on the written test (213 on the computer-based test) or IELTS scores of at least 6.5.

6. The applicant must be recommended for admission by the graduate faculty in the applicant's area of study. Departments may (and frequently do) establish higher standards than those described here, and may require that applicants submit additional materials. Applicants should contact the department to which they seek admission for information about additional requirements.

Final evaluation of application files will not occur until all of the above requirements have been met. Applicants will be notified by the dean of the Graduate School when an admissions decision has been made. Some departments, operating with a limited number of spaces for students each year, may make final decisions for the fall semester in early spring.

Admission of Transient Graduate Students

A graduate student in good standing in an accredited college or university may be admitted as a transient when faculty and facilities are available. To be eligible, the student must submit a special Graduate Transient Form prior to the beginning of the semester for which transient status is requested. The form, available from the Graduate School or on the web at www.grad.auburn.edu, must bear the signature of the student's graduate dean or his/her designee. Transient status is granted for one semester only and does not constitute admission or matriculation as a degree candidate.

Student Classifications

For administrative purposes, Auburn University students are assigned to a class level. Those that apply to graduate students are:

1. MST - Students who hold full admission to Master's programs.
2. EDS - Students who hold full admission to Specialist in Education programs.
3. EDD - Students who hold full admission to Doctor of Education programs.
4. PHD - Students who hold full admission to Doctor of Philosophy programs.

Non-Graduate Students and Graduate Work

An Auburn University student who will receive a bachelor's degree from this institution may register for graduate courses provided that the following conditions are met: the student has at least a 3.0 grade-point average, is within 30 semester hours of graduating, has the written consent of the instructor of each graduate course, and obtains approval in advance from the Graduate School. A maximum of 6 semester hours of graduate course work taken in this option later may be applied toward a graduate degree at Auburn University with the approval of the student's advisory committee provided that appropriate arrangements are made in advance with the Graduate School and a grade of B or higher is achieved on all courses used for graduate credit. The total course load taken at the time the undergraduate student is in a graduate course does not exceed 16 semester hours. The same guidelines apply to undergraduate students taking graduate courses for undergraduate credit. A student may not use the same graduate course for both undergraduate and graduate credit.

Any post-baccalaureate, non-degree student desiring enrollment in a graduate course must receive written consent of the instructor and approval of the Graduate Dean in order to register for such a class.

Undergraduate Courses, S/U Option and Auditing Courses

A graduate student may register for undergraduate courses 1000-4000 level. For students enrolled in Graduate School, grades earned in undergraduate courses will not be used in calculation of the grade-point average for either retention or graduation, but will appear on the graduate transcript. This policy took effect with the posting of grades fall 1998. For courses taken before fall 1998, grades earned in undergraduate courses may be used in calculation of the grade-point average for retention, but not for graduation. A graduate student may elect any course to be graded under the Satisfactory (S)-Unsatisfactory (U) option, except for courses required on the Plan of Study, if the major professor so recommends. Students are not allowed to select this option after the 15th class day. Courses listed on the Plan of Study must be graded A,
A graduate student may carry a maximum course load of 16 hours per semester. (14 in the summer term). This includes undergraduate courses, but does not include 7990 (Research and Thesis) and 8990 (Research and Dissertation) when required of all graduate students in a department each semester. Graduate students must carry nine hours per semester or enroll in GRAD 7900/8900 with concurrent enrollment for a minimum of one hour of 7990/8990 to be classified as full-time students. Enrollment in GRAD 7900/8900 requires the completion of a certification available at the Graduate School or on the web at www.grad.auburn.edu.

Master's (thesis option only) students are eligible for up to three semesters of GRAD 7900; doctoral students for up to six semesters of GRAD 8900.

**Calendar**

The university operates on the semester system. The Graduate School calendar on page 5 of this bulletin is also available at the Graduate School and contains the dates of various deadlines of importance. It should be followed carefully.

**Advisers**

The dean of the Graduate School is the general counselor to all graduate students. A faculty adviser or major professor will be designated for each student by the head or chair of the major department. There also will be an advisory committee for each student. Some required forms and reports regarding the student's program must be approved by the major professor, advisory committee, department head or chair and the dean of the Graduate School. Students should ascertain which signatures must be obtained.

**Due Process**

Each graduate student's progress toward a degree will be monitored by the student's advisory committee. If a graduate student is deemed not to be making satisfactory progress toward the degree, the student may be dropped from the Graduate School. Issues of professional and personal development may be considered in determining satisfactory progress toward the degree.

**Withdrawing from Courses**

Courses may be dropped without academic penalty on or before mid-semester. A course may be dropped after mid-semester only under unusual conditions. When the Graduate Dean approves dropping the course under such circumstances, a W will be assigned only when the instructor indicates that the student is clearly passing the course. Otherwise a grade of WF (Withdrawn Failing) is assigned. A student dropping the only course or all courses for which the student is registered after the first class day must resign for the semester on a separate form obtained from the Graduate School.

**Transfer to a Different Degree Program**

For a student to transfer from one department to another requires a new application for admission and the usual application fee. Changes in application status (master's to doctoral, doctoral to master's) or enrollment status (master's to doctoral, doctoral to master's) must be requested by the applicant/student involved and endorsed by the department head or chair, major professor, and advisory committee for enrolled students and approved by the dean of the Graduate School. Current inter-national students must recertify full financial sponsorship for the issuance of a "new" I-20 form.

**Grades**

To receive a graduate degree at Auburn University, a student must earn a cumulative grade-point average of 3.0 on a 4.0 scale on all courses carrying graduate credit. No more than nine hours beyond the student's Plan of Study is allowed in obtaining the cumulative graduate grade-point average (CGGPA). No grade below C (including unsatisfactory grades for courses taken under the S/U option) is acceptable for credit toward a graduate degree. Each graduate course in which a grade below C is received must be repeated at Auburn University whether or not it is listed on the student's Plan of Study. Both the original grade and the grade for the repeated course will be counted in calculating the CGGPA. Course credits transferred from another institution may not be
used to satisfy this requirement. Courses retaken will not count against the nine-hour limit beyond the student’s Plan of Study in obtaining the minimum CGGPA.

Academic Standing

Only grades in Auburn University courses approved for graduate credit will be used in determining the overall grade-point average for continuation in the Graduate School. If at the end of any semester the cumulative graduate grade-point average (CGGPA) falls below 3.0, the student will be placed on academic probation. If the CGGPA remains below 3.0 after the next nine credit hours of graduate enrollment (both graded and ungraded), the student will be placed on academic suspension. The student may be readmitted only after completion of a remediation plan recommended by the academic unit and approved by the dean of the Graduate School. No course work taken as part of the remediation plan may count toward the student’s degree or CGGPA. Graduate-level courses for which grades below C were earned may not be repeated during the remediation period.

Academic Bankruptcy Policy

Auburn University graduate students who have been suspended or expelled because of poor academic performance may petition the Graduate School for a declaration of academic bankruptcy. Academic bankruptcy allows the student to petition his or her department and the Graduate School to restart his or her graduate program after a two-year separation from Auburn University. The student forfeits all graduate courses and credits earned at Auburn University and any transfer courses and credits accepted by Auburn University prior to the declaration. For readmission, the student must submit a new application for admission and must meet the regular admission requirements of the Graduate School and be accepted by the graduate program to which the student is applying. Upon readmission, Auburn University will retain all forfeited courses on the student’s transcript, but will not include forfeited courses in the calculation of the Graduate Grade Point Average. Upon readmission, students may request acceptance of previously forfeited transfer courses, but not courses earned at Auburn and forfeited in accordance with this policy. Students may not declare academic bankruptcy more than once.

Incompletes

A grade of “incomplete” must be removed within the following six months or it will be recorded permanently as an F and the course will have to be repeated. This applies regardless of the student’s enrollment status. A student not enrolled during the following six months is not exempt from this rule. No student may graduate until “incomplete” and “no record” grades are removed, and the removal must be completed at least three weeks before the date of graduation, regardless of whether the course is included on the Plan of Study.

Graduate Study and University Employees

An Auburn University faculty member or employee may pursue a graduate degree outside the school or college of employment with the approval of the head or chair of the employing department and the dean of the employing school or college. Inquiries should be made to the dean of the Graduate School.

Correspondence Work Unacceptable

Study by correspondence shall not be counted toward a graduate degree.

Classified or Proprietary Research

No thesis or dissertation should be based exclusively on a proprietary or classified research project, nor should a thesis or dissertation include proprietary or classified information. Any graduate student and adviser engaged in such research should identify an alternative topic for the thesis or dissertation. Should a thesis or dissertation include such information, the document must be rewritten with offending material excised.

Research Involving Humans

Auburn University established the Institutional Review Board for the Use of Human Subjects in Research (IRB) to evaluate research for compliance with the guidelines and policies of the U.S. Department of Health and Human Services, the Public Health Service, the Food and Drug Administration and other federal, state and local regulations. All research in which human subjects are used, whether by faculty, staff or students, must be approved in advance by the IRB, regardless of the source of funding, lack of funding or any other consideration. Research involving human subjects not approved in advance may be disallowed and may incur severe penalties for non-compliance with institutional policy. Information and review forms may be obtained from the Administrator for Special Programs, 307D Samford Hall, (334) 844-5986.

Activities Involving Animals

Auburn University’s Animal Resources Program requires compliance with the Animal Welfare Assurance negotiated with the Office of Protection from Research Risks/National Institutes of Health (OPRR/NIH). A major part of that Assurance involves the Institutional Animal Care and Use Committee (IACUC) that ensures compliance with the Assurance, the policies of the U.S. Department of Health and Human Services, the U.S. Department of Agriculture and all other federal, state and local regulations concerning care, treatment and use of animals. All activities, whether teaching, research, production or display of animals, and whether or not the activity is funded, must be approved in advance by the committee. The use of animals for any purpose that is not approved in advance by the IACUC may involve severe penalties for non-compliance with institutional policy and could jeopardize the University’s Animal Welfare Assurance filed with the OPRR and the NIH. Information may be obtained from the Director of Animal Resources, (334) 844-5667.

The Master’s Degree Program

The minimum requirements for most master’s degrees can be satisfied in one academic year of two semesters or nine months. In practice, however, many students need three semesters or longer. Certain departments have special requirements as outlined in this bulletin. In addition, those students who hold assistantships or fellowships, those who engage in time-consuming work off-campus, or those with scholastic deficiencies of any sort cannot meet all requirements in the minimum time. Also, research is unpredictable and frequently requires more time than anticipated. Certain departments offer a master’s degree under two plans, referred to as the Thesis Option and the Non-Thesis Option.

The Master of Science

The Master of Arts

The Master of Arts is offered in Communication (thesis and non-thesis), English (thesis and non-thesis option), History (thesis and non-thesis option), Sociology (thesis and non-thesis option) and Spanish.

Special or Professional Master’s Degrees

These special or professional degrees are offered: Master of Accountancy, Master of Aerospace Engineering, Master of Agriculture (Agricultural Economics, Agronomy and Soils, Animal Sciences, Entomology, Horticulture, Plant Pathology, and Poultry Science), Master of Applied Mathematics, Master of Aquaculture, Master of Building Construction, Master of Business Administration, Master

Advisory Committee

The student works under the direction of an advisory committee composed of three members recommended by the appropriate department head or chair. Two must be members of the graduate faculty. This committee will approve the student’s program of study, conduct required examinations and direct the required field project or thesis. Students in a teaching field (e.g., music education, science education, foreign language education) work under a committee composed of at least two members from the College of Education and one member from a related academic field.

Plan of Study

Early in the graduate program, each student should confer with the appropriate departmental adviser or major professor to select courses and discuss research interests. Then a Plan of Study should be prepared and submitted to the Graduate School. The Plan of Study form is available on the web at www.grad.auburn.edu or in the Graduate School. For full-time students, the Plan of Study must be submitted no later than the end of the first semester in Graduate School. For part-time students, the Plan of Study must be submitted before registration for the fourth course taken in Graduate School. Notification of all changes must be provided before the beginning of the final semester. One to three changes may be made by using the simplified “Change in Existing Plan of Study Form” available at the Graduate School or on the web. Four or more changes require a new Plan of Study. The student is responsible for carrying out the planned program and for asking the major professor to make necessary changes.

No student will be permitted to graduate who fails to submit a Plan of Study and a graduation check to the Graduate School prior to the semester of expected graduation. Graduation day is the official last day of each semester and, therefore, is the deadline for submitting Plans of Study and graduation checks for graduation the following semester.

Language Requirement

Some departments require a reading knowledge of one foreign language. These requirements are outlined in the departmental statements later in this section. Arrangements to take the foreign language examination should be made with the student’s major professor and the head or chair of the department. The student must apply at the Graduate School by the deadline for each semester listed in the calendar.

Residency Requirement

Resident, on-campus study is the foundation for research-based graduate degree programs at Auburn University. Any graduate student enrolled in a degree program culminating in a thesis or dissertation must direct engage in research with the major professor, must have access to the research tools needed for the research activity, must be immersed in the culture of graduate education, must engage in the professional activities of the discipline, and must complete the research activity in a reasonable period of time. Graduation requires the major professor to certify compliance with these requirements.

Time Limit

All graduate work toward a master’s degree must be completed within a period of five calendar years.

Master’s Degree Options

The following general regulations are minimum requirements. The professor or committee in charge of a student’s work may require more than the specified minimum in order to achieve a well-rounded program. All programs require a minimum of 30 semester hours of graduate courses, 6000-level or above.

The Thesis Option

The Master of Arts, Master of Science and Master of Industrial Design are offered under the thesis option.

Majors and Minors Subjects: A student under the thesis option must earn a minimum of 30 semester hours, of which at least 21 semester hours must be in a major area of concentration. Depending on departmental requirements or the wishes of the student’s advisory committee, the remainder of the course work may be taken within the major field or in a separate but closely related area. Specific requirements are set forth in this bulletin.

If a student has not met all undergraduate pre-requisites in any field chosen for major or minor work, these should be scheduled as soon as possible, preferably before graduate work begins. The major professor will indicate these on the student’s Plan of Study.

The topic selected for the thesis must be approved by the student’s major professor and advisory committee. The student conducts the research and prepares the thesis under the direction of the major professor. The course entitled “Research and Thesis” is number 7990 in all departments. The student must register for a minimum of four credit hours of this course but may register for as many hours as desired. No more than six hours may be counted toward meeting degree requirements. The student may register for one or more hours at a time. No grade is assigned for this course.

The Guide to the Preparation and Submission of Theses and Dissertations, which contains information about requirements for the thesis, is available on the web at www.grad.auburn.edu. Submission of a thesis is defined as the time at which the first complete draft of such is submitted to the major professor for review. The Graduate School accepts only theses prepared according to the Guide. The Graduate School Calendar lists the deadline for acceptance of final copies of theses by the Graduate School each semester. “Final copies” means that the thesis is perfected and ready for binding. A format check may be obtained at the Thesis and Dissertation Office in the Graduate School. If final copies are found to need corrections, the student’s graduation may be delayed at least one semester. Auburn University reserves the right to make copies of the thesis, but the student retains all publication rights. Effective Summer 2005, all theses must be published electronically through AUETD.

All candidates under the thesis option must pass a comprehensive examination covering the major and minor field, as well as the research and thesis. This usually is a two-hour oral examination, but the student’s advisory committee also may require a written examination. Members of the Graduate Faculty not on the advisory committee may attend any oral examination as visitors. The major professor will schedule the oral examination not later than the deadline indicated in the Graduate School Calendar. Successful completion requires the unanimous support of all members of the advisory committee. If a student fails the examination, one re-examination may be given on recommendation of the advisory committee and approval by the dean of the Graduate School. Further examinations will be allowed only under exceptional circumstances and with the approval of the Graduate Council.

The Non-Thesis Option

Information on special or professional master’s degrees not requiring a thesis may be found in this bulletin. Students in these programs must pass a comprehensive examination just as do students under the thesis option. The examination covers the major and minor and any research and special project involved. Credit hours for 7990 Research and Thesis cannot be counted toward graduation requirements for non-thesis degree programs. If a student fails the examination, one re-examination may be given on recommendation of the advisory committee and approval by the dean of the Graduate School. Further examinations will be allowed only under exceptional circumstances and with the approval of the Graduate Council.
Summary of Procedures for Master's Degree Program

The student should:
1. Obtain application forms from the Graduate School and apply for admission by submitting completed forms and other required materials as outlined in this bulletin.
2. Apply for an assistantship, if pertinent, with the department involved.
3. Become familiar with requirements for the desired degree as outlined in this bulletin.
4. Consult with departmental adviser and become oriented to departmental procedures.
5. Plan schedule of study for the first semester with adviser.
6. Establish an advisory committee through the department head or chair and departmental adviser; usually done during the first semester of course work.
7. Prepare a proposed Plan of Study in consultation with the advisory committee. Submit a plan approved by the committee and department head to the Graduate School no later than the second semester.
8. Consult with the adviser on approval for the thesis plan, if pertinent, and become familiar with the Guide to the Preparation and Submission of Theses and Dissertations, available in the University Bookstore and on the web (www.grad.auburn.edu).
9. Fulfill language requirements, if any.
10. Request graduation check in the Graduate School no later than the last day of the semester (graduation day) prior to the semester of graduation.
11. Students must be registered for at least one course the semester of graduation.
12. Prepare thesis manuscript, if pertinent.
13. Arrange for final oral examination with advisory committee.

Second Master’s Degree

For a second master’s degree, the student fulfills all major requirements applicable to any other master’s degree, including the thesis, if appropriate. The student may, on recommendation of the advisory committee, transfer credit hours from the previous master’s degree. The student must earn at least 24 semester hours, or half of the total hours required for the master’s degree, whichever is greater, in the second master’s program at Auburn University.

The Specialist in Education Degree

This degree is designed for professionals in education and human services areas who want increased competence in a field of specialization. Areas of specialization are offered in the various departments in the College of Education.

Admission

Scholarship, interpersonal orientation and potential for leadership are considered in the screening procedure. Appropriate experience in teaching or a leadership position in education or a human services area is requisite. All work beyond the baccalaureate must have been of high quality with a grade-point average of at least 3.0 on a 4.0 scale. Students holding a master’s degree from Auburn University are not required to resubmit GRE scores.

Advisory Committee

The student works under the direction of an advisory committee composed of three members recommended by the appropriate department head or chair. All must be members of the Graduate Faculty. This committee will approve the student’s program of study, conduct required examinations and direct the required field project. Students in a teaching field (e.g., music education, science education, foreign language education) work under a committee composed of two members from the College of Education and one member from a related academic field.

Requirements for Degree

A minimum of 30 semester hours beyond the master’s degree must be taken in a program approved by the student’s advisory committee. The Plan of Study should be submitted to the Graduate School no later than the second semester of study. Professional educators pursuing sixth-year certification are responsible for adapting their Plans of Study to requirements in the states in which they will need advanced certifica-

Doctoral Degrees

The Doctor of Philosophy is offered in Aerospace Engineering, Animal Sciences, Biological Sciences (Botany, Microbiology and Zoology), Chemical Engineering, Chemistry, Civil Engineering, Computer Science and Software Engineering, Consumer Affairs, Counseling and Counseling Psychology, Curriculum and Teaching, Discrete and Statistical Sciences, Educational Psychology, Electrical and Computer Engineering, English, Fisheries and Allied Aquacultures, Forestry and Wildlife Sciences, Health and Human Performance, History, Horticulture, Human Development and Family Studies, Industrial and Systems Engineering, Management, Materials Engineering, Mathematics, Mechanical Engineering, Nutrition and Food Science, Physics, Plant Sciences (Agronomy and Soils, Plant Pathology, and Entomology), Poultry Science, Psychology, Public Administration and Public Policy, and Rehabilitation and Special Education, plus interdepartmental pro-grans in Biomedical Sciences (Anatomy, Physiology, and Stud Pharmacology; Large Animal Surgery and Medicine; Pathobiology; Radiology; and Small Animal Surgery and Medicine), Economics (Agricultural Economics and Forestry), Integrated Textile and Apparel Science (Consumer Affairs and Textile Engineering), and Pharmaceutical Sciences (Pharmacal Sciences and Pharmacy Care Systems).

The Doctor of Education is offered in the following departments: Counseling and Counseling Psychology; Educational Foundations, Leadership and Technology; and Health and Human Performance.

Admission

Prospective candidates for the degrees of Doctor of Philosophy and Doctor of Education are admitted under the same procedures and requirements outlined in the General Regulations elsewhere in this bulletin. A student must be admitted to a specific doctoral program, but admission does not mean admission to candidacy for the degree, which occurs only after satisfactory completion of the general oral examination.

Advisory Committee and Plan of Study

After the student has enrolled in the doctoral program, an advisory committee should be selected by the student, major professor and department head or chair. The advisory committee is responsible for developing the student’s Plan of Study and conducting the doctoral general and final examinations. It should consist of at least three members of the Graduate Faculty. At least two, including the major professor, must be members of the Graduate Faculty at Level Two. The formal appointment of the advisory committee occurs when the Plan of Study is approved by the Graduate School.

The Plan of Study should be prepared by the student and the advisory committee and filed with the Graduate School as soon as feasible. It should not be delayed beyond the second semester of doctoral work. The Graduate School recognizes that changes may be warranted, and a form is available for amendments as required by student needs, research interests and course availability.

Residency Requirement

Resident, on-campus study is the foundation for research-based graduate degree programs at Auburn University. Any graduate student enrolled in a degree program culminating in a thesis or dissertation must directly engage in research with the major professor, must have access to the research tools needed for the research activity, must be immersed in the culture of graduate education, must engage in the professional activities of the discipline, and must complete the research activity in a reasonable period of time. Graduation requires the major professor to certify compliance with these requirements.
General Doctoral Examination
A general examination, often called the “preliminary examination,” is required of all applicants for the degrees of Doctor of Philosophy and Doctor of Education. It consists of written and oral testing by the student’s advisory committee in the student’s major and minor. The written portion of the examination does not require approval in advance by the Graduate School. The oral portion, however, does require such approval. Arrangements for the oral examination must be made by application to the Graduate School at least one week in advance of the examination. The primary purpose of the general examination is to assess the student’s understanding of the broad body of knowledge in a field of study. The examination also affords the advisory committee an opportunity to review the student’s proposed research and understanding of research methods and literature in the chosen field. If the general examination reveals deficiencies in any of these areas, the advisory committee may recommend remedial work, reexamination, or discontinuation of doctoral study.

The general oral examination should be conducted immediately after the successful completion of the written examination and well before the final examination. At least one complete semester (preferably more than one) must intervene between the general oral and final examinations. The two examinations thus cannot be taken either in the same semester or in consecutive semesters. Some departments have specific requirements for conducting these examinations, and the student should become familiar with these. Successful completion of the oral examination requires unanimous support of the student’s advisory committee. If the general oral examination is failed, a re-examination may be given on recommendation of the committee and approval by the Dean of the Graduate School. Further examinations require exceptional circumstances and approval by the Graduate Council.

The student becomes a candidate for the degree on successful completion of the general examination and has four calendar years thereafter to complete all additional requirements. If unable because of reasons beyond the candidate’s control to complete the requirements on time, the student may petition the dean of the Graduate School for an extension. Otherwise, the student will revert to the status of an applicant and must petition the dean of the Graduate School to retake the general oral examination.

Final Examination
After the first draft of the dissertation has been completed and has been approved by the student’s advisory committee, it is submitted to the Graduate School. An outside reader (representing the University’s graduate faculty and the Graduate School) will be appointed to review the dissertation. However, the student’s advisor may request the appointment of the outside reader at any time rather than waiting until after the dissertation is drafted. When the Graduate School has approved the dissertation, the student may apply for the final examination on a form obtained from the Graduate School. The application must be filed with the Graduate School at least one week in advance of the final examination. The examination is administered by the student’s advisory committee. The representative of the university’s graduate faculty, the outside reader, also attends and participates. The examination, which generally is oral but may be both oral and written, includes the major and minor fields and a defense of the dissertation. Successful completion requires unanimous support of all members of the committee, including the outside reader. Any member of the Graduate Faculty may attend.

If a student fails the final examination, a re-examination may be given on recommendation of the advisory committee and approval by the dean of the Graduate School. Further examination requires exceptional circumstances and approval of the Graduate Council. In addition to successful completion of all examinations, final copies of the dissertation must be submitted to the Graduate School before the degree is conferred (see Graduate School calendar on page 5 for deadline).

The Doctor of Philosophy Degree
The Doctor of Philosophy is conferred in recognition of the mastery of a special field of learning as shown by the satisfactory completion of a prescribed course of study and investigation, the successful passing of a final examination covering the major and minor fields, the preparation of a suitable dissertation reflecting high achievement in scholarship and independent original investigation, and the passing of a final examination on the dissertation and related subjects. The degree is conferred on the student with the approval of the appropriate doctoral committee of the Graduate School. The dissertation is drafted. When the Graduate School has approved the dissertation, the student may apply for the final examination on a form obtained from the Graduate School. The application must be filed with the Graduate School at least one week in advance of the final examination. The examination is administered by the student’s advisor. The representative of the university’s graduate faculty, the outside reader, also attends and participates. The examination, which generally is oral but may be both oral and written, includes the major and minor fields and a defense of the dissertation. Successful completion requires unanimous support of all members of the committee, including the outside reader. Any member of the Graduate Faculty may attend.

If a student fails the final examination, a re-examination may be given on recommendation of the advisory committee and approval by the dean of the Graduate School. Further examination requires exceptional circumstances and approval of the Graduate Council. In addition to successful completion of all examinations, final copies of the dissertation must be submitted to the Graduate School before the degree is conferred (see Graduate School calendar on page 5 for deadline).

The Doctor of Education Degree
The Doctor of Education is a professional degree conferred in recognition of ability and achievement in some special field or fields of education. This is shown by satisfactory completion of a prescribed course of study, application of scientific principles in classroom teaching, administration, the supervision of instruction, or other aspects of educational programs; preparation of a dissertation demonstrating ability to investigate an education problem with originality and independence of thought; successful completion of examinations showing a satisfactory grasp of a field of specialization and its relation to allied subjects; and recognized leadership in a specialty as shown by at least three years of successful experience.

Course Requirements
The major is divided into general professional education, area of specialization, and other approved courses. General professional education includes courses in such areas as research methodology and statistics;
Submission of Theses and Dissertations, available at www.grad.auburn.edu or the University Bookstore.

Graduate Degrees Offered

Accountancy - M.Ac.

The Master of Accountancy is a professional non-thesis degree program. Criteria for admission and degree requirements are established by the School of Accountancy. This program is available to individuals with a four-year degree from an accredited institution and a strong background in the fundamentals of business and accounting education.

Requirements for the M.Ac. include 30 semester hours of course work, including a capstone course (ACCT 7980/7986) and one four and one-half day on-campus residency. The curriculum offers students the flexibility to tailor the program to meet their specific career objectives. Students take only four core courses and choose three accounting electives and three business electives. The M.Ac. degree can be earned as a traditional, on-campus student or through the video-based outreach program.

Information concerning specific requirements may be obtained by contacting the Director of Graduate Programs, School of Accountancy, at (334) 844-6207.

Aerospace Engineering - M.A.E., M.S., Ph.D.

Graduate study in aerospace engineering leads to the degrees of Master of Science, Master of Aerospace Engineering, and the Doctor of Philosophy. The graduate program prepares students for careers in the aerospace industry, in government laboratories and in academia. Studies for the Ph.D. also are designed to produce research scholars. Applicants should have a bachelor's degree in aerospace engineering or its equivalent from an institution of recognized standing, plus satisfactory GRE scores. Degrees in mathematics, physics and certain other engineering disciplines may also be appropriate for entrance into the graduate program. Applications must be approved by the department's committee on graduate study.

For the Master of Science degree, the student must complete an approved program of at least 30 credit hours in aerospace engineering or closely related supporting subjects at the 6000 level or above. The Master of Science degree requirements include the completion of a thesis under the supervision of a major professor and an advisory committee.

The Master of Science degree is a non-thesis degree for which the student must complete an approved program of at least 33 hours of course work at the 6000 level or above. A suitable project in aerospace engineering, culminating in a final written report approved by the student's advisory committee, may be substituted for three credit hours of course work. An oral presentation is also required for the M.A.E. degree.

For both the M.S. and M.A.E. degrees, at least half of the required credit hours must be completed in aerospace engineering courses. For the Doctor of Philosophy degree, the student must complete a minimum of 60 credit hours beyond the bachelor's degree. A plan of study will be arranged on an individual basis and students may elect to specialize in the general areas of aerodynamics, computational fluid dynamics, control theory, flight dynamics, orbital mechanics, propulsion, structures or structural dynamics. A written qualifying examination and a general doctoral examination, with both written and oral parts, are required of all doctoral candidates. An oral defense of the doctoral dissertation is also required of each student.

There is no language requirement for the master's or Ph.D. degrees.
Agricultural Economics - M.S., M.Ag., Ph.D.

The Master of Science and Master of Agriculture are offered in both Agricultural Economics and Sociology (Rural). Also, the non-thesis Master of Agriculture is available in either Agricultural Economics or Rural Sociology. The Doctor of Philosophy in Agricultural Economics is offered through the interdepartmental doctoral program in Economics. Admission to any of the masters degree programs requires a bachelors degree from an institution with courses in economics (agri-cultural) or sociology (rural), as appropriate to the desired degree. All students must have the equivalent of 15 credit hours in courses closely related to the student’s masters degree program area. Such courses might include economic theory, quantitative methods and statistics, and/or closely related subjects acceptable to the major professor and advisory committee.

The M.S. in Agricultural Economics requires a minimum of 30 semester hours of graduate credit, including four credit hours of thesis research. At least 20 hours must be taken in the department for the major and the remaining six may be in closely related and approved areas. The program of study, including course work and the thesis, will be planned in the student’s special field of interest which may be farm management, agricultural marketing, production economics, prices and pricing, resources and the environment, agricultural finance, agricultural policy or other approved areas.

Graduate study in rural sociology in either the M.S. or M.A. degree is available through the interdepartmental graduate program in sociology. The interdepartmental program involves rural sociologists from the Department of Agricultural Economics and Rural Sociology and sociologists and anthropologists from both the Department of Sociology, Anthropology and Social Work on main campus and the Department of Sociology at AUM. More information can be found in the Sociology section under Interdepartmental Programs and from the Rural Sociology program.

The Master of Agriculture in either agricultural economics or rural sociology requires no thesis but the student must complete a minimum of 32 graduate credit hours, 18 of them in the major, as approved by the major professor and the advisory committee. A final oral examination given by the advisory committee is also required.

The M.B.A. in agribusiness or natural resources and environmental management is offered in a program coordinated between the College of Business and the Department of Agricultural Economics and Rural Sociology. Requirements include 36 graduate credit hours, consisting of 24 hours in business and 12 hours in agricultural economics or a closely related field, as approved by the director of the M.B.A. program and the major professor in agricultural economics.

The Ph.D. is offered through the interdepartmental doctoral program in economics administered jointly through the Department of Agricultural Economics and Rural Sociology and the School of Forestry and Wildlife Sciences. Students must complete 30 graduate credit hours beyond the M.S. degree, or 60 graduate credit hours beyond the baccalaureate degree, plus a minimum of 10 hours of dissertation research. Students must also pass a general doctoral examination that includes a written qualifying examination in the areas of microeconomics, macroeconomics and quantitative methods followed by an oral examination on the student’s field of specialization and proposed research. The final oral examination covers disciplinary subjects and defense of the dissertation.

Anatomy, Physiology and Pharmacology (See Biomedical Sciences)

Animal Sciences - M.S., M.Ag., Ph.D.

Graduate study in animal sciences is directed toward the master’s and doctoral degrees. The Master of Agriculture (M.Ag.) is offered as a non-thesis degree and prepares students for careers in secondary education and agribusiness. Graduate programs leading to the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees provide advanced education and technical training in preparation for careers in public and private sectors related to animal science and technology, food science and technology, animal biotechnology, agribusiness and university-level research and education. Areas of specialization include animal nutrition, biochemistry and molecular biology, microbiology, behavior, growth biology, meat science and muscle biology, quantitative genetics and reproductive biology. Interdepartmental minor programs in cell and molecular biosciences, ecology and environmental sciences are also available.

The M.Ag. degree requires successful completion of a minimum of 30 credit hours, 21 of which must be in the agricultural or related sciences. Additional courses may be required for individual students.

Admission to the M.S. degree program requires that student have the bachelor’s degree or evidence satisfactory progress toward attainment of the bachelor’s degree in animal sciences or a related area. Applicants lacking suitable preparatory course work in the basic sciences will be required to correct deficiencies by satisfactorily completing additional courses. The M.S. requires a minimum of 30 credit hours of graduate work, including at least 21 credit hours in the major field of study. The remainder may be in a minor area selected by the student and upon approval by the advisory committee. A research-based thesis is required.

Admission to the Ph.D. degree program usually requires that the student have a master’s degree from a recognized graduate program. However, evidence of exemplary potential may be considered as a criterion for admission with a bachelor’s degree. The doctoral program emphasizes original, scholarly research and includes significant advanced course work. The Ph.D. degree requires a minimum of 60 credit hours beyond the bachelor’s degree and a dissertation describing original research. There is no foreign language requirement, but knowledge of a foreign language may be recommended by the student’s advisory committee.

All graduate students receiving departmental assistantships are expected to be engaged in service to the department’s research and education programs as deemed appropriate by the academic adviser and department head. All M.S. and Ph.D. students must register for at least one credit hour of thesis or dissertation research each term. Classified (FLSA-exempt) research associates holding full admission status in the Graduate School for work toward a graduate degree are exempt from this requirement, but must complete 10 hours of thesis research in a M.S. program or 20 hours of dissertation research in a Ph.D. program following completion of a master’s degree. A Ph.D. degree program undertaken by classified (FLSA-exempt) research associates but not preceded by a master’s degree must include 30 hours of dissertation research credit.

Agronomy and Soils - M.S., M.Ag., Ph.D.

Graduate training in this department enables outstanding students to achieve a high level of scholarly attainment in the soil, crop and environ-mental sciences. Within these broad areas, research training and experience may be gained in the specialized fields of soil fertility and plant nutrition; soil chemistry; soil genesis, morphology and classification; soil mineralogy; soil physics; soil microbiology; plant breeding and genetics; weed science; forage, fiber and grain crop production; crop ecology; environmental quality; and turf management.

There is no specific schedule of courses for graduate students in this department. Candidates for advanced degrees should have adequate training in basic sciences. The Graduate Studies Committee evaluates each student’s record and determines prerequisite deficiencies. Qualified students lacking prerequisite subjects can be admitted, but will be required to complete course work to satisfy deficiencies. After clearing pre-requisites, the course of study is determined by the student and advisory committee. Students are encouraged to take courses offered by other departments, especially those offered in chemistry, entomology, plant pathology, plant physiology, physics, botany, statistics, zoology, and horticulture.

There is no foreign language requirement.

Three degrees are offered: the Master of Science, earned only under the thesis option; the Master of Agriculture earned under the non-thesis option; and the Ph.D., which requires a dissertation. The department also participates in the interdisciplinary minor in environmental studies.

Graduate students in a program requiring a thesis or dissertation will register for at least one hour of AGRN 7990 or AGRN 8990 per semester. Research Associates and similar classifications who also are graduate students are exempt from this requirement but must complete 10 hours of 7990 in the master’s program or 20 hours of 8990 if in a Ph.D. program.
The Graduate School

Biological Sciences - M.S., Ph.D.
The Department of Biological Sciences offers graduate training leading to the M.S. and Ph.D. degrees in biological sciences; a non-thesis master's degree is optional. Candidates for advanced degrees should have an undergraduate degree in an appropriate area from an accredited institution, with adequate training in biology, chemistry, physics and mathematics. Qualified students lacking pre-requisite subjects can be admitted, after review by the departmental graduate affairs committee to make up the pre-requisites. A satisfactory score on the general GRE is required (suggested minimums of 500 on verbal and quantitative tests).

A major of at least 30 and 60 semester hours may be taken for the M.S. and Ph.D. degrees, respectively. M.S. and Ph.D. students must present at least one departmental seminar on their research during the semester of their oral or final examination. There is no foreign language requirement.

Interdisciplinary minors may be taken in biochemistry, cell/molecular biology, ecology, environmental studies and plant, animal, or microbial molecular biology.

Biosystems Engineering
Graduate study in the department of Biosystems Engineering may lead to the Master of Science or Doctor of Philosophy through cooperative relationships with other units at Auburn University. Depending on the area of research interest, the student may pursue an M.S. or Ph.D. degree in Chemical Engineering, Civil Engineering or Mechanical Engineering with an emphasis on a Biosystems Engineering problem. All applications are reviewed by graduate admissions committees in Biosystems Engineering and Chemical, Civil, or Mechanical Engineering. Applicants must meet admission requirements of the respective cooperating department (i.e. either Chemical, Civil, or Mechanical Engineering) and they must indicate at the time of application submission that they are interested in working on a Biosystems Engineering research problem. Students will be assigned an advisor in Biosystems Engineering that will serve as the co-chair of their supervisory committee. The student and committee co-chair will develop a supervisory committee composed of faculty from Biosystems Engineering and at least one faculty member from the cooperating department. The plan of study developed by the student in consultation with the supervisory committee will meet the requirements of the particular graduate program (i.e. Chemical, Civil, or Mechanical Engineering). In addition, it is expected that the plan of study will contain courses specifically focused on Biosystems Engineering and related to the research area. Additional details about the requirements, assistantships, and policies for graduate study in the Biosystems Engineering department are available on the web at www.eng.auburn.edu/bio.

Building Science – M.B.C.
The Department of Building Science currently offers two program tracks within the Master of Building Construction degree. The two tracks are: Construction and Design-Build.

The Department of Building Science's non-thesis Master of Building Construction program provides its students with an unparalleled educational experience, from conceptual idea to post-occupancy - a practical and industry-oriented study of the interdisciplinary and collaborative processes involved in the design, construction, financing, and management of the built environment.

For students holding an accredited undergraduate degree in construction, the curriculum consists of 35 semester hours of academic credit, including a core of BSCI graduate courses, taken over a period of three academic terms beginning in the Fall of each year.

Students with undergraduate degrees in other than construction will embark on their graduate careers here at Auburn beginning with a series of five foundation courses commencing the Summer term prior to Fall admission. Upon successful completion of these classes, their course of study will merge with the other graduate students during Fall semester, and may be completed in four academic terms, for a total of 50 hours.

Admission to the Construction track is competitive; enrollment is limited. The admissions committee considers GRE scores, undergraduate grade-point average, educational background, letters of recommendation, prior construction industry experience, and other relevant information.

The Department of Building Science’s Design-Build Masters track is geared toward students with diverse backgrounds. In this three-semester 35 credit hour program, students are expected to research, select, analyze, program, design and construct a comprehensive project. Teams of students will construct original designs within the supportive partnership of students, faculty, communities, local architects, and constructors. This program focuses on designing and building projects in the underserved population groups throughout the state of Alabama including: economically depressed communities, children at risk, the elderly, and the disabled or ill who face complex challenges that threaten their economic future, self-reliance, and quality of life.

Business Administration - M.B.A., M.S., Ph.D.
Graduate programs in Business are fully accredited by the Association to Advance Collegiate Schools of Business (AACSB) and include the Master of Business Administration, the Master of Accountancy, the Master of Management Information Systems, the Master of Science and the Doctor of Philosophy in Management.

Application for admission to graduate programs in business should be made directly to the Graduate School. The application should be accompanied by test scores on the Graduate Management Admission Test (GMAT), except for applications to the M.S. in Economics which should be accompanied by test scores on the Graduate Record Examinations (GRE). Supplemental application forms are also required for the M.B.A. program.

The M.B.A. is a broad managerial program that prepares students for positions of leadership in the competitive environment of public and private enterprises. It is an intensive program that is responsive to the changing business environment and is based on the six themes of leadership: quality, global perspective, entrepreneurial spirit, technology, and ethics and social responsibility.

The M.B.A. program consists of 36-42 credit hours. These include integrated core classes and electives, that allow students the flexibility to choose an area of concentration, some of which are Production/Operations Management, Management Information Systems, Finance, Marketing and Health Care Administration. Foundation course work, or the equivalent, is required in the areas of accounting, economics, finance, management, marketing, calculus and statistics. The program can be completed in three semesters and a summer of full-time study.

An M.B.A. degree can be earned: as a traditional, on-campus student; through the video-based outreach program; or through one of the Executive program options. The Video Outreach program has maximum flexibility. The Executive program includes several short campus residency periods, an international study trip and a lockstep, 21-month format. Electives are chosen to provide specialized options for physicians, senior general managers with at least eight years of full-time experience or younger technical managers with undergraduate degrees in engineering or computer science. The Outreach and Executive programs allow individuals working anywhere in the U.S. to complete their degrees while maintaining full-time employment.

Additional information and applications may be obtained by contacting the M.B.A. program office in Lowder 503, calling (334) 844-4060, or on the web at www.mba.business.auburn.edu

For programs in accountancy, economics, finance, management and marketing, see individual department listings.

Chemical Engineering - M.Ch.E., M.S., Ph.D.
The Chemical Engineering Department offers graduate programs leading to the degrees of Master of Science and Doctor of Philosophy. Specialized courses and research training are provided in a wide variety of specialties within chemical engineering or related interdisciplinary areas. Some of these specialties include: surface science, biochemical engineering, catalysis, pulp and paper engineering, environmental engineering, waste conversion, computer-aided process design and simulation, novel bioseparations systems, chemical kinetics and reactor design, biomedical engineering, process control and optimization, thermodynamics, advanced energy research, mass and energy transfer, electrochemical engineering, polymer engineering, interfacial phenomena, process synthesis, material science, nanotechnology, and space science. Additionally, individualized interdisciplinary programs
which cross the traditional departmental boundaries are encouraged. These may include collaborative work in chemistry, engineering disciplines, physics, mathematics, agriculture, forestry, biology, microbiology, genetics and health sciences or other areas.

The applicant must hold a bachelor's degree or its equivalent from an institution of recognized standing and must have the pre-requisite undergraduate experience in areas of study relevant to the proposed graduate program. If the applicant's undergraduate degree is other than chemical engineering, an individualized plan of study will be developed to impart the critical skills inherent in the bachelor's chemical engineering program. All applicants will be evaluated on an individual basis by the Chemical Engineering Graduate Committee.

The Master of Science degree may be earned only under the thesis option. There is no language requirement for this degree. A total of 30 semester hours of work is necessary, including formal courses, seminars and directed reading. Students select three of the following core courses: CHEM 7100, CHEM 7110, CHEM 7200 and CHEM 7250. Each student may include six hours of research and thesis as a part of the 30 hours.

The Master of Chemical Engineering, a non-thesis degree oriented toward engineering design and practice, is also offered. It has no residency requirement and can be earned entirely through the Engineering Outreach Program. The degree requires 32 semester hours with a minimum of 16 at the 7000 level. In-depth understanding is provided through a minimum of 21 graduate course hours in the major, chemical engineering, plus eleven graduate course hours in technical electives from engineering, science, mathematics, or business which are tailored individually to the student's background and interests. There are three core courses: CHEM 7100, CHEM 7200 and CHEM 7250.

The Doctor of Philosophy provides for advanced course work and emphasizes original, creative research. A dissertation embodying the results of this research represents the major portion of the requirements for this degree. A minimum of 60 semester hours of graduate work past the bachelor's degree is necessary. Each student may include 10 hours of research and dissertation as a part of the 60 hours.

Four calendar years beyond the bachelor's degree or three past the master's degree usually are needed to complete the Ph.D.

The written General Examination must be taken by those seeking a Ph.D. It is offered each year and students are encouraged to take it in their first year of graduate study. It consists of two parts: a written examination based on undergraduate course work, and a graduate course work evaluation based on CHEM 7100, CHEM 7110, CHEM 7200, and CHEM 7250.

There is no language requirement for the Ph.D.

Chemistry and Biochemistry - M.S., Ph.D.

Graduate study in chemistry leads to the M.S. and Ph.D. Degrees. Entering students must take four of the five required core courses: CHEM 7100, CHEM 7200, CHEM 7300, CHEM 7500 and BCHE 7200, with the consent of their adviser. By the end of the second semester, graduate students must submit a plan of study which details the courses which will be taken. This is done with the assistance of the major professor and with the consent of the student's advisory committee. For the M.S. the plan of study will consist of a minimum of 30 hours, including the core courses listed above (12 hours), CHEM 7990 (4 hours), CHEM 7750 (1 hour), CHEM 7950 (4 hours). For the Ph.D. 60 hours of courses must be completed. These must include the core courses listed above (12 hours), CHEM 8990 (10 hours), CHEM 7750 (2 hours), CHEM 7950 (16 hours). The rest of the courses usually are taken in the major area. Directed Study, CHEM 7930, may be taken for a maximum of 15 hours. M.S. students must pass three cumulative examinations; Ph.D. students must pass 6 cumulative exams and an oral general examination. All graduate students must orally present their research and defend their theses or dissertations in the final oral examination.

Civil Engineering - M.C.E., M.S., Ph.D.

The Department of Civil Engineering offers graduate-level instruction and research programs leading to the degrees of Master of Civil Engineering, Master of Science and Doctor of Philosophy. The objectives of these programs are to provide qualified students an opportunity for advanced training and specialization and to enable them to gain experience in conducting engineering research and in the interpretation and communication of their findings. The department offers programs in construction engineering and management, environmental engineering, geotechnical engineering, hydraulics/hydrology, pavements and materials, structural engineering and transportation engineering. Course work may be taken outside the department in supportive disciplines such as applied statistics, building science, computer science or mathematics, provided there is justification for doing so.

All applicants must have earned a baccalaureate degree in civil engineering - B.C.E., B.S. or B.S.C.E. - or a closely related area and must have completed such formal training as to warrant advanced study in the major and minor fields. There is no formal foreign language requirement.

A thesis is required of all candidates for the M.S. A minimum of 30 semester hours of graduate-level course credit must be completed satisfactorily. At least six of the 30 hours must be in CIVL 7990 and at least 24 hours must be in graduate course work other than CIVL 7990. Candidates must pass a comprehensive examination covering the course work, research and thesis.

Admission requirements for the Master of Civil Engineering are basically the same as those for the M.S. The program consists of a minimum of 30 semester hours of graduate-level courses. At least three of the 30 hours must be in CIVL 7980 and at least 27 hours must be in graduate course work other than CIVL 7980. Candidates must pass a comprehensive examination covering the course work and the engineering project involved.

Ph.D. program applicants must have earned the master's degree in civil engineering or a related area, or must have completed at least a year of study at the graduate level. Performance in either case must have been of such quality as to justify admission to the doctoral program.

The Ph.D. is conferred in recognition of mastery of a specific field of knowledge and a contribution to that engineering discipline through the doctoral dissertation. The degree is a research degree, requiring not only completion of certain technical requirements but proof of the candidate's ability to work independently within an engineering research environment.

A doctoral student must complete a written comprehensive examination with a follow-up oral critique administered by the student's advisory committee. The examination may not be taken sooner than one year after the student begins doctoral course work. Additional course work may be prescribed to strengthen deficiencies where examination results indicate a lack of significant academic preparation or the student may be denied the right to continue in the program. One retake may be permitted but no earlier than one year after initial failure. Upon successful completion of the examination, the student becomes a candidate for the Ph.D.

After successfully completing the comprehensive examination, the doctoral candidate will defend the selected dissertation topic, which must represent a significant contribution to state-of-the-art knowledge. This may be included in the oral critique of the comprehensive examination if the advisory committee agrees. Once the committee approves the research topic, the doctoral candidate may proceed with the research and dissertation. When it is completed, the candidate will defend the completed dissertation before the advisory committee and the outside reader appointed by the Graduate School.

Communication - M. A.

The graduate program offers the Master of Arts. Applicants must hold a bachelor's degree from accredited institutions. The M.A.-thesis requires 31 hours beyond the bachelor's degree, including a thesis. The M.A.-non-thesis requires 30 hours beyond the bachelor's degree, including appropriate field experience, but does not require a thesis. Students entering either program without a bachelor's degree in Communication must earn an additional 9 credit hours at the graduate level.

The Communication major requires 31 semester hours in Communication for the M.A.-thesis and 30 for the M.A. non-thesis, including COMM 7000, COMM 7010, and COMM 7020. Students must pass a written qualifying examination covering COMM 7000, COMM 7010, COMM 7020 at the completion of these three courses to continue their program. All students must pass comprehensive examinations.

There is no foreign language requirement.
Communication Disorders - M.C.D., M.S.
The Department of Communication Disorders offers a program in Speech-Language Pathology which is accredited by the Council on Academic Accreditation of the American Speech-Language-Hearing Association (ASHA).

Two degree options are available; neither has a language requirement. The Master of Science requires a minimum of 41 hours of graduate course work, including ITAS 7990, Thesis. The Master of Communication Disorders (M.C.D.) requires a minimum 43 hours of graduate course work and appropriate field experience. This is a non-thesis degree but it does require the passing of a comprehensive examination.

Master's-level candidates who enter the Communication Disorders programs having majored in another field at the undergraduate level must make up certain pre-requisites. This is to ensure an adequate background for the graduate-level courses and that the student will meet the academic requirements for ASHA certification and state licensure. Generally, 10 such courses are prescribed by the student's advisor.

Enough latitude exists that a plan of study may be designed according to the student's career interests; however, the curriculum planned must conform with academic and practicum requirements for ASHA certification and Alabama licensure. Students then are prepared for careers in school systems, clinics, hospital rehabilitation centers, physicians' offices, private practice and for pursuing the doctoral degree.

Community Planning - M.C.P.
Graduate study in the community planning program leads to the professionally accredited Master of Community Planning (MCP) degree. The program is devised to prepare students with diverse backgrounds for careers in the practice of community planning in both the public and private sectors. The field of community planning demands creativity, technical competence and procedural sensitivity in the search for better communities. Graduates must be skilled in describing and analyzing urban processes and conditions; creating and evaluating alternatives to shape future growth and development; and at devising and recommending appropriate mechanisms for the implementation of their proposals.

The program offers two tracks: urban design, a 49 credit hour program, and community development, a 46 credit hour program (for students with a design background). We are joint degree options available with architecture, landscape architecture and with public administration (each of which requires a separate application). Students may complete a minor in Economic Development. Entering students must hold a degree from an accredited institution and have acceptable GRE scores. Students will normally complete the required work in two academic years. Studies include a core sequence or required courses, required seminars on focused topics within the field, directed electives, and an individual synthesis project undertaken during the final year.

Computer Science and Software Engineering – M.Sw.E., M.S., Ph.D.
Graduate study in the Department of Computer Science and Software Engineering (COMP) leads to the non-thesis Master of Software Engineering degree (M.Sw.E) or research oriented Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in computer science and software engineering. All applications are reviewed by the COMP Graduate Admissions Committee.

To enter the M.S. or the M.Sw.E., the student must hold a bachelor's degree or its equivalent from an institution of recognized standing. The student also must have the pre-requisite undergraduate experience in areas of computer science and/or software engineering. If the student has deficiencies in the pre-requisites, he or she will be required to take appropriate undergraduate courses. All applicants must submit Graduate Record Examination scores for the general test.

The M.S. program requires 30 semester credit hours, including six credit hours for research and thesis. The M.Sw.E. program requires 33 semester credit hours, including three credit hours for the software engineering design project. There is no language requirement.

For the Ph.D. program, the applicant must hold a master's degree or have successfully completed a minimum of one academic year of graduate study, from an institution of recognized standing in an area related to the proposed doctoral study. All applicants must submit GRE scores for the general test. The student will take a written qualifying examination soon after gaining admission to the program. Additional examinations, as described in the general Graduate School requirements, are given throughout the program, culminating with the defense of the dissertation. There is no language requirement for the Ph.D. The program typically includes at least one academic year of course work and one year of research beyond the master's level. The Ph.D. program requires a minimum of 66 semester credit hours of course work beyond the bachelor's level, including 18 hours of research and dissertation.

Consumer Affairs - M.S., Ph.D.
Graduate study in the Department of Consumer Affairs, College of Human Sciences, leads to the Master of Science and the Doctor of Philosophy Degrees. Major focus areas are apparel, interiors, and textiles. The department emphasizes integration of basic and applied knowledge from multiple fields to enhance professional skills for careers in textile and apparel product development and design; production management; retail management; merchandising in textile and apparel retail or design firms, design of interior spaces; quality control; and college teaching and research. A foreign language is not required. Entrants with limited undergraduate backgrounds in their chosen area may need to complete some undergraduate courses. Graduate teaching and research assistantships are available.

The M.S. in Consumer Affairs - Apparel or Interiors offers a Thesis and a Non-Thesis Option. Individually designed focus areas incorporate courses in Consumer Affairs and other departments. Designated specialization tracks include consumer behavior; forecasting; marketing; production management; retail management; interior design; international retailing; design and product development; and entrepreneurship. Students are encouraged to complete an internship with industry. At least 21 semester hours must be in apparel, interiors, or consumer-related courses.

The Thesis Option requires a minimum of 30 semester hours, including at least four hours of CAHS 7990 Research and Thesis. Required courses include CAHS 7050, CAHS 7950, CAHS 7990 (2 hour minimum each semester during thesis research), a course in statistics at the graduate level, plus three hours outside the department.

The Non-thesis Option requires a minimum of 36 semester hours, including CAHS 7050, CAHS 7950, CAHS 7980, and a course in statistics at the graduate level plus three hours outside the department. A Final Comprehensive Written Exam is required.

The M.S. and the Ph.D. in Integrated Textile and Apparel Science are offered as joint degrees with the Department of Consumer Affairs, College of Human Sciences and the Department of Textile Engineering, Samuel Ginn College of Engineering. (See Interdepartmental Graduate Degrees.) Students may apply for admission and/or assistantships in either department. Graduate committees include faculty from both departments.

The M.S. in Integrated Textile and Apparel Science requires 30 or more semester hours of graduate courses. Thesis and Non-Thesis Options are available. This is a companion degree to the Ph.D. in Integrated Textile and Apparel Science.

The Ph.D. requires a minimum of 60 semester hours of graduate courses including a minimum of 10 semester HOURS of ITAS 8990 Research and Dissertation. After completion of the integrated core courses, students choose either a textiles track, an apparel track, or an integrated track. Integrated, team taught core classes (ITAS 7200, ITAS 8950, ITAS 8960, and ITAS 8970) are required. A minimum of 12-14 additional hours in textiles, apparel, or consumer-related courses are required.

Master's, specialist and doctoral degrees are offered in the Department of Counselor Education, Counseling Psychology, and School Psychology. Areas of specialization are in school counseling, school psychology, community agency counseling, counselor education and counseling psychology.

Master's degree programs prepare students for entry-level professional positions as counselors in a variety of human service agencies.
such as public schools, community mental health centers, drug and alcohol treatment programs and university counseling centers. The specialist and doctoral degree programs provide advanced preparation in the delivery of counseling and psychological services and prepare students for supervisory and leadership roles in schools, universities, and human service agencies. The doctoral programs also require that students demonstrate skills in independently conducting research through the dissertation.

Following completion of course work, students in all programs must pass a comprehensive written and/or oral examination covering all program content. All departmental programs require extensive extramural internships in placements related to the area of professional preparation.

The master's degree programs in school counseling and community agency counseling are accredited by the Council for the Accreditation of Counseling and Related Educational Programs (CACREP). The doctoral degree program in counselor education is accredited by CACREP. The master's and specialist degree programs in school psychology and school counseling are approved by the Alabama State Department of Education and by the National Council on Accreditation of Teacher Education (NCATE). The Counseling Psychology program, accredited by the American Psychological Association, is a doctoral program culminating in the Ph.D. degree.

To be considered for admission into any of the department’s programs, an applicant must submit application materials directly to the Graduate School. Concurrently, applicants submit an application supplement to the department. Provided that general Graduate School admission requirements are met, the department admissions committee considers all submitted materials and determines whether to issue an invitation for an admissions interview. All admissions decisions to doctoral programs in the department occur in the spring semester. Application materials for doctoral studies in counseling psychology should be received by the department by Jan. 15. Feb. 1 is the application deadline for counselor education and school psychology doctoral programs.

Admissions decisions for master’s and specialist degrees occur in the spring semester for applicants who will begin their studies in the fall. Completed applications for fall admissions to master’s and specialist programs have a March 1 deadline. The department does not make admissions decisions for spring or summer terms.

Applicants are advised that, for some of the programs, the faculty typically prefer GRE scores which exceed the minimum set by the Graduate School. Moreover, credit hour requirements for master’s degree programs in the department exceed the Graduate School minimum. Similarly, the Graduate School requirements for the Ph.D. and Ed.D. degrees are typically exceeded by doctoral programs in the department. More specific details about the requirements, assistantships and policies for each of the programs are contained in materials available from the department and on the web at www.auburn.edu/coun.

Graduation requirements for the master’s degree in School Counseling and specialist degree in School Psychology include a passing score on the Alabama Prospective Teacher Testing Program’s appropriate Praxis II subject assessment.

Curriculum and Teaching - M.Ed., M.S., Ed.S., Ed.D., Ph.D

Graduate programs in the Department of Curriculum and Teaching prepare teachers and leaders in early childhood, elementary, middle school, secondary, English as a second language, music, reading, and career and technical education. Secondary education teaching fields are approved by the Alabama State Department of Education. All Ph.D. programs require at least 80 semester hours beyond the master’s degree, including additional course work in professional education and the teaching field. Candidates must also complete a field project. Doctor of Philosophy programs are offered in early childhood, elementary, secondary English language arts, secondary mathematics, secondary science, secondary social science, music, and reading education. A Doctor of Education program is offered in career and technical education. All Ph.D. programs require at least 80 semester hours beyond the bachelor’s degree; the Ed.D. program in career and technical education requires at least 60 semester hours beyond the bachelor’s degree. Research methods and statistics and foundations of education courses are components of all doctoral programs. The remaining hours are divided between the area of specialization and approved support courses. Plans of study for students in secondary education fields must contain at least 30 semester hours of graduate courses in the appropriate teaching fields. Doctoral students must register for at least 10 semester hours of doctoral research while completing a dissertation.

Economics - M.S.

Graduate study in economics leads to the M.S. degree. The graduate program prepares students for careers in business, teaching, government agencies and advanced study in economics at doctorate-granting institutions. The program permits flexibility to accommodate a range of student goals and concentration in specific areas of economics. Applicants must hold a bachelor’s degree or its equivalent from a recognized institution and present a minimum of 30 semester hours of undergraduate course work in economics, including Principles of Economics, Statistics and Intermediate Economic Theory. Students lacking pre-requisite courses may be required to take more than the 30 hours required for the M.S. degree. All applicants must submit Graduate
Record Examinations scores. Admission to graduate work in Economics shall be determined by the department’s Graduate Committee.

The candidate for a Master of Science may select either a thesis or non-thesis option. Students choosing the thesis option are required to complete at least 24 semester hours of course work in economics at the 6000-level or above, plus 6 hours of ECON 7998, Research and Thesis, plus the thesis. An oral defense of the thesis is required. There is no language requirement for the M.S. The non-thesis option, participation in which must be approved by the Graduate Committee, requires 24 hours of course work in economics at the 6000-level or above, and additional 6 hours of course work in economics at the 6000-level or above, and passing grades on written comprehensive examinations in Microeconomic Theory, Macroeconomic Theory, and Econometrics.

Those seeking full admission to graduate programs in the Department of Educational Foundations, Leadership and Technology must have a bachelor’s or master’s degree from an accredited college or university and must submit Graduate Record Examination scores for verbal, quantitative, and writing subtests. Students who hold master’s degrees and a level teaching certification from accredited institutions and have an undergraduate grade-point average of at least 2.75 may enroll for course work leading to certification.

The department offers degrees at the master’s level in the areas of Adult Education, Library Media, Administration of Elementary and Secondary Education, Administration of Higher Education, and Administration of Supervision and Curriculum. Specialist degrees are also available in Adult Education, Library Media, and Administration of Elementary and Secondary Education. The department offers a Doctor of Education (Ed. D.) in the areas of Adult Education, Administration of Elementary and Secondary Education, Administration of Higher Education, and Administration of Supervision and Curriculum. A Doctor of Philosophy (Ph.D.) option is offered in Educational Psychology with two specializations or emphases from which a candidate may choose: learning and measurement/research.

Masters degree programs require a minimum of 30-33 semester hours, including course work in foundations of education, electives (3-6 hours) and the area of specialization, including a practicum or internship. Graduation requirements for master’s programs in Library Media and Administration of Elementary and Secondary Schools with Educational Administration certification include a passing score on the Alabama Prospective Teacher Testing Program’s appropriate Praxis II subject assessment.

Sixth-year programs may result in Alabama AA certification. They require a minimum of 30 hours beyond the master’s degree, including EDLD 8940 – Directed Field Experiences, ADED 8980 – Field Project, or EDM 7940 – Directed Field Experience. Specialists in Education degrees are not required to complete Alabama AA certification, however, the Ed.D. degree requirements for the Administration of Elementary and Secondary Education and the requirements for Library Media are the same as the Alabama AA certification programs in each area respectively.

Doctoral programs leading to the Ed.D. degree consist of no fewer than 90 semester hours beyond the bachelor’s degree. That is, doctoral students in educational leadership or adult education will complete 18 to 24 semester hours in their area of specialization; requirements vary depending upon the area of specialization. The Ph.D. program requirements may vary. Research methods, statistics, and foundations of education are components of all Ed.D. and Ph.D. programs. After coursework has been completed, doctoral students must register for at least 10 hours of dissertation credit while completing a dissertation.

Electrical and Computer Engineering—M.E.E., M.S., Ph.D.

Electrical and Computer Engineering (ECE) offers graduate programs of instruction and research leading to master’s and doctoral degrees. Instruction is offered and research facilities are available to support graduate study in control systems, digital signal processing and communications, wireless engineering, electromagnetics modeling and analysis, microelectronics, power systems, digital systems, and computer engineering. Additionally, individualized programs that cross the traditional boundaries of engineering, mathematics and the sciences can be accommodated.

For admission at the master’s level, the applicant must hold a bachelor’s degree or its equivalent from an institution of recognized standing. Master’s degree programs are available to graduates of engineering curricula and, in cases of exceptional academic credentials, to graduates of mathematics and science curricula.

An applicant for admission to the Ph.D. program must hold a master’s degree, or have taken a minimum of one academic year of graduate study, from an institution of recognized standing in an area of study related to the proposed doctoral work.

All applicants must submit Graduate Record Examination scores for the General Test, three recommendation letters, a statement of purpose, and a resume. International applicants must also submit scores for either the TOEFL or IELTS exam.

Applications for admission are reviewed by the departmental graduate faculty. Decisions are based upon the applicant’s potential for success in advanced-level study as indicated by letters of reference, GRE scores and previous academic achievement.

The M.S. degree program of study (the thesis option) requires a minimum of 30 semester hours of work, including 4 to 6 semester hours of research and thesis. M.S. students must spend at least one semester of full-time study in residence. The M.E.E. degree program (the non-thesis option) requires 33 semester hours of work, including a 3 semester hour project. Both masters programs must include courses in at least three of the major research areas in ECE, no more than 3 semester hours of independent study, and a final examination on either the thesis or the non-thesis project.

Students admitted to the doctoral program will take a written qualifying examination soon after entering, covering fundamental undergraduate material in ECE and first-year graduate material in the major area of study. Additional examinations are given throughout the program. The program generally consists of a minimum of 60 semester hours of course work beyond the bachelor’s degree, including at least 10 hours of research and dissertation. A minor of at least 9 semester hours in a closely related field outside of the major area of study, either within or outside of ECE, is required.

English—M.A., M.T.P.C., Ph.D.

The Department of English offers programs leading to the Master of Arts, Master of Technical and Professional Communication, and the Doctor of Philosophy. The graduate program prepares students for careers in teaching and research, writing, editing, business, and other professions seeking broadly educated individuals skilled in analysis and communication. (In addition, individuals holding a teaching certificate may, with an additional graduate course in Communication, earn Alabama Class A or AA certification under a state-approved Strengthened Subject Matter Option program in English/Language Arts.)

For admission to the M.A. program, the student must normally have a bachelor’s degree from an accredited institution with the equivalent of 24 semester hours of credit in upper-division English courses and satisfactory scores on the general portion of the GRE. Qualified applicants with undergraduate degrees in related disciplines will also be considered. Applicants should also submit three letters of recommendation, a sample of their writing and a statement of purpose. Applicants lacking the required undergraduate courses must typically make up these deficiencies before they can be admitted to the degree program. For the M.A., students may select a thesis or non-thesis option. The thesis-option requires a minimum of 30 credit hours, including at least four hours of thesis credit. The non-thesis option requires a minimum of 30 credit hours of course work. With the approval of their advisory committee, students in either option may take up to six hours in a minor field. Special concentrations are possible in creative writing (with a creative thesis in poetry or fiction) and in rhetoric and composition. Students must take a four and one-half- or six-hour written examination over a departmental reading list. Thesis-option students also take a one-hour oral examination over the completed thesis. Students in master’s options must demonstrate a reading knowledge of one foreign language.

For admission to the Master of Technical and Professional Communication program, the student must normally have a bachelor’s degree from an accredited institution, satisfactory scores on the general portion of the GRE, and excellent writing skills. The M.T.P.C. requires
a minimum of 30 credit hours, consisting of four required courses (ENGL 6000 Technical and Professional Editing, ENGL 6010 Document Designin Technical and Professional Communication, ENGL 6030 Topics in Technical and Professional Communication, and ENGL 7010 Technical and Professional Communication: Issues and Approaches), nine hours of elective courses in English approved by the student's advisory committee, and nine hours of a coordinated minor approved by the student's advisory committee. Students must compile a portfolio of work accepted by the student's advisory committee and pass an oral examination over the major and minor.

For admission to the Ph.D. program, the student must normally have a master's degree in English and satisfactory scores on both the general portion of the GRE and the subject test. Applicants should also submit three letters of recommendation, a sample of their scholarly writing and a statement of purpose. The Ph.D. requires a minimum of 60 credit hours beyond the M.S., including 10 hours of dissertation credit. Students with an M.A. in English from other institutions usually need only eight or nine additional courses. After completing course work, students take general doctoral examinations, both written and oral, over three related areas. These areas might include historical periods, a genre, a major author, language and linguistics, or a problem in literary theory, British or American literature. There are no required courses or area distribution requirements; however, students should be able to demonstrate a broad knowledge of English studies at their examinations. After passing these examinations, students write and defend a dissertation. Doctoral students must demonstrate a reading knowledge of two foreign languages or advanced proficiency in one foreign language.

The department offers financial aid in two forms, fellowships and assistantships. Graduate Teaching Assistantships are generally available for the most qualified students. The typical teaching appointment is just under half-time. Assistantships are renewable, provided that students teach satisfactorily and make adequate progress toward the degree. A few outstanding applicants also receive first-year fellowships. Review of applications for financial aid will begin on Jan. 15.

**Entomology - M.S., M.Ag., Ph.D.**

Graduate Degree Program study in entomology emphasizes basic and applied aspects of the science of entomology and leads to the degrees of Master of Science, Master of Agriculture and Doctor of Philosophy. Admission is based primarily on a combination of grade-point average and Graduate Record Examination scores. The graduate program prepares students for careers in teaching, research and extension with a variety of academic, governmental, state, private and industrial opportunities.

Master of Science (M.S.) For a major in entomology at the M.S. level, the student should have a baccalaureate degree from a recognized institution with prerequisites in biology, chemistry, mathematics, and English. Qualified students lacking mandatory courses may be admitted but will be required by the student's advisory committee to make up the deficiencies.

The M.S. program in entomology is available to qualified undergraduates who wish to pursue a master's level program that requires a thesis. Importance is placed on both classroom and research training. Students holding baccalaureate degrees in agriculture or the biological sciences may find this degree program helpful to their professional development and career goals. The educational goals and objectives of the M.S. degree program are to produce graduates who are fundamentally trained in the scientific principles and general knowledge of entomology and related sciences and who are able to apply these principles successfully to solve problems of a scientific nature. The Ph.D. program requires a minimum of 32 semester hours, 21 of which must be in entomology, including 14 core semester hours (ENTM 6200, Insect Physiology; ENTM 6440, Insect Morphology; and ENTM 6300, Systematic Entomology) and related courses with the remainder taken from a variety of subject areas determined in consultation with the student's advisory committee. A comprehensive examination is required after all courses are completed. There is no language requirement for the M. Ag. degree.

Doctor of Philosophy (Ph.D.). The purpose of the Ph.D. program in entomology is to produce graduates who are fundamentally trained in the scientific principles and general knowledge of entomology and related sciences and who are able to employ this knowledge at an advanced level of study and/or apply these principles successfully to solve problems of an entomological nature. The Ph.D. program requires 61 semester hours of course work, including 14 core semester hours (ENTM 6200, Insect Physiology; ENTM 6440, Insect Morphology; and ENTM 6300, Systematic Entomology), ENTM 8950 (Seminar), and a dissertation based on the student's original research. A graduate-level course in statistics is also required. Of the 61 semester hours, 30 must be graded (e.g., A, B, C) grades. Thirteen core courses (ENTM 6200 and above, 20 of which are required in the classification at Auburn University while registered in the Ph.D. program. A doctoral student must also complete 30 hours of additional course work (may include ungraded courses and 7990, 8990). There is no language requirement for the Ph.D. degree.

**Finance – M.S.B.A.**

The M.S.B.A. program offers specialized training to graduate students desiring a more intense background in the field relative to the general preparation provided by an M.B.A. The objective of the program is to prepare students for careers in their chosen profession or for further graduate work. The program has a thesis and non-thesis option (the non-thesis option requires additional course work). The program of study is determined by the student and the student's academic committee based on the student's background and areas of interest.

Fisheries and Allied Aquacultures - M.Aq., M.S., Ph.D.

Graduate study in the Department of Fisheries and Allied Aquacultures leads to the degrees of Master of Aquaculture, Master of Science and Doctor of Philosophy. The program prepares students for productive careers in the private and public sectors in aquaculture, aquatic ecology, and fisheries biology and management.

Students desiring admission for graduate study should have a degree from a recognized institution and should have adequate course work background in biology, zoology, chemistry, physics, mathematics, and statistics. Qualified students lacking an adequate background in these areas may be admitted but may be required to correct deficiencies after they enroll at Auburn.

The non-thesis Master of Aquaculture degree is offered to students seeking broad practical training and preparing for a career in aquaculture management. The degree requires successful completion of a minimum of 39 semester credit hours which includes a 3 to 6-month internship. A minimum of 9 credits must be taken from other departments, 6 of which are required in business-related courses.

The Master of Science degree combines classroom study and an introduction to scientific research. A minimum of 30 semester credit hours of course work beyond a bachelor's degree and a thesis are required. At least 9 hours must be taken from other departments.

Admission to the Doctor of Philosophy degree program usually requires that the student have a master's degree from a recognized graduate program. The doctoral program emphasizes original, scholarly research and includes significant advanced course work. The Ph.D. degree requires a minimum of 60 semester credit hours beyond the bachelor's degree and a dissertation describing original research. A minimum of 30 hours must be graded graduate courses (7000-level and above), of which 20 must be taken at Auburn University.

All graduate students are expected to be engaged in service to the department's research and education programs as deemed appropriate.
by the academic adviser and department head. All students receiving departmental assistantships must be registered as full-time students each semester, and all M.S. and Ph.D. students must be registered for at least one credit hour of thesis and dissertation research each semester.

Forestry - M.N.R., M.S., Ph.D.

Graduate study in forestry leads to Master of Natural Resources (M.N.R.), Master of Science (M.S.), and Doctor of Philosophy (Ph.D.) degrees. Three M.N.R. options are available. One, for students with undergraduate degrees in forestry, involves primarily advanced course work and can be completed in one year. A second M.N.R. option is for individuals with baccalaureate degrees in fields other than forestry that are interested in becoming Registered Foresters in Alabama. This option is a two-year program which begins with a 10 week Summer Field Practicum. The third M.N.R. option is for individuals with a biologically related baccalaureate degree that are interested in careers in the management and policy making for our natural resources. This option can be completed in 3-4 semesters depending upon coursework selected. The M.S. program, which involves research and a thesis, and normally requires two years for completion, can be tailored for students with degrees in forestry, the biological sciences, physical sciences, economics, engineering and business. Outstanding M.S. students, particularly those interested in careers emphasizing research, education, and scholarship, often study for the Ph.D. M.S. and Ph.D. degrees are offered in the fields of forest biology and ecology, forest measurements, forest management/economics, timber harvesting/forest operations and forest products. A Ph.D. in economics is also offered through the interdepartmental program in economics which is administered jointly by the Department of Agricultural Economics and Rural Sociology and the School of Forestry and Wildlife Sciences. An urban forestry minor, administered in cooperation with the Department of Horticulture, is available for M.N.R., M.S., and Ph.D. degrees.

In addition to meeting admission requirements of the Graduate School, applicants are evaluated and recommended for admission by the graduate faculty of the School of Forestry and Wildlife Sciences on the basis of a holistic examination of their scores on the Graduate Record Examination (GRE), their previous academic record, experience, and recommendations. While the following are not absolutes, the faculty generally expect a minimum grade-point average of 3.0 in previous academic course work and minimum scores of 450 on the verbal and 550 on the quantitative element of the GRE. Applicants not holding a B.S. in forestry may be required to take necessary background courses. These needs are determined by the student’s advisory committee and approved by the dean with due consideration for the student’s previous training and experience. There is no foreign language requirement for any of the graduate degrees.

The M.N.R. option for students with an undergraduate degree in forestry requires a minimum of 36 semester hours of graduate courses. The M.N.R. option for students with a baccalaureate degree other than forestry and interested in becoming Registered Foresters requires a minimum of 70 semester hours (34 hours of specified undergraduate course work plus 36 hours of graduate course work). The M.N.R. option for students with a biological baccalaureate requires a minimum of 36 semester hours of graduate courses. Requirements for all three M.N.R. options include a M.N.R. paper (FORY 7980), Seminar (FORY7950), and assist with one course during their degree in Practicum for College Teaching (FORY7910).

The M.S. degree program requires a minimum of 30 hours beyond the bachelor degree at the graduate level, 21 hours of which must be in the major. A minimum of 4 but not more than 6 hours in Research and Thesis (FORY7990) is required. All M.S. students are required to take Research Methods (FORY7510), Seminar (FORY7950), and assist with one course during their degree in Practicum for College Teaching (FORY7910). A research proposal and thesis based on original research are major components of the M.S. degree.

The Ph.D. degree requires 60 semester hours beyond the bachelor degree. There must be a minimum of 36 semester hours in graded coursework at the 7000 level or above. Of the remaining 24 semester hours, 10 hours must be Research and Dissertation (FORY8990) and 14 hours of 6000 level or above. While some these 60 hours can be from previous graduate work, such as a M.S. degree, a minimum of 18 hours of graded coursework at the 7000 level or above must be completed at Auburn. All Ph.D. students are required to take Research Methods (FORY7510), Seminar (FORY7950), and assist one course during their degree in Practicum for College Teaching (FORY7910). A research proposal and dissertation based on original research are required as major components of the Ph.D. degree program.

Additional information on forestry graduate programs and degree requirements can be found on the school’s Web site at www.safs.auburn.edu/graduate.

French - M.Ed., Ed.S.

Graduate studies in French are available through the master’s and specialist degree options offered by the Department of Curriculum and Teaching in the College of Education. Four options include the traditional M.Ed., the traditional M.S., the Alternative M.Ed., and the Ed.S. Requirements for admission and description of degree program of studies are detailed among graduate offerings of the Department of Curriculum and Teaching.

Geology - M.S.

Graduate study in Geology leads to the Master of Science degree. The graduate program is oriented toward providing a sound practical background in preparation for employment in industry or government service or further academic pursuits. The curriculum provides broad training in geology with the opportunity for specialization through electives, directed studies, and thesis or capstone research.

Admission into the master’s program requires a bachelor’s degree in geology (or related Earth science discipline) from an accredited institution with 40 semester hours in geology, an acceptable undergraduate grade-point average, satisfactory scores on the Graduate Record Examination general test, and three letters of recommendation. Undergraduate course deficiencies may be made up during the student’s first year in the degree program.

The thesis option M.S. degree in geology requires a minimum of 30 semester hours and completion of a thesis. The 30 hours include: 21 hours of graduate-level geology courses (including GEOL 7100 - Geocommunication); 3-5 hours of approved 6000- or 7000-level geology or supportive electives (no more than 3 hours of which can be GEOL 7930 - Directed Study); and 4-6 hours of thesis. Students electing the non-thesis option must complete a minimum of 40 semester hours and a capstone project. The 40 hours include: 36 hours of graduate-level geology courses (including GEOL 7100 - Geocommunication); and 4 hrs of approved 6000- or 7000-level geology or approved electives, all or a portion of which may be GEOL 7930-Directed Study or GEOL 7980-Independent Study project. Both degree options require (1) satisfactory completion of a summer field course or comparable field experience prior to beginning the second year of residence and (2) demonstrated working knowledge of a computer language or computer-based geographic information system (G.I.S.) before graduation.

Health and Human Performance - M.Ed., M.S., Ed.S., Ed.D., Ph.D.

Graduate study in the Department of Health and Human Performance leads to the degrees of Master of Education (M.Ed.), Master of Science (M.S.), Specialist in Education (Ed.S.), Doctor of Education (Ed.D.) and Doctor of Philosophy (Ph.D.). The advanced programs prepare students for careers in teaching and research in educational settings, program management in clinical and corporate fitness settings, sport conditioning and management, and movement, fitness, and sport-related industry.

For a major in Health and Human Performance at the master's level, the student must have a bachelor's degree from an accredited institution and satisfactory Graduate Record Examination scores. Applicants without appropriate undergraduate degree preparation and course requirements may be asked to register in an appropriate undergraduate program before admission to the degree program or may be required to complete specific undergraduate courses prior to degree completion. Areas of specialization for the master’s program include athletic training, biomechanics, exercise physiology, health promotion, motor development, motor learning, sport and exercise psychology, and pedagogy.

Alternative master's certification programs offer qualified students who hold non-teaching baccalaureate degrees a route to initial teacher certification while simultaneously earning a master's degree. This alter-
native route to certification is offered in physical education. Candidates in the alternative master's program are required to participate in the Alabama Prospective Teacher Testing Program including submitting a passing score on the Basic Skills assessments for admission to the program and a passing score on the appropriate Praxis II subject assessment prior to internship.

Graduate students interested in completing a minor in Sports Management must complete one course in the following areas: sports studies, sports management, educational leadership and practicum. Six hours beyond the degree requirements are required for the sport management minor.

The Ed.S. degree is a terminal degree and students interested in doctoral study should not enter this program. The master's degree, satisfactory GRE scores, a statement of goals and references, and a strong academic record are requirements.

The Ed.D. degree program requires a master's degree, satisfactory GRE scores, a statement of goals and references. Candidates must demonstrate competency in general foundations of education and research with a specialization in teaching and learning in physical education.

Requirements for the Ph.D. program include the master's degree, satisfactory GRE scores, a statement of goals and references. Areas include biomechanics, exercise physiology and motor behavior.

History - M.A., Ph.D.
Graduate study in History leads to the degrees of Master of Arts and Doctor of Philosophy. The graduate program prepares students for careers in teaching, business, government and research.

For admission to the M.A. program, the student must have a bachelor's degree from an accredited institution with 27 semester hours of history and a satisfactory GRE score. Applicants lacking course requirements must make up deficiencies before or after admission to the degree program. The M.A. requires a minimum of 31 hours (of which 21 must be in seminar courses, including HIST 7700) and a thesis. The M.A. program offers a specialization in archival studies, including practical training. The M.A. degree (non-thesis) is awarded to students in the doctoral program who have not previously earned the master's upon passing the General Examination for admission to candidacy for the Ph.D.

For admission to the Ph.D. program, the bachelor's degree with 27 semester hours of history and a satisfactory GRE score are required. The program requires a minimum of 65 semester hours beyond the bachelor's degree (of which 43 must be at the 7000 or 8000 level exclusive of thesis or dissertation credit), including HIST 8700, 8710 and a dissertation. Candidates must demonstrate excellence in their major field of history and competence in two minor fields of history on their general examinations. In addition, students must take a minimum of 6 hours of course work outside their major and minor fields, the six may be taken in a discipline other than history. Major fields in history include (1) United States and British Empire (2) United States since 1865 (3) Europe 1500-1815 (4) Europe since 1789 (5) History of Technology. Latin American and World History are offered as minor fields. A specialization in archival studies is also offered for graduate students who wish to prepare for careers in public history as professional archivists.

There is no language requirement for the master's degree. The Ph.D. requires a reading knowledge of at least one foreign language as determined by the student's doctoral committee. Language competency should be demonstrated before the student begins the second year of the doctoral program.

Horticulture - M.S., M.Ag., Ph.D.
Graduate study in Horticulture is directed toward the Master of Science and Doctor of Philosophy degrees. Graduates are prepared for careers in teaching, research, business, production, public service or extension. Master's level programs are available to students with undergraduate degrees in horticulture and those from other fields seeking opportunities in horticulture-related careers. For the M.S. program, students must have a bachelor's degree in horticulture or a related area from an accredited university and have satisfactory GRE scores. Applicants from related areas will be required to correct any undergraduate course deficiencies. The M.S. requires a minimum of 30 credit hours of graduate work, including at least 21 credit hours in the major field of study. The student's plan of study is individually tailored by the student, major professor and advisory committee to meet the student's career goals. A thesis based on research by the student is required.

The Master of Agriculture is a non-thesis option which requires successful completion of 32 credit hours, 21 of which must be in agricultural sciences. Additional courses may be required for individual students and are determined by the major professor and advisory committee. There is no specific schedule of courses for M.S. or M.Ag. students or a foreign language requirement for any graduate students in horticulture.

Graduate students in a program requiring a thesis or dissertation will register for at least one hour of HORT 7990 or 8990 respectively, per semester. Doctoral candidates must follow all Graduate School and departmental requirements concerning course work. However, the advisory committee may require additional course work. The doctoral program emphasizes original and creative research with a required dissertation.

Human Development and Family Studies - M.S., Ph.D.
The Department of Human Development and Family Studies offers graduate instruction leading to the Master of Science degree with concentrations in child development, family relations and marriage and family therapy; and the Doctor of Philosophy with a focus on interpersonal competence and relationship dynamics within the context of the family. The Department emphasizes the integration of knowledge from various fields for the purpose of understanding and developing professional skills for careers in college or university teaching and research, teaching and supervision in programs for young children, parent education, marriage and family therapy, community service, Cooperative Extension, government, business and industry. To promote training and research, the Department operates the Auburn University Early Learning Center, Harris Early Learning Center of Birmingham and the Center for Marriage and Family Therapy. The marriage and family therapy option is accredited by the American Association for Marriage and Family Therapy Commission on Accreditation for Marriage and Family Therapy Education. Both the Auburn University Early Learning Center and Harris Early Learning Center of Birmingham are accredited by the National Academy of Early Childhood Programs, a division of the National Association for the Education of Young Children.

For admission, a background in the social and behavioral sciences is highly desirable and should include course work in human development, family relations, anthropology, sociology, psychology and statistics. Students without adequate preparation in these areas may be accepted upon the condition that they register for any additional courses deemed necessary by the department's graduate advisory committee. There is no language requirement for the M.S. or Ph.D. degrees.

The M.S. requires a minimum of 30 semester hours in the child development and family studies concentrations and 50 semester hours in the marriage and family therapy concentration, a thesis, and other fundamental work. See http://www.humsci.auburn.edu/publish.php?id=19 for specific requirements in these concentrations. Students interested in completing the three-semester Marriage and Family Therapy Internship are required to take and pass a clinical qualifying examination.

The Ph.D. program requires a minimum of 30 credit hours beyond the M.S., including HDFS 8010, 8020, 8040, 8050, 8060, and 13 hours of supporting courses. This program requires course work with a theoretical and substantive emphasis in family and child relationships, a supporting emphasis that provide a multidisciplinary understanding of children and families, a research and statistics component, and an empirical dissertation.

Graduate research may focus on relationship studies at any stage of the life cycle, including parent-child, family, marital, non-marital, peer, friendship, family-child care-work and mentor-protege. Graduate assistants are available to students who have achieved superior rank in their previous academic work.

Industrial Design - M.I.D.
The department offers the graduate Master of Industrial Design accredited by the National Association of Schools of Art and Design (NASAD). The applicant must have a bachelor's degree in industrial design or its equivalent from an institution of recognized standing. Applicants with baccalaureate degrees from other disciplines may be admitted to the graduate program under condition that a minimum of
43 post baccalaureate credit hours in industrial design be completed at the undergraduate level with a 3.0 grade-point average. Students without an undergraduate Industrial Design degree are admitted during the summer semester.

Upon admission to the master's program successful completion of 35 graduate level credit hours, including a thesis is required. A 40 credit hour non-thesis option is available. Credit for INDI 7990 may not exceed six hours. The curriculum may be structured to accommodate the student’s area of interest. In certain cases, additional course work beyond the minimum may be required. There is no language requirement. A 12 credit graduate-level core curriculum and terminal document draft review are required. Students are admitted only in the summer and fall semesters. Applications to the graduate program must be complete by April 1.

Industrial and Systems Engineering — M.I.S.E., M.I.S.E./M.B.A., M.S., Ph.D.

The department offers the Master of Industrial and Systems Engineering, a joint program leading to both M.I.S.E and M.B.A. degrees, the Master of Science and the Doctor of Philosophy. These programs are for students with undergraduate degrees in industrial engineering, other engineering disciplines, mathematics and sciences. All applicants must submit Graduate Record Examination scores except M.I.S.E./M.B.A. applicants who may instead submit Graduate Management Admission Test scores. Both the M.I.S.E. and M.S. programs require 30 hours of course work. The M.I.S.E. is oriented toward professional practice. M.I.S.E. students must take 18 semester hours from a set of core courses, a three-hour design project and 9 hours in electives. The M.S. requires the same 18 hours of core courses, six hours of electives and a six-hour thesis.

The M.I.S.E./M.B.A. is a 54-hour program administered jointly by ISE and the MBA program. It consists of 18 hours of ISE core courses, 18 hours of MBA core courses, and a 3-hour project jointly supervised by ISE and MBA faculty. The remainder consists of 15 hours of electives if the student has more than two years work experience, or a 6-hour summer internship or international experience and 9 hours of electives otherwise. Students must apply separately to each program (M.I.S.E. and M.B.A.)

Research involvement is the dominant element in the doctoral program. It provides a quality educational experience for selected individuals whose records indicate excellent potential not only for superior performance in course work, but also for the research and ensuing dissertation which is an original and scholarly contribution to the field. The Ph.D. program requires at least 60 semester hours of coursework beyond the bachelor’s, including 18 semester hours of core courses. The student must demonstrate a high level of proficiency in a specific area of industrial and systems engineering as well as a competence in the entire field. The degree usually requires at least one calendar year of research.

Landscape Architecture – M.L.A.

Graduate study in Landscape Architecture leads to the graduate degree of Master of Landscape Architecture (MLA). The MLA consists of 54 semester hours for those students entering with a design baccalaureate and 96 semester hours for students entering with a non-design baccalaureate.

The program is a research, studio design-based course of study that incorporates learning across disciplines of art, architecture, urban design, ecology, information technology, and the natural sciences. Extending the regional agrarian context through the relationships between human dwelling and natural systems, the graduate will be prepared to take action in rebuilding human communities, reconnecting fractured ecosystems, and regenerating diverse habitats. Students, in their final year of study, are required to engage in an individual design and research option between the MLA, Bachelor of Architecture degree and the Master of Community Planning are facilitated by a joint thesis option.

To enter the program, a student must have an undergraduate degree, meet the requirements for admission to the Graduate School and complete a statement that describes the candidate's personal interest and professional goals. Applications to the MLA with a design degree must submit a portfolio of work illustrating their design capabilities. All applicants must submit GRE scores before enrolling in 6000/7000 level classes.

Management - M.S.B.A., M.M.I.S., Ph.D.

The department offers graduate study leading to the Master of Science, Master of Management Information Systems and the Doctor of Philosophy degrees in management. Applicants to each program must hold a bachelor’s degree from a recognized institution. Additionally, students must complete a common body of knowledge curriculum comprising core courses in business. Graduates of business schools will likely have met this requirement; graduates of other programs may be required to complete additional courses to compensate for deficiencies.

The M.S.B.A. - HRMN program offers specialized training to graduate students desiring an intense background in human resource management. The objective of the program is to prepare students for careers in Human Resource Management or for further graduate work. The program has a thesis and non-thesis option (the non-thesis option requires additional course work). The program of study is determined by the student and the student's advisory committee based on the student's background and areas of interest.

The M.M.I.S. Program is a non-thesis program that emphasizes practical application of management information systems to managerial problem solving and decision making. Students are required to complete a final project. The program is designed to provide students the opportunity to develop an expertise in a chosen area of management. Applicants to the Masters program must have completed an undergraduate degree and a common body of knowledge consisting of core courses in business is required. The M.M.I.S. program is offered as a traditional, On-Campus program and as a Distance Learning program via Video Outreach.

The Ph.D. program prepares graduates to conduct high-quality research in universities, colleges, government and business. Doctoral students choose one of three areas of concentration: human resource management, organizational analysis and change, or management of information technology and innovation. Individual flexibility is provided in a program of study that develops the conceptual and methodological skills that graduates need to establish a leadership position in their chosen fields. Objectives of the program are accomplished through the completion of a formal program of study, successful completion of a statistics core, preparation and completion of two examination manuscripts, and dissertation research. Students with assistantships may also be required to teach. Students are expected to have a full-time presence on campus. Applications to the Ph.D. program must complete a departmental application and an Auburn University Graduate School application. For full consideration, applications must be received no later than March 1, prior to the Fall term.

Materials Engineering – M.Mtl.E., M.S., Ph.D.

Materials Engineering offers graduate programs of instruction and research leading to the degrees of Master of Materials Engineering, Master of Science and Doctor of Philosophy. All applicants must submit GRE scores for the General Test. Students completing all degree programs are expected to have knowledge in the following areas: mechanical properties; materials structure; materials thermodynamics; kinetics; and electrical, optical and magnetic properties of materials. There is no foreign language or minor requirements for all degrees.

The M.Mtl.E. is intended for those who expect to enter the engineering profession at an advanced level or are practicing engineers wishing to gain additional fundamental knowledge in the field of materials. Those students lacking the necessary background may be required to take additional work. The requirements for the degree are 33 credit hours including a final engineering report. The topic of the report will be agreed upon by the student and the advisory committee. Applicants must have a baccalaureate degree in engineering or science from an institution of recognized standing. Students must pass a qualifying examination prior to taking the final general comprehensive examination required by the Graduate School.

The M.S. is intended for those who seek advanced knowledge in materials science or engineering for a career in research or other professional practice. The applicant must have a baccalaureate degree or its equivalent in an engineering or scientific discipline from an institution of recognized standing. Those lacking the necessary background will be required to take additional work to ensure the continuity of their educational and professional experience. The M.S. program consists of 30 credit hours selected from areas of study appropriate to the objectives
of the applicant and includes a thesis. Students must pass a qualifying examination prior to taking the final comprehensive examination required by the Graduate School.

The Ph.D. program requires that students pass qualifying oral examinations with a greater proficiency than master's students prior to taking the comprehensive examinations. The program is arranged on an individual basis with the student's advisory committee and in accordance with Graduate School guidelines. Students admitted to the doctoral program are required to take the general comprehensive examination based on a research proposal developed by the student within two years after entering the program. The student should be prepared to be examined in all areas of materials engineering.

Mathematics and Statistics – M.S., M.A.M., M.P.S., Ph.D.

The Department of Mathematics and Statistics offers programs leading to the Master of Science and Doctor of Philosophy in both pure and applied mathematics and statistics, the non-thesis Master of Applied Mathematics, and the Master of Probability and Statistics (also see Statistics). In addition, the department regularly offers actuarial science courses that are approved by both the Society of Actuaries and the Casualty Actuarial Society; they are designed to provide the background and material covered in the first 3 actuarial exams.

The Master of Applied Mathematics gives students a strong foundation in one of several fundamental areas of applied mathematics. It is a flexible degree with courses being chosen in conjunction with the advisory committee, some of which may be relevant courses offered by other departments. The Master of Probability and Statistics and the Master of Science in Statistics degrees provide a solid foundation for careers involving applications of statistics (see Statistics). The Master of Science degree in Mathematics develops both content knowledge of the student though coursework, and provides the opportunity to delve deeper into an area of mathematics through the writing of a thesis. The Ph.D. is designed to give students a thorough understanding of a broad body of knowledge related to their field of study, as well as to develop their research capabilities. Ph.D. students are required to pass one oral and three written preliminary examinations. A statistics concentration is available for the Ph.D. degree (see Statistics).

The internationally known faculty of around 50 professors works in areas of algebra, analysis, discrete mathematics, geometry, linear algebra, logic, numerical analysis, partial differential equations, probability, set theory, statistics and topology. Many professors maintain applied research programs associated with several government and industrial laboratories, and one holds the Associate of the Society of Actuaries designation.

Admission to the program is based on a student's undergraduate record, three letters of recommendation from former teachers, GRE scores and graduate grade-point average (for doctoral students). The GRE subject test is not required. A bachelor's degree in mathematics is not required, but students without such a background may be expected to take additional courses to make up deficiencies. The department follows the guidelines for graduate degrees set forth in this Bulletin. Doctoral students must satisfy the departmental preliminary examination requirement to continue their teaching assistantship. Course work in mathematics may be transferred from other institutions, subject to university limitations. (See http://www.math.auburn.edu/ for further information.)

Most students in the program are supported financially during their studies through Graduate Teaching Assistantships and through tuition waivers given to all teaching assistants (with some restrictions). The Baskerville, Fitzpatrick, and Haynesworth Fellowships (around $5,000 each) are awarded annually to qualified students in the Department of Mathematics and Statistics. The department occasionally has Graduate Research Assistantships available in conjunction with departmental contractual research programs. The department requires that all international GTAs who have responsibility for teaching a class be proficient in English. A score of at least 50 on the Test of Spoken English is required.

Statistics - M.S., M.P.S., Ph.D.

The Department of Mathematics and Statistics offers degree programs leading to a Master of Science in Statistics and a non-thesis Master of Probability and Statistics. The Master of Science degree is designed to provide a suitable mix of theoretical and applied background for students interested in a career in statistics. The curriculum provides students with the necessary technical, analytical and interpretive skills required of professional statisticians while concentrating on education in the fundamentals of statistics and its interdisciplinary nature. Course offerings are structured to give students a variety of choices of specialization in order to pursue a career in academia, government or industry and/or further their pursuit of a Ph.D. degree in statistics. The student must complete and defend a thesis and obtain a passing score on the related oral examination. The Masters of Probability and Statistics is the non-thesis version of the Master of Science degree. M.P.S. students are required to complete a project that may involve statistical consulting, programming and/or data analysis. A Ph.D. degree in Mathematics with concentration in Statistics is also available (see Mathematics).

For those students whose graduate research includes a substantial amount of statistical methodology or data analysis but who do not wish to pursue a degree, a graduate minor in statistics is available (see Statistics under Graduate Minors).

Mechanical Engineering - M.S., M.M.E., Ph.D.

The Mechanical Engineering Department offers graduate programs of instruction and research leading to the degrees of Master of Mechanical Engineering, Master of Materials Engineering (see separate listing of graduate program in Materials Engineering), Master of Science and Doctor of Philosophy. Educational and research facilities are available to support graduate study in engineering mechanics, experimental mechanics, robotics, vibrations, dynamical systems, engineering design, engineering acoustics, computer-aided design, materials science and thermal/fluid sciences. The applicant must hold a bachelor's degree in engineering or its equivalent from an institution of recognized standing. If the applicant's undergraduate degree is other than mechanical engineering, an individualized plan of study will be developed to impart the critical skills inherent in the bachelor's mechanical engineering program. All applicants must submit Graduate Record Examination scores for the General Test and will be evaluated on an individual basis by the Mechanical Engineering Graduate Committee.

Non-Thesis Option: The M.M.E. is intended for those who expect to enter the engineering profession at an advanced level. Emphasis is placed on professional development. Requirements for the degree consist of a major of 21 credit hours as a minimum and a coordinated minor of 9 credit hours selected from areas of study appropriate to the applicant's objectives. There is a required faculty supervised project culminating in a final comprehensive oral examination.

Thesis Option: The M.S. applicant must have a baccalaureate or its equivalent in an engineering or scientific discipline from an institute of recognized standing. The degree requires a major of 21 credit hours in mechanical engineering courses, including a thesis (seven credit hours) and a minor of 9 credit hours selected from allied areas of study. The minor may consist of a sequence of courses in mathematics, physics, or computer science. All candidates must pass an oral defense of their thesis including a comprehensive examination covering the major and minor subjects.

The Doctor of Philosophy (Ph.D.) provides for advanced coursework and emphasizes original, creative research. A dissertation embodying the results of this research represents a major portion of the requirements for this degree. The Ph.D. program will consist of a minimum of 60 credit hours, including dissertation, beyond the B.S. degree. Ph.D. students will select their major courses from those at the 7000-8000-level unless there are special requirements for more basic courses. The Ph.D. also requires a minor of at least 9 credit hours in a closely related field such as mathematics, physics, or other engineering disciplines. There is no language requirement for the Ph.D. The program, arranged on an individual basis, usually will consist of a minimum of one academic year of course work and one of research beyond the master's level.

The General Examination must be taken by those seeking a Ph.D. It consists of two parts: (1) a written examination based upon the student's graduate coursework, and (2) an oral examination which may include a review of material covered in the written exam as well as a detailed presentation and defense by the student of his proposed dissertation research.
The Department of Nutrition and Food Science offers graduate study leading to the Master of Science and the Doctor of Philosophy degrees with emphasis in either food science, nutrition, or hotel and restaurant management. The combination of these respective areas within a single department facilitates integrative studies addressing normal and clinical nutrition, food and health issues, food safety and technology and food service, as well as hospitality management. For the M.S. degree, the student may specialize in human, community, clinical or sports nutrition, food service management, food science, or hotel and restaurant management. The department emphasizes the integration of knowledge from various fields for the purpose of understanding and developing professional skills for careers in higher education, government, and food, healthcare and hospitality industries.

For admission to the M.S. or Ph.D. programs, the student must have a bachelor's degree from an accredited institution, a satisfactory grade-point average, and a satisfactory GRE score (a GMAT score may substitute for the GRE score for the HRMT emphasis). Applicants lacking background requirements must make up deficiencies. The M.S. degree requires a minimum of 30 semester hours and a thesis. Required courses for an emphasis in nutrition include NUFS 7500, 7510, 7520, 7050, 7850, and 19 hours of supporting courses. Required courses for an emphasis in food science include NUFS 6430, (6450 or 6640), 7200, 7210, 7050, 7850, and 13 hours of supporting courses. Required courses for an emphasis in hotel and restaurant management include NUFS 6530, 6550, 6570, 7050, 7850, and 19 hours of supporting courses. A non-thesis option is available in the HRMT emphasis; this option is available through distance education and on campus. The Ph.D. degree requires a minimum of 60 semester hours beyond the B.S. degree and a dissertation describing original research in the area of nutrition, food science, or hotel and restaurant management. Course requirements for the Ph.D. degree are the same as for the corresponding Master's degree or an equivalent course from another institution plus NUFS 8970, 8850, and in the case of an emphasis in nutrition or food science NUFS 7280. Laboratories are available for human, animal, chemical, and physical research.

Supporting courses to strengthen the nutrition and food science major may be in, but not limited to, biochemistry, physiology, chemistry, animal science, biosystems engineering, health and human performance, and biostatistics. The HRMT emphasis may take supporting courses in management, marketing, communications, economics, and education. Course requirements for becoming a registered dietitian may be met during the graduate program by enrolling in additional required courses. Teaching, research, and extension assistantships are awarded competitively to qualified students.

Nursing - M.S.N.

The School of Nursing offers a MSN program jointly with Auburn University Montgomery. This program focuses on the teaching/learning process as it relates to nursing students, patients and their families, and health care providers. Graduates of this program will possess advanced knowledge of educational principles for diverse populations and the roles of the Clinical Nurse Specialist in the area of pediatrics, geriatrics or adult health.

The MSN program consists of 43-51 semester hours. These include major, support, and elective courses. The curriculum is offered via traditional classroom and internet web-based courses. Classes may be offered on the AU or AUM campuses. Both thesis and research project options are available.

Admission to the program is competitive and enrollment is limited. Minimum requirements include:
- a bachelor's of science in nursing from an accredited college or university
- good academic standing from the last university attended
- successful completion (C or better) of an undergraduate statistics course
- overall grade-point average of 3.0
- unencumbered Alabama license as a registered nurse
- submission of GRE scores
- three letters of reference
- current resume
- essay on the reason for seeking the MSN

Full-time students are admitted in the Fall semester, with an application deadline of April 1st. Full-time study can be completed in 3 semesters and a summer term. To be considered for full time study, students must have practiced full time as a registered nurse for a minimum of 6 months.

Part-time students are admitted in the Summer term with an application deadline of March 1st. They may enroll for part-time study with less than 6 months of practice, contingent on continued part-time employment as a registered nurse.

Pathobiology - M.S., Ph.D.

(See Biomedical Sciences)

Pharmacal Sciences - M.S., Ph.D.

Graduate study in pharmacal sciences leads to the degree of Master of Science. A Doctor of Philosophy in pharmaceutical sciences is offered through an interdepartmental program by the departments of Pharmacal Sciences and Pharmacy Care Systems.

The graduate program prepares students for teaching or research careers in academia, the pharmaceutical industry and public and private research institutes. Students are expected to select one of the following areas of specialization: pharmaceutics, medicinal chemistry or pharmacology and toxicology.

For the M.S. program, students must have a degree in pharmacy or a bachelor's in an allied discipline such as biology, zoology, physiology, chemistry, physics, or psychology. Requirements include completion of 30 semester hours and a thesis.

For the Ph.D. program, applicants must have a degree in pharmacy or a bachelor's or master's in an allied discipline. Students are expected to select a major area from one of the three disciplines in the pharmacal sciences. A minor should be selected from a related area within pharmaceul sciences or from an allied discipline offering Ph.D.-level education. A dissertation is required of all graduates of the Ph.D. program.

Pharmacy Care Systems - M.S., Ph.D.

The department offers graduate course work at the master's level in the fields of pharmacy care systems and health systems pharmacy. A Doctor of Philosophy in pharmaceutical sciences is offered through an interdepartmental program by the departments of Pharmacal Sciences and Pharmacy Care Systems.

The student pursuing the M.S. is expected to select either pharmacy care systems or health systems pharmacy. At least half of the student's work will be completed in the chosen field, including a thesis. The remainder may be selected in other pharmacy fields or may be taken in a related area outside of the James Harrison School of Pharmacy such as accounting and finance, computer sciences, economics, education, industrial engineering, industrial design, architecture, management, psychology, sociology and communication. The M.S. requires a minimum of 30 semester hours and a thesis. The thesis may be counted toward part of the semester hour requirement. A student may earn a maximum of six credit hours for the thesis.

The student pursuing the Ph.D. will be expected to complete a minimum of 60 semester hours of course work in the chosen field of study. In addition, general examinations and a dissertation are required. A student must earn a minimum of 10 hours credit for the dissertation. A bachelor's degree from an accredited college or university and satisfactory scores on the Graduate Record Examination are required. A pharmacy degree is preferred. There is no additional language requirement beyond verbal and written fluency in English.

Physics - M.S., Ph.D.

The Department of Physics offers the Doctor of Philosophy degree to students who have achieved a mastery of the fundamental laws of nature and demonstrated the ability to complete a research project that results in new knowledge in physics. All students complete the basic graduate level courses in Classical Mechanics, Electricity and Magnetism, Quantum Mechanics and Statistical Physics. They demonstrate their mastery of these subjects by passing a General Doctoral Examination that has both a written and an oral component. To increase their knowledge of a broad range of advanced physics topics and to develop expertise in their chosen area of focus, students complete at least 12 additional hours of graded course work with a minimum of nine at the 8000-level. The research project is usually undertaken in one of the research focuses of the Department - plasma physics, condensed

125
matter and surface physics, atomic and molecular physics, space physics, and computational physics. It is completed with the defense of the student’s dissertation. Students are also expected to publish their research in a refereed journal and/or present it at an appropriate professional meeting.

The Master of Science degree is also offered. Successful students complete the same basic graduate level courses as Ph.D. students. Students electing the non-thesis option complete an additional 12 hours of graduate level course work. Students electing the thesis option complete at least an additional 6 hours of graduate level course work and at least 4 hours of thesis work. In addition to defending their thesis, they are encouraged to publish their results in a refereed journal or present them at a scientific meeting.

**Plant Pathology - M.Ag., M.S., Ph.D.**

Graduate study in plant pathology leads to the M.Ag., M.S. or Ph.D. degrees. Applicants must have earned a B.S. from an accredited institution with course work in botany, microbiology, agronomy, horticulture, or closely related areas. SAT scores on the GRE and TOEFL tests are required. All graduate students must complete core courses in plant pathology. For the M.Ag. or M.S., 30 semester credits are required beyond the B.S.; for Ph.D. candidates, 60 credits are required. M.S. candidates must conduct research for the thesis and pass a final oral examination. Ph.D. candidates must conduct independent research for a dissertation and successfully pass written and oral qualifying exams upon completion of their course work and an oral defense examination upon completion of their research. No foreign languages are required.

**Poultry Science - M.S., M.Ag., Ph.D.**

Graduate studies in Poultry Science leads to Master of Agriculture, Master of Science, and Doctor of Philosophy degrees, designed to prepare outstanding students for careers in the commercial poultry industry and allied industries, as well as in the academia. Within Poultry Sciences, research training and experience can be acquired in the specialized areas of management; nutrition; physiology; parasitology; pathology; immunology; microbiology; processing/products; and food safety.

Applicants must have a bachelor’s degree in agricultural, biological or allied sciences from a recognized institution. SAT scores on the GRE and TOEFL tests are required. All applications are reviewed by the departmental Graduate Committee. Candidates should have adequate training in basic sciences. The course of study, developed by the student and the advisory committee, may include courses on prerequisites subjects. There is no foreign language requirement. Master of Science degree is earned only with a thesis option, whereas the Master of Agriculture requires a research project. Both degrees require a minimum of 30 semester hours of course work and a comprehensive final oral examination. A minimum of 30 semester hours of course work beyond the M.S., or 60 hours beyond the B.S., successful completion of written and oral defense examinations, and a dissertation based on an independent research project are required for the Ph.D. degree. Additional information about the departmental requirements, assistantships, and policies can be accessed at:

**Psychology - M.S., Ph.D.**

The Psychology Department offers doctoral degrees in three fields: Clinical, Experimental and Industrial/Organizational Psychology - and a Master’s degree option in Applied Behavior Analysis in Developmental Disabilities. (Note: Graduate degrees in Counseling, Counseling Psychology, Educational Psychology and School Psychology are offered through departments in the College of Education rather than through the Department of Psychology).

The Clinical Psychology program utilizes a scientist-practitioner training model that emphasizes learning both research and clinical methods. Typically, the program requires five years at Auburn in practicum experiences, course work, and individualized research. In addition, a one-year internship at an APPIC program is required. The Experimental program offers education in the broad range of experimental psychology, including behavior analysis, cognitive and biological bases of behavior, and behavioral pharmacology and toxicology. Linking basic research with its practical applications is encouraged. The Industrial/Organizational program prepares students for academic, research and/or applied settings. Electives allow students flexibility in developing their own areas of specialization. Practicum placements provide opportunities to gain research and applied experience.

During the first four semesters of study in the doctoral programs, students complete a sequence of departmental core courses providing a foundation in psychology on which specialization in one of the department’s three programs is based. In doctoral study, students are expected to write and defend an empirically-based master’s thesis. Admission to doctoral candidacy is contingent upon the successful completion of the general doctoral examination. Students must also write and defend a research dissertation. The total number of semester credit hours of graduate work leading to the Ph.D. ranges from 60 to 92.

The Master’s option in Applied Behavior Analysis in Developmental Disabilities trains students to provide programmatic habilitation services to individuals with mental retardation and other developmental disorders with a need for training of Schools and ameliorating problem behaviors. This non-thesis degree option integrates foundation and specialized course work with practical experience. It entails three consecutive semesters (12 months) of full time course work (25 semester hours) and practicum experience (up to 18 semester hours).

Admissions: Holders of the bachelor's degree in any discipline from an accredited institution will be considered for graduate work in psychology. Students are admitted to all programs fall term only. Applicants should visit the department's web page (www.auburn.edu/psychology), email BRYANT@AUBURN.EDU or call 334-844-6471 for application and program information. To ensure consideration, the application process should be completed by Jan. 14 for doctoral programs and by February 15 for the Master's option in Applied Behavior Analysis.

*Although an M.S. degree is conferred upon students in the doctoral programs when they have fulfilled intermediate requirements for the Ph.D., the department does not offer terminal master’s degrees in these fields.*

**Public Administration and Public Policy - M.P.A., Ph.D.**

The Department of Political Science offers the Master of Public Administration. It is a professional degree program for leadership in public service at all levels of government. The program is accredited by the National Association of Schools of Public Affairs and Administration. Highly qualified students may pursue concurrently the Master of Community Planning through a special arrangement that includes a separate application.

Applicants for the MPA must have a bachelor's degree or its equivalent from an accredited college or university. The General Test of the Graduate Record Examination is required. The admissions committee will evaluate the graduate record, GRE scores, letters of recommendation, a writing sample and any experience in government. The program is not limited to political science majors, but successful applicants who have little background in government institutions and processes may be required to take additional courses.

The program requires 42 semester hours, plus a comprehensive examination. Eight core courses for a total of 24 hours credit are required of all students. Students take an additional 12 hours of electives in either public administration, broadly conceived, or an approved concentration in a related administrative field or policy area. The final six credit hours consists of either an administrative internship in a government agency or participation in a governmental research project. Students without substantial governmental experience will complete an internship, while those who have prior experience will complete a research project and paper.

M.P.A. DEGREE REQUIREMENTS

A. Pre-requisites

**COMPETENCY** | **MEASURE**
--- | ---
English | Verbal GRE of at least 450, writing sample or a course in advanced composition
Math | Quantitative GRE of at least 450 or course in college mathematics
U.S. Government | Undergraduate course or experience
Economics | Undergraduate course
Microcomputer applications | Undergraduate course or demonstrated competence

The Graduate School
Ph.D. Degree Requirements

A. Core Courses - The following four core seminars must be taken by all students: Public Administration, Public Policy, Research Methodology I and II.

B. Tracks - The Ph.D. program has two tracks, Public Administration and Public Policy. In addition to the four core courses, students are required to take three courses within the track they have chosen. In the Public Administration track, students must take: Public Budgeting, Human Resource Management and Organization Theory. In the Public Policy track, students must take three of the following courses: American Politics and Public Policy, Comparative Politics and Public Policy, International Relations and Public Policy, Political Theory and Public Policy and Public Law and Public Policy. The other two graduate level courses are selected by the student in consultation with the student's committee. They may be but need not be selected from this list.

C. Minimum Credit Requirements

Hours of formal Ph.D. course work ............................................... 39

Hours of 7000/8000 formal Ph.D. course work: ................................ 33

Minimum hours of formal coursework at each campus: ..................... 9

D. Examinations - Upon completion of course work, students must take a written and oral examination administered by the advisory committee over their course work. For the written part, there will be one general examination covering all four of the core areas and separate examinations on the student's areas. Students must pass each written examination before scheduling the oral examination. After completion of the dissertation the student must pass a final oral examination which is primarily a defense of the dissertation.

Rehabilitation and Special Education - M.Ed., M.S., Ph.D

Graduate study in Rehabilitation and Special Education leads to the degrees of Master of Education, Master of Science, and the Doctor of Philosophy. Acceptance into these programs is competitive, based on past achievement, scholarship potential, and professionalism. Admission to the master's degree program requires competitive undergraduate grade-point average and Graduate Record Examination (GRE) scores, completed application forms, 3 letters of recommendation, and approval of department. Admission to the Ph.D. program requires competitive graduate grade-point average and GRE scores, completed application forms, 3 letters of recommendation, a current resume, a statement of purpose, and approval of department. Stipends and fellowships are typically available at both the masters and Ph.D. level for highly qualified students.

Students pursuing a master's degree in the special education program are required to complete a minimum of 30 semester hours. Completion of the program meets the requirements for "A" level teacher certification in Alabama. Specializations include early childhood special education (ages birth to 9), collaborative teacher (K-12), Alternative master's certification programs for non-education majors are available in these specialized areas. The special education program requires 3, 150-hour practica. Additionally, alternative master's students complete a semester-long, full-time internship in a public school setting. They also are required to participate in the Alabama Prospective Teacher Testing Program including submitting a passing score on the Basic Skills assessments for admission to the program and, if applicable, a passing score on the appropriate Praxis II subject assessment(s) prior to internship. Graduate students in master's programs that add a new area of certification to an existing certification must pass, if applicable, the appropriate Praxis II subject assessment(s) as a prerequisite for graduation. Special education students may select a thesis (M.S.) or non-thesis (M.Ed.) program.

The master's rehabilitation program is accredited by the Council on Rehabilitation Education and provides students with the necessary academic course work and clinical experiences to sit for the Certified Rehabilitation Counselor (CRC) examination. The program provides the opportunity through elective course work to specialize in vocational evaluation and to sit for the Certified Vocational Evaluator (CVE) examination. The rehabilitation program requires a 100 hour practicum taken early in the program and 600 hours of supervised clinical practice generally taken at the end of the program. Rehabilitation students may select a thesis (M.S.) or non-thesis (M.Ed.) program. The thesis option requires 64 semester hours of course work while the non-thesis program is 60 semester hours and requires the student to successfully pass a written comprehensive examination.

The Ph.D. program is offered in rehabilitation and special education. Students are required to take 15 hours of research courses and 9 hours of educational foundations (e.g., historical, psychological, philosophical, sociological). The remaining course work is made up of RSED doctoral "core" and support area course work. A minimum of 48 semester hours beyond the master's degree, excluding the dissertation hours, is needed to complete the program. Prior to submitting a research proposal for the dissertation, all RSED students must satisfactorily complete a qualifying paper and a written and oral comprehensive examination. Typically, the program takes a minimum of three years to complete (two years of course work and one year of independent research).

Spanish - M.A., M.H.S.

Graduate studies in Spanish lead to the Master of Arts (M.A.) or the Master of Hispanic Studies (M.H.S.). The graduate program in Spanish prepares students for careers in teaching, government, business, or for doctoral studies.

Candidates wishing to pursue the M.A. in Spanish or the M.H.S. must have a bachelor's degree from an accredited institution, with at least 38 semester hours of undergraduate Spanish above the freshman level and satisfactory scores on the Graduate Record Examination. International students also must have acceptable scores on the TOEFL. Applicants lacking course requirements need to make up deficiencies before admission to the graduate program.
The M.A. requires at least 30 semester hours including 4 credits for thesis. The M.H.S. requires at least 36 semester hours but no thesis. All degrees require passage of comprehensive examinations.

Candidates for the M.H.S. must earn a minimum of 30 semester hours in their major. All Master’s degree candidates who are graduate assistants in Spanish are required to take FLSP 7090 every semester when they hold a teaching assistantship or equivalent. Credit from this course does not count toward the master’s degree. For more information, check the student handbook available from the department.

A concentration consisting of 6 semester hours of graduate-level courses in a related field or fields may be earned as part of the M.H.S. degree offered by the department.

A reading knowledge of one other foreign language is required. This knowledge may be demonstrated by examination, by a foreign language proficiency course, or by completion of the first-year sequence (or the equivalent) of a foreign language with a grade of B or better.

Teaching assistantships are available to qualified students. For more information, please contact the department.

Statistics (See Mathematics and Statistics)

Veterinary Clinical Sciences (See Biomedical Sciences)

Wildlife Sciences - M.S., Ph.D.
Wildlife Sciences graduate programs are available for both M.S. and Ph.D. degrees. Admission requirements parallel those for Forestry graduate programs.

The M.S. degree program requires a minimum of 30 hours beyond the bachelor degree at the graduate level, 21 hours of which must be in the major. A minimum of 4 but not more than 6 hours in Research and Thesis (WILD7990) is required. All M.S. students are required to take Research Methods (FORY7510) and Graduate Seminar (WILD7950). A research proposal and thesis based on original research are major components of the M.S. degree.

The Ph.D. degree requires 60 semester hours beyond the bachelor degree. There must be a minimum of 30 semester hours in graded coursework at the 7000 level or above. Of the remaining 30 semester hours, 10 hours must be Research and Dissertation (WILD8990) and 20 hours of 6000 level or above. While some these 60 hours can be from previous graduate work, such as a M.S. degree, a minimum of 18 hours of graded coursework at the 7000 level or above must be completed at Auburn. All Ph.D. students are required to take Research Methods (FORY7510) and Graduate Seminar (WILD7950). A research proposal and dissertation based on original research are required as major components of the Ph.D. degree program.

Zoology (See Biological Sciences)

Interdepartmental

Biomedical Sciences - M.S., Ph.D.
All graduate faculty of the College of Veterinary Medicine participate in a college-wide graduate program leading to the Master of Science and the Doctor of Philosophy degrees in Biomedical Sciences (BMS). Participating departments are: Anatomy, Physiology and Pharmacology; Pathobiology; and Clinical Sciences.

Applicants to the program are required to meet entrance standards established by the College Graduate Program Committee, the Graduate School, and their intended area of study. Either a baccalaureate degree or the Doctor of Veterinary Medicine (DVM) degree or equivalent is required for admission.

The Department of Anatomy, Physiology and Pharmacology offers programs in Anatomy and Histology and in Physiology and Pharmacology. Programs of study include Neuroscience, Bone and Joint Disease, Physical Therapy, BioSensors, Reproductive Endocrinology, Cardiovascular Physiology, Endocrinology, Diabetes and Obesity, Immunophysicsiology, and Pharmacology. The Department of Pathobiology offers graduate study in microbiology, molecular biology, immunology, epidemiology, parasitology, and pathology. The Department of Clinical Sciences’ graduate programs and the Department of Pathobiology’s pathology graduate program are combined with resident training and require the DVM degree or its equivalent for entry. All Departments offer specific enrichments including seminars and journal clubs, training in grant writing, participation in scientific meetings and opportunities to present results of research at national and international meetings.

A graduate student advisory committee is appointed by the dean of the Graduate School for each student upon recommendation of the college’s BMS Graduate Program Committee. The student’s faculty adviser usually serves as the chair of this committee, and the remaining members, selected from the graduate faculty, should have expertise relevant to the student’s area of study. The advisory committee develops a plan of study which must be submitted to the College Graduate Program Committee for approval and then to the dean of the Graduate School. Study programs are designed to meet the student’s needs and interests while featuring research training and assuring a strong background in biochemistry and molecular biology. Original research is required for all BMS graduates. Courses must be selected in conformity with the regulations of the college’s BMS Graduate Program Committee and the Graduate School. For additional information, visit the following Web site:

A dual degree DVM/MS or DVM/PhD program is offered which allows students to pursue simultaneously DVM and BMS graduate degrees in a time-and-content-integrated manner. Students already admitted to the College of Veterinary Medicine as veterinary students may apply for admission to the Graduate School during their first or second year in the DVM curriculum. Students already admitted to the Graduate School may start the DVM curriculum after completion of at least one year in a graduate curriculum. The dual degree student must fulfill all requirements and minimum performance standards of the DVM curriculum and of the graduate programs in Biomedical Sciences.

Economics - Ph.D.
This is an interdepartmental program administered through the Department of Agricultural Economics and Rural Sociology and the School of Forestry and Wildlife Sciences. Information is available from the respective Graduate Program Officers.

Integrated Textile and Apparel Science - M.S., Ph.D.
A joint Master of Science in Integrated Textile and Apparel Science and a joint Ph.D. in Integrated Textile and Apparel Science are offered through the Department of Consumer Affairs, College of Human Sciences and the Department of Textile Engineering. The focus is on the integration of textile science and apparel science within a product management approach for application in the global textile industrial complex. The programs offer course work (see also listings for the Department of Consumer Affairs and Textile Engineering) and research ranging from fiber and materials science, composite materials, geotextiles, biomedically active enzymes, enzyme technology for fiber modification, polymer recycling, statistical process control, technology of manufacturing, polymer and colorant related chemistry, apparel product development and design, marketing of textile and apparel products, global production and distribution of these products, and consumer behavior. Minors can be chosen to take advantage of the unique breadth of the program. A foreign language is not required. Entrants with limited undergraduate backgrounds in their chosen area may need to complete some undergraduate courses. Graduate teaching and research assistantships are available. Students may apply for admission and/or assistantships in either department. Graduate committees include faculty from both departments.

The M.S. in Integrated Textile and Apparel Science offers a Thesis and a Non-Thesis Option. The Thesis Option requires a minimum of 30 semester hours, including at least 5 hours of CAHS 7990 or FBEN 7990 Research and Thesis. Required courses include ITAS 7200, CAHS 7950 or FBEN 7950, and 7990 (2 hr. minimum each semester during thesis research). At least 21 hours must be in apparel, textiles, or consumer related courses.

The Non-Thesis Option requires a minimum of 36 semester hours, including ITAS 7200, CAHS 7950, or FBEN 7950, and CAHS 7980 or FBEN 7980. At least 25 hours must be in apparel, textiles or consumer related courses. A final comprehensive written exam is required.
The Graduate School

The Ph.D. in Integrated Textile and Apparel Science requires a minimum of 30 semester hours of graded graduate level courses at the 7000-level or above; at least 18 of these hours must be completed at Auburn University. At least 30 additional hours of graduate level course work (6000-level or above) must be completed. A ten-hour core covering the global, integrated textile business is common to all Ph.D. candidates. Courses required include ITAS 7200, 8950, 8960, 8970, and 8990 Research and Dissertation (a minimum of 10 semester hours). Students must register for at least 2 semester hours of ITAS 8990 each semester they are working on dissertation research. Students select one of three tracks: Fiber Science, Apparel Science, or Textile and Apparel Science. Students must pass a written and oral General Examination after completing the course work, before proceeding with the dissertation research. A final oral defense of the dissertation is required.

Pharmaceutical Sciences - Ph.D

The graduate program in pharmaceutical sciences offers the terminal degree of Doctor of Philosophy. The primary purpose of the program is to establish a functionally integrated research degree program leading to the Doctor of Philosophy with a major in the pharmaceutical sciences and specialization in one of the following disciplines: medicinal chemistry, pharmaceutics, pharmacology-toxicology or pharmacy care systems. The interdepartmental program is administered jointly through the Departments of Pharmacal Sciences and Pharmacy Care Systems.

Sociology - M.S., M.A.

The interdepartmental graduate program in Sociology offers study and research leading to the degrees of Master of Arts and Master of Science. Anthropologists, criminologists, rural sociologists and sociologists make up the faculty. The program is administered by a three-member coordinating committee from the Department of Agricultural Economics and Rural Sociology, the Department of Sociology, and the Department of Sociology at Auburn University-Montgomery.

Both thesis and non-thesis options are available. These two degree options are designed to serve the needs of differing types of students. The thesis option is recommended for students who might be interested in pursuing advanced graduate work and who are interested in gaining research experience. The non-thesis option is designed for individuals who are in mid-career, who wish to learn new skills in order to be more productive professionally, and have no intent on pursuing a more advanced graduate degree.

All students must take SOCY 7000, 7100, RSOC 7700. Students taking the thesis option are required to complete a total of 36 hours. Additionally, a thesis is also required. Students may apply up to six hours of Research and Thesis (SOCY 7990) toward the 30-hour requirement. Students taking the non-thesis option will be required to complete a total of 36 hours. Additionally, a major paper is required.

Graduate Minors

Biochemistry and Cell/Molecular Biology

Auburn University offers a graduate minor in Cell and Molecular Biosciences, administered by the Graduate School with faculty from the Cell and Molecular Biosciences Program. The CMB minor requires a suitable background in biochemistry (BCHE 7200, 7210 or equivalent) and the successful completion of at least nine credits from the CMB graduate curriculum. The minor offers in-depth instruction in animal, microbial and plant cell and molecular biology, and is particularly designed for M.S./Ph.D. students in life sciences and allied fields whose thesis or dissertation research will benefit from a broader perspective of cell and molecular biology and bioinformatics. See www.auburn.edu/cmb for more information.

Community Planning

The Community Planning minor is open to graduate students in Building Science, Landscape Architecture and others with permission. This minor affords students with interests in planning, development and urban design the opportunity to explore the discipline. Students must complete 9 credit hours of Community Planning coursework and notify CADC Student Services that they are completing the Planning minor.

Economics

Economics is an academic minor administered by the Graduate School in cooperation with faculty and departments that participate in the Auburn Group in Economics. These are listed below. The Economics minor is open to graduate students whose thesis or dissertation research will benefit from a broader and enriched perspective in the fundamentals and applications of the ecological sciences. For more information, students should contact any of the following department coordinators.

Agronomy & Soils, Wes Wood .................................................. Funchess 202
Animal Sciences, Russ Muntifering ........................................ Upchurch 108
Biological Sciences, Jack Feminella ...................................... Funchess 331
Entomology & Plant Pathology, Kira Bowen .............................. Rouse 209
Fisheries & Allied Aquacultures, Dennis DeVries ....................... Swingle 311
Forestry, Ed Lowenstein ....................................................... Forestry and Wildlife

Environmental Studies

This is an interdisciplinary academic minor administered by the Graduate School in cooperation with participating departments. It is open to any graduate student whose thesis or dissertation is in the environmental area. Participating departments include Aerospace Engineering, Agricultural Economics, Biosystems Engineering, Agronomy and Soils, Animal Sciences, Architecture, Biological Sciences, Chemical Engineering, Civil Engineering, Entomology, Fisheries & Allied Aquacultures, Forestry, Geography, Geology, Horticulture, Landscape Architecture, Pathobiology, Pharmacal Sciences, Physiology & Pharmacology, Plant Pathology, Psychology and Sociology.

Basic guidelines are:
1. The minor is open to any graduate student whose thesis or dissertation is environmentally oriented.
2. The student's department retains primary control over the student's program.
3. One committee member must be from outside the student's department and this member must be involved in environmental research.
4. Each student must take BIOL 3060, or the equivalent and RSOC 7650 (Natural Resources and the Environment) or an equivalent.
5. Each student must take at least three hours of environmental-related course work from outside the student's "broad group discipline."
6. Each student must take at least three hours of environmental-related course work from outside of the student's home department but with-in the student's "broad group discipline."
7. Each student must meet the degree requirements of the student's home department.
8. At the discretion of the student's advisory committee, graduate-level courses required for this program also may be counted towards the completion of other degree requirements.

For more information, contact Dr. Joe Touchton, Department of Agronomy and Soils, 202 Funchess Hall.
Plant Molecular Biology
Auburn University offers an academic minor in Plant Molecular Biology administered by the Graduate School in cooperation with the participating Molecular and Cellular Biology faculty housed in the three departments listed below. The minor is open to graduate students enrolled in these departments whose thesis/dissertation research addresses related studies and who will benefit from broader training in molecular biology. For more information, contact the following department coordinators: Botany and Microbiology Narendra Singh, Biological Sciences Fenny Dane, Horticulture Sadik Tuzun (Chair), Entomology and Plant Pathology

Sport Management
The purpose of the Sport Management Minor is to provide master’s degree students with the specialized knowledge of the sport industry and to prepare those students to work in sport organizations as administrators and managers. The minor is administered by the Graduate School. Participating departments include Health and Human Performance; Educational Foundations, and Leadership and Technology. Students selecting the minor must satisfy the degree requirements for the master’s degree programs in Health and Human Performance; Educational Foundations, or Leadership and Technology. The Sport Management Minor Committee oversees the program and certifies completion. Minimum requirements are 12 semester hours of graduate course work in sport management, as identified by the Committee, 6 of which must be beyond the minimum hour requirements for the master’s degree. At least 6 hours must be approved course work from departments outside the student’s major department. The student must also complete a minimum of 3 semester hours of work-related experience in sport management (e.g., a practicum course). For additional information, please contact the department head or chair of the participating units.

Statistics
Auburn University offers a graduate academic minor in Statistics administered by the Graduate School in cooperation with the Statistics Coordinating Committee and the Department of Mathematics and Statistics. The objective of the minor is to provide education and training for students whose graduate research includes a substantial amount of statistical methodology and/or data analysis. Students are required to complete 12 hours of graduate level statistics course work (selected from 6110, 6620, 7000, 7010, 7020, 7030, 7040, 7600, 7616, 7700, 7780, 7840, 7850, and 7860) and demonstrate the ability to apply statistical methodology to problems in research. Participants are required to have one committee member from outside the department who is a member of the Statistics Faculty. For more information, contact Dr. Mark Carpenter, Department of Mathematics and Statistics.

Urban Forestry
The Department of Horticulture (HORT) and the School of Forestry and Wildlife Sciences (SFWS) offer an Urban Forestry Minor for graduate students. Urban Forestry is the design, establishment and maintenance of urban forests to enhance the economic value of cities and to provide a healthier environment for people. The minor promotes interdisciplinary studies and trains students for employment in the urban forestry arena. Auburn University, with its strengths in Horticulture, Forestry, Landscape Architecture, Community Planning and Agriculture and its proximity to major urban centers such as Atlanta, Birmingham, Columbus and Montgomery, offers a unique opportunity for urban forestry research and education.

To be eligible for the minor, students must be enrolled in the Master of Natural Resources, Master of Agriculture, Master of Science or Ph.D. degree program in HORT or SFWS. To complete the minor, students must:

1. Develop an advisory committee including faculty from both SFWS and HORT;
2. Complete a thesis/dissertation research project that pertains to urban forestry, or in the case of Master of Natural Resources and Master of Agriculture degrees, complete an approved 3 to 4 credit hour directed study in urban forestry;
3. Complete FORY 6650, HORT/FORY 7850 and at least one undergraduate or graduate course in tree identification.
4. Complete at least nine semester hours from a list of approved core courses, at least one of which must be outside of the home department or school.

To obtain additional information, contact the Graduate Program Officer at the Department of Horticulture or the School of Forestry and Wildlife Sciences.
