Job Summary
As a member of the Office of the Vice President for Research & Economic Development (OVPRED), and working closely with the University’s Cybersecurity team (Office of the CIO/CISO) as well as Office of Information Technology (OIT), this position is responsible for providing cybersecurity management of multiple research programs including, but not limited to, Controlled Unclassified Information (CUI) management; Cybersecurity Maturity Model Certification (CMMC); Research Electronic Data Capture System (REDCap); and Electronic Research Administration (ERA). Directs security specialists within the OVPRED, as well as collaborates with University CISO and Cybersecurity personnel that provide cybersecurity operations including a Security Operations Center (SOC); systems and network security monitoring; penetration testing; firewall and related infrastructure management; network traffic analysis; and cybersecurity consulting for the University community. Assists with Governance, Risks and Compliance (GRC) requirements specifically for research. Consults with leadership on security matters such as security frameworks policies/procedures.

Essential Functions
1. Mentors the Research Cybersecurity team members, researchers, and contract specialists, as well as implements professional development plans for all members of the team.
2. Provides assistance with governance, risks, and compliance by 1) coordinating the development of University Research information security technical standards, guidelines, and procedures, based on a recognized framework of best practices and in support of Auburn University policies and regulations, such as Cybersecurity Maturity Model Certification (CMMC), NIST 800-171, and NIST 800-53; 2) assisting with risk analysis and risk management; 3) assisting with security and compliance reviews; and 4) preparing and maintaining system security plans (SSPs) for various research projects on campus.
3. Provides assistance and guidance for the Research Security Enclave, to include network security and 1) maintaining cybersecurity firewall and web application firewalls for on-premise network and cloud environments that support research; 2) directing security monitoring systems for network server, firewall, and network anomalies within the Research Security Enclave; 3) creating infrastructure designs of current and future network designs and incorporating appropriate mitigation of existing and emerging threats; and 4) identifying security design gaps in existing and proposed network architecture and recommending changes and enhancements.
4. Collaborates with the Auburn Office of Cybersecurity operations ensuring the Security Operations Center (SOC) is monitoring appropriate Research Cybersecurity events and providing appropriate alerting to the Research Cybersecurity Group, and provides guidance and strategic planning for Security Incident Event Management (SIEM), both in the cloud and on-premise.
5. Collaborates with campus groups to build awareness and a sense of common purpose around research security. Stays fully informed of current security information and issues, as well as regulatory changes affecting higher education at the state and national level. Participates in national policy and practice discussions, and communicates results with the entire campus. Engages in professional development to maintain continual growth in professional skills and knowledge essential to the position.
6. Performs special projects and other duties as assigned.
Supervisory Responsibility

Full supervisory responsibility for other employees is a major responsibility and includes training, evaluating, and making or recommending pay, promotion or other employment decisions.

The above essential functions are representative of major duties of positions in this job classification. Specific duties and responsibilities may vary based upon departmental needs. Other duties may be assigned similar to the above consistent with the knowledge, skills and abilities required for the job. Not all of the duties may be assigned to a position.
