Auburn University Job Description

Job Title: IT Systems Auditor

Essential Functions

1. Prepares audit programs, work papers, and issues to document vulnerability scans, system configurations and diagrams, user reports, interviews, etc.
2. Analyzes information system scans and settings and compare to industry standards and established benchmarks.
3. Consults with departments on best practices and serves as a resource on policies and procedures and internal controls.
4. Serves on committees to revise or draft university policy to improve the university's computer security environment and ensure compliance with external regulations.
5. Prepares risk analyses and vulnerability assessments for each review to identify weaknesses, compliance issues, operational deficiencies, or other specific concerns that could have an adverse impact on the university and assesses the probability of an occurrence.
6. Analyze scans, reports, system configurations, and other data to form conclusions about the security of the stored data.
7. Prepares audit reports communicating results to management and the Audit Committee of the Board of Trustees and discusses audit findings and recommendations with department heads working to obtain an acceptable management response for the audit report.
8. Identifies risks and vulnerabilities not being managed properly which would allow an intruder access to unsecured data and identifies exceptions and weaknesses in internal controls.

Supervisory Responsibility

May be responsible for training, assisting or assigning tasks to others. May provide input to performance reviews of other employees.

The above essential functions are representative of major duties of positions in this job classification. Specific duties and responsibilities may vary based upon departmental needs. Other duties may be assigned similar to the above consistent with the knowledge, skills and abilities required for the job. Not all of the duties may be assigned to a position.
