JOB FAMILY AND FUNCTION

Job Family: Research

Job Function: Lab & Field Operations

JOB SUMMARY

Under minimal supervision, this position performs ongoing process and database support for the Department of Pathobiology. Provides oversight, monitors and maintains accurate data in the system for research and reporting.

RESPONSIBILITIES

- Serves as the coordinator for the internal diagnostic specimen submission process. Ensures appropriate compliance with established protocols by tracking the status of testing and communicating the status to the requestor; ensures cases are completed within a timely manner. Serves as a liaison with submitting clinicians and outside veterinarians to ensure appropriate submission procedures. This position will integrate information from the specimen trim room into patient records while ensuring a legally compliant trail of documentation.
- Provides system and ad hoc reports on a consistent basis providing turnaround times, pending cases, revenue to related diagnostic services, etc., to assist in process improvements initiatives while maintaining the integrity of laboratory specimen handling from receiving to final reporting.
- Serves as the laboratory information management software superuser; tests database after software upgrades and provides training to new users and on system enhancements. Ensures data integrity in the system and retrains users when needed.
- Coordinates data needs with students, professors and lab personnel to gather data from the lab information management system to support research projects.
- Ensures revenue is collected in a timely manner from outside clinics and provides collection reports on a routine basis.

SUPERVISORY RESPONSIBILITIES

Supervisory Responsibility

May be responsible for training, assisting or assigning tasks to others. May provide input to performance reviews of other employees.
