|---------------|----------------------------------|
| Job Family:   | Information Technology           |
| Job Function: | Information Systems Architecture |

## JOB SUMMARY

Under minimal supervision, serves as the senior architect for the delivery of enterprise-wide technology systems and services for the University. Researches, designs, and presents designs to OIT management for review and acceptance. Works closely with technology architects, delivery teams, OIT project managers, various members of OIT management, and, on occasion, University governance groups and technology teams outside of Auburn University to ensure current and future technology services are designed and delivered according to University standards and industry best practices. Responsible for ensuring that major University technology systems are compatible and inter-operable. (Employee must work in central IT unit. Exceptions require CIO prior approval.)

## RESPONSIBILITIES

- Serves as a senior, enterprise-level technology design and architecture advisor to governance teams. Serves as the primary expert for the current and future design of technology application delivery and plays a lead role in technology strategic planning. Monitors industry trends to ensure the University technology architecture is current with industry standards and new technology is implemented as appropriate.
- Partners with stakeholders, OIT project managers, OIT delivery teams, and vendor partners to ensure the design and delivery of systems and services adhere to University technology architecture principles for all services. Provides direction in all aspects of the evolution of the University technology architecture to include technical assessments and technical requirements analysis as well as both short and long-term future capability needs to drive the design and integration of all components of the architecture.
- Fosters cross-organizational thought through leadership, user experience excellence, vendor-partner accountability, and operational cohesion.
- Supports a culture of service, process orientation, best practice, and cost-effective management.
- Coordinates and assists with the deployment of new enterprise-wide systems and services.
- May serve as a lead within the team, coordinating the work of others and serving as the primary contact.

The responsibilities listed above show the typical duties for jobs in this classification. Actual tasks may differ depending on the department's needs. Other similar duties may be assigned with discretion of the supervisor. Not every duty will apply to every position, and the amount of time spent on each task can change based on department needs.

## SUPERVISORY RESPONSIBILITIES

|                            |                                                                                                                                       |
|----------------------------|---------------------------------------------------------------------------------------------------------------------------------------|
| Supervisory Responsibility | May be responsible for training, assisting or assigning tasks to others. May provide input to performance reviews of other employees. |
