Strategy Science

Notes:

⁺ A number of the journals on the “Elite” list are considered specialized journals and are typically limited to research in a smaller field within Management (*Strategic Management Journal* is for Strategic Management scholars, *Journal of Applied Psychology* and *Personnel Psychology* are for OB/HRM scholars, and the *Journal of Business Venturing* is for Entrepreneurship scholars).

* Some of the Category 1 journals are particularly well regarded by our department’s faculty, by faculty at our peer and aspirant institutions, and by objective metrics such as impact factors and acceptance rates. These journals are noted with an asterisk to show that they are especially noteworthy among the broader set of Category 1 outlets.

- If a faculty member believes that a journal is not in the appropriate group (i.e., Elite, Category 1, or not listed), s/he has the opportunity to provide evidence to support his/her view of where it should be classified. The final determination will rest with the tenured faculty in the department.
