Auburn University Job Description

Job Title: Transportation Engineer
Job Code: JA11
FLSA status: Exempt

Job Summary
Provides training, technical assistance, and consultation with engineers responsible for planning, designing, constructing, and maintaining highways for state and local transportation agencies.

Essential Functions

1. Provides technical assistance to county and city engineers on highway safety concerns including performing on-site visits, research, and development to alleviate highway safety problems.
2. Assists unit director as needed with program management, including, but not limited to maintaining customer relations, identifying new clients and grant opportunities, managing budgets.
3. Develops and teaches workshops on civil engineering topics of interest to county and city engineers.
4. Reviews key federally-required transportation planning documents prepared by metropolitan planning organizations and assigned by Alabama Department of Transportation for accuracy, completeness, and compliance with federal regulations.
5. Writes reports that documents the quality and issues with reports received from consultants as well as planning documents assigned for review. Writes proposals and grants for future opportunities.
6. Identifies consultants to perform highway safety analyses and review consultant reports documenting those studies.

Supervisory Responsibility
May be responsible for training, assisting or assigning tasks to others. May provide input to performance reviews of other employees.

The above essential functions are representative of major duties of positions in this job classification. Specific duties and responsibilities may vary based upon departmental needs. Other duties may be assigned similar to the above consistent with the knowledge, skills and abilities required for the job. Not all of the duties may be assigned to a position.
## Auburn University Job Description
