JOB FAMILY AND FUNCTION

Job Family:	Research
Job Function:	Research Operations

JOB SUMMARY

The Electronic Research Administration (ERA) Data Analyst reviews the extraction, transformation, and analysis of data from the ERA system and related platforms. The role develops dashboards, automates reporting, and delivers insights to improve research compliance and operational efficiency.

RESPONSIBILITIES

- Extracts, cleans, transforms, and analyzes data from the Electronic Research Administration (ERA) system or other institutional systems, ensuring its accuracy and relevance, to provide meaningful and actionable reports, and to enhance the process improvement and reporting capabilities of the ERA unit by identifying key performance indicators, uncovering trends, and facilitating data-driven decision-making. Develops SQL queries and data pipelines to automate reporting.
- Develops and maintains dashboards and visualizations to effectively present findings, ensuring clear communication of insights to stakeholders. This includes designing user-friendly interfaces, integrating real-time data updates, and utilizing visualization tools to highlight key metrics and trends.
- Leads collaborations with cross-functional teams to define analytical priorities and design custom data solutions. Gathers requirements, customizes dashboards to meet specific needs, and provides training to stakeholders on how to interpret and utilize the visualizations for informed decision-making.
- Develops data strategies that directly support compliance, planning, and institutional decision-making.
- Performs other related duties as assigned.

SUPERVISORY RESPONSIBILITIES

Supervisory Responsibility	No supervisory responsibilities.
