Prepared by:

Center for Governmental Services

Auburn University

December 2005

C o n t e n t s

Program Goals and Descriptions	1
Programs by Alabama County	55
Programs by Alabama Senate District	68
Programs by Alabama House of Representatives District	82
Programs by Educational District	119
Programs by State	126
Programs by Country	135

Program Goals and Descriptions

**Goals are listed for each Outreach Program followed by
Program descriptions**

Academic Certificate Program in Community Employment Services

- Train practitioners to enhance employment opportunities for individuals with disabilities

The Academic Certificate Program in Community Employment Services project has had 130 participants complete the program designed to train practitioners to enhance employment opportunities for individuals with disabilities.

For more information, please visit <http://www.auburn.edu/academic/education/sences/>

Action: Public Issue Information for Alabama Citizens

- Provide local communities with the tools needed to thrive in our changing environment
- Identify partnerships involving Extension's Community Development program
- Showcase specific programs in order to increase participation across Alabama in Extension's Community Development program
- Inform Alabama citizens of the services and programs related to the Community Development program within the Alabama Cooperative Extension System

The Action: Public Issue Information for Alabama Citizens issues quarterly newsletters that have covered topics introducing readers to and educating readers about Alabama tourism, urban forestry, environmental education, community leadership, community health, radon education, the Alabama Communities of Excellence Program, environmental health, and Perspectives on Economic Development in Alabama. Newsletter readership extends throughout all Alabama counties and throughout the southeast. The next newsletter is planned to educate readers about "Ecotourism in Alabama."

Adapted Physical Education and Individualized Education Plans for Children and Youth with Disabilities

- Promote health-enhancing physical activity for children with disabilities as a lifestyle rather than solely a therapy
- Provide personalized adapted physical education activities and extended Individual Education Plans (IEPs) to children with disabilities
- Provide positive role models for underserved children and youth and for children with disabilities
- Encourage underserved children and youth to engage in physical activity outside of school physical education

The Adapted Physical Education Program for children and youth with disabilities has impacted dozens of children and has accounted for nearly 3,000 hours of contact time that Auburn teacher candidates have with children with disabilities. The program promotes physical activity as a lifestyle rather than solely as a form of therapy and fosters collaboration between program administrators and certifies special educators. The areas of child development, motor development, and diversity awareness are integral to the program. The program administrator received the 1998 College of Education Outstanding Contribution to Outreach Award and the program has helped the department to secure valuable funding

Adherence Clinic

- Evaluate medication adherence in HIV-infected patients
- Evaluate readiness to begin HIV therapy

The Adherence Clinic interviews approximately 30 patients each week regarding their HIV treatment adherence. This allows greater understanding of adherence and helps address factors related to non-adherence. The greater the understanding of the importance of adherence to HIV-infected patients is, the greater their treatment results and improved survival will be. This should also translate into a reduction in medication resistance as well as number of patients who may require hospitalization for infection.

Advanced HACCP

- Teach participants how to audit food safety programs at food processing plants

The Advanced HACCP course has taught 30 participants ways to improve the efficiency of food safety programs at processing plants and how to evaluate the effectiveness of these food safety programs.

After School Movement

- Provide solutions and addressing problems leading to school drop-outs and low achievement scores in Alabama schools
- Provide and secure funding for after school programs
- Raise the standards for schools, teachers, and children

Agricultural Education

- Educate farmers

The Agricultural Education Program has been successful in efforts to educate farmers.

Agricultural Research

- Provide recent, timely, and cost effective information to the producers for use in their own operation
- Provide project leaders and industry representatives information on new technologies that may ultimately benefit producers and consumers
- Foster a link between the local community and Auburn University
- Serve as an outdoor lab for basic research endeavors
- Encourage pre-college students to pursue a career in the sciences

The Agricultural Research project has allowed thousands of individuals to tour research plots or take advantage of research findings through publications and field days over the past five years. The program provides support to agricultural professionals to avoid dependency on foreign agriculture. The Agricultural Research Project has provided a youth dove shoot through the Alabama Department of Fisheries and Wildlife, plans to initiate a composting operation to relieve landfills of yard waste, and plans to bolster the Alabama tourism with several initiatives.

For more information, please visit www.ag.auburn.edu/aaes/

Alabama-Mississippi Rural Tourism Conference

- Develop and present an annual conference to promote best practices in rural tourism development
- Increase the awareness of leaders in rural communities of the economic development opportunities available to them through tourism
- Increase the ability of rural communities to capitalize on tourism opportunities available to them through ecotourism and heritage tourism
- Provide a quality, cost-affordable educational experience by all rural communities

The Alabama-Mississippi Rural Tourism Conference has promoted best practices in rural tourism development and helped rural community leaders to realize economic development opportunities that stem from tourism, especially ecotourism and heritage tourism. The Conference has been conducted for the past five years. Participation has increased from 50 people in the first year to approximately 130 attendees this year and the program has received positive evaluations from individuals who have attended. Georgia, Florida, and Tennessee have each asked to become a part of the Conference.

For more information, please visit www.aces.edu/rtc

Alabama 4-H

- Educate youth
- Increase confidence in Alabama's youth
- Teach young people effective communication and goal-setting skills
- Help youth work toward career goals

The 4-H program recognizes that Alabama's youth need to determine what their career goals are as soon as possible. 4-H offers youth a variety of projects and competitions which allow youth to decide what they like to do. 4-H reaches all youth regardless of their background or family situation and lights a fire that drives youth to be positive about themselves and their future.

For more information, please visit <http://www.aces.edu/fourh/>

Alabama Agri-Tourism Trail and Partnership

- Increase the income available to farmers, agri-businesses, and rural entrepreneurs
- Increase the critical mass of available tourism attractions for promotion by rural communities and tourism organizations
- Develop jobs in rural areas

The Alabama Agri-Tourism Trail and Partnership has helped to market over seventy agri-tourism attractions within Alabama. The Alabama Farmers Federation, Alabama Bureau of Tourism and Travel, Alabama Department of Agriculture and Industry, and Alabama Cooperative Extension System have developed a strong working partnership to meet their goals.

For more information, please visit www.AlabamaAgritourism.com

Alabama Arthritis Coalition

- Educate the public about the multiple forms of arthritis and treatment options
- Educate healthcare providers about treatment options and referral options for patients with arthritis
- Increase awareness of arthritic diseases in Alabama

The Alabama Arthritis Coalition hosts approximately 50 participants in the annual meeting and presentation and at least 25 to 50 participate in presentations provided to healthcare practitioners and to the public to educate them about arthritis, treatment options, and referral options.

For more information, please visit <http://www.adph.org/arthritis>

Alabama Association of Public Personnel Administrators Education and Certification Program

- Provide an education program to assist Alabama's public personnel administrators to conduct their functions in a professional, efficient, and effective manner
- Provide certification to those public personnel administrators, professionals, and administrative support staff employed in an Alabama government organization who are responsible for various phases of personnel administration
- Enable achievement of the designation of Alabama Certified Public Personnel Administrator or Alabama Certified Public Personnel Specialist through successful completion of specified coursework and a comprehensive examination

The Alabama Association of Public Personnel Administrators Education and Certification Program has trained approximately 500 public personnel administrators in the past five years. Thirty-six program participants have received their certification and others have received continuing education.

For more information, please visit www.aappa-hr.org

Alabama Beef Cattle Improvement Association

- Promote the use of performance records to improve herd production, efficiency, and quality
- Provide a total herd testing performance program
- Emphasize that economically important traits in beef cattle can be improved through selection and culling programs based on records
- Emphasize the importance of good management practices in breeding, feeding, health, and marketing

The Alabama Beef Cattle Improvement Association seeks to improve beef cattle in Alabama. The Association emphasizes that economically important traits in beef cattle can be improved through selection and culling programs based on records. The Association also recognizes the importance of good management practices in breeding, feeding, health, and marketing programs. The Alabama Beef Cattle Improvement Association has had visible results. Producers are seeing improved weights at weaning. For example, one Marengo County producer had weaning weights go up 35 pounds on average in just the second year of Association participation, and a Shelby County producer had his weaning weights jump almost 40 pounds in one year.

Alabama Beef Shortcourse

- Educate beef producers in emerging technologies
- Educate producers in alternative methods of marketing

The Alabama Beef Shortcourse program allows producers to interact with scientific leaders in their fields and introduces them to emerging technology and alternative methods of marketing that can positively impact their financial outlook.

Alabama Black Belt Activity

- Bring educational resources and opportunities to Alabama's Black Belt Region
- Identify and address challenges faced by the region, including community and economic development
- Develop a booklet that introduces society to the "divide" that exists with the Black Belt region and the rest of the State
- Use produced booklet to highlight successful programs and to encourage continued support in the Black Belt region
- Identify areas of focus for Auburn University in the region based on compiled data
- Define a strategy to deal with future challenges in the Black Belt region
- Collect a series of photographs which represents the area

The Alabama Black Belt Activity program brings educational resources and opportunities to the Alabama's Black Belt region, helps identify and address regional challenges, has developed a booklet introducing the divide of the region with the rest of the State, and has compiled data to help Auburn University identify areas of focus in the region and to strategize ways to deal with future regional challenges. Additionally, a series of photographs that represent the impact area is being collected.

For more information, please visit <http://www.auburn.edu/outreach/alabamablackbelt/>

Alabama Communities of Excellence

- Provide assistance and recognition to Alabama's smaller communities and award a small amount of money to communities that complete the program
- Help small communities to develop effectively
- Provide resources and technical support
- Facilitate development of strategic plans and leadership development

Alabama Communities of Excellence (ACE) is a unique partnership among business, agriculture, institutions of higher education, government agencies, etc. to help small communities improve their economic and community development opportunities. The Alabama Communities of Excellence program provides assistance and recognition to many participating small Alabama communities. Four out of 14 communities have completed the program and nine are progressing successfully through the program. When the program is completed, the participating community receives a small monetary award and recognition from the Governor. The program helps communities develop effectively, create strategic plans, and create leadership development. The program also provides resources and technical support to participants and communities.

Alabama Grazing School

- Expose producers to grazing management

The Alabama Grazing School offered an intensive two day course exposing producers to grazing management and how it can be used successfully on their farms. Surveys indicate that in 2002 more than 500 livestock producers have improved their grazing management techniques as a direct result of Extension efforts.

Alabama Historical Commission

- Protect, preserve, and interpret Alabama's historic places

The Alabama Historical Commission, which is the State's historic preservation agency, operates 12 historic sites, coordinates various preservation programs (nominations to the National Register of Historic Places, the Mainstreet Program, etc.), and has various regulatory programs relating to the identification and preservation of cultural resources. Commission programs provide jobs to approximately 100 people and serves as an educational and advocacy agency for the identification, preservation, and interpretation of Alabama historical places and cultural resources. As an agency that receives both State and federal funding, the Alabama Historical Commission interacts closely with state and federal elected officials on a variety of issues. The Commission also works with local historic preservationists on legislative initiatives that will further the Commission's mission. Additionally, the agency has an interest in ensuring Alabama and federal laws address and remedy historic preservation and archaeological resource concerns. The Alabama Historical Commission is governed by a board of 21 Commissioners as defined by the Code of Alabama. At Auburn, there is statutory representative of the Commission who also serves as a member of the Executive Committee of the Commissioners, which is empowered to act on behalf of the other Commissioners between quarterly or called meetings.

For more information, please visit <http://www.preserveala.org/>

Alabama Local Government Records Commission

- Conduct surveys of public records created by counties, municipalities, and other agencies of local government
- Determine which local government records "shall be permanently preserved because of historical value and which . . . may be destroyed or otherwise disposed of. . ."
- Issues retention guidelines and other regulations for local government records, based on their evidential, informational, and historical value
- Approves records destruction requests submitted by local government agencies

The Alabama Local Government Records Commission, established in 1987, has developed comprehensive records disposition guidelines for Alabama counties and municipalities. Local government efficiency has been improved and record-retention practices have become more effective. The commission consists of 12 members, Director of the Department of Archives and History, the Chief Examiner of the Department of Examiners of Public Accounts, the Attorney General, the Secretary of State, six local officials (appointed by the Governor), and historians selected by the heads of the Departments of History at the University of Alabama and Auburn University.

Alabama Local Government Training Institute Education Program for County Commissioners

- Provide two educational levels of training and professional development for Alabama county commissioners
- Develop and maintain high standards of public service among county commissioners
- Increase knowledge about the roles and responsibilities of county commissioners
- Provide an information base for policy making
- Improve the overall administration and delivery of county services

The Alabama Local Government Training Institute has enjoyed an excellent decade of operation. Participation in the mandatory training program has been exceptional. Approximately 350 county commissioners have taken courses through the Alabama Local Government Training Institute program within the last five years. Of these 350 county commissioners, 290 met State mandated requirements and 77 went on to successfully complete the graduate program.

For more information, please visit www.auburn.edu/algti

Alabama Local Tax Institute for Standards and Training Certified Revenue Examiner Program

- Administer the Alabama Certified Revenue Examiner Program in accordance with the Alabama Local Tax Procedures Act through the partnership of the Alabama Local Tax Institute of Standards and Training (ALTIST) and the Center for Governmental Services
- Certify private examiners of sales and use tax accounts to enhance professionalism and integrity in the examination of business records
- Develop competence in the conduct of examinations and compliance with Alabama laws governing sales, use, rental, and related taxes
- Assist private examiners to remain current in their field through continuing education

The Alabama Local Tax Institute for Standards and Training - Certified Revenue Examiner Program currently has 139 participants. Seventy-nine of the participants are certified and are working on their continuing education and 60 are working toward their certification.

For more information, please visit www.auburn.edu/cre

Alabama Municipal Revenue Officers Conference

- Provide an education program to assist municipal revenue officers in their continued development of skills and abilities to obtain expertise and status in their profession

The Alabama Municipal Revenue Officers Conference serves 252 current members in the Municipal Revenues Officers Association and educates other municipal and county officials about revenue generation and processing at the local government level.

For more information, please visit www.auburn.edu/cgs/training

Alabama Prison Arts and Education Project

- Promote education as important to individual success and growth through the development of libraries and the provision of arts and humanities educational opportunities to correctional facilities in Alabama

With the Aid to Inmate Mothers program, the Center for the Arts & Humanities sponsored its first visiting writer at Julia Tutwiler Prison for Women in 2001. In 2002, the Alabama Prison Arts & Education Project started as a formal program when it received funding from the Alabama State Council on the Arts. Recognizing that education helps to equip individuals to become better citizens and contribute to the communities they live in, the Alabama Prison Arts and Education Project has had the participation of approximately 400 students at four Alabama correctional facilities. Students come from every county in the State and even other states and countries. Teachers from a wide variety of disciplines and various artists are engaged in the education initiative. The Project has organized the donation of approximately 12,000 books to 12 Alabama and one Louisiana correctional facilities. In early 2004, the Project received a \$20,000 grant from the National Endowment for the Arts. In late 2004, the Project received grants from the Alabama State Council on the Arts and the Southern Poverty Law Center totaling almost \$10,000. In late 2005, the Project received a grant from the Alabama State Council on the Arts for \$10,725. Another grant was awarded from the Alabama Humanities foundation for \$2,250 which includes a match for funding received from the Puffin Foundation.

For more information, please visit www.auburn.edu/cah/apaep; http://www.ocm.auburn.edu/news_releases/artontheinside.html; and http://www.ocm.auburn.edu/news_releases/prisonartgrants.html

Alabama Radon Education Program

- Educate and make aware the citizens of Alabama and perspective homebuyers about radon risks, protection, and mitigation methods
- Encourage home testing for radon
- Educate at-risk homeowners about how to eliminate radon from their home
- Educate buyers of homes being built about the benefits of building their home radon-ready
- Educate homebuyers to test prospective homes for radon before purchase and have it mitigated if radon is found

Since October 1997, the Alabama Radon Program has been responsible for distributing over 20,000 radon tests, with 47.3% of the tests being utilized. Homes reported to be built radon-ready number over 1,300, houses mitigated for radon number over 1,000, and homes tested for radon in a real estate transaction number over 800. The program has reached over 24 million potential households through the media, offered radon exhibits to over 565,000 viewers, and have presented programs to over 231,000 people, both adult and youth. Because of our efforts, the cities of Decatur, Hartselle and Falkville adopted radon control methods with their building codes, thus ensuring that new homes would be equipped to eliminate radon from these new homes if tests show the home has a radon problem. Over 23% of the homes tested for radon have indicated high radon levels.

For more information, please visit www.aces.edu/radon

Alabama Reading Initiative

- Improve public school reading instruction and achievement
- Prepare teachers and reading coaches to deliver effective, assessment-based reading instruction
- Familiarize teachers and reading coaches with scientifically based reading research
- Provide ongoing professional development to build teachers expertise in teaching reading
- Collaborate to improve reading education courses and programs for pre- and in-service teachers

The Alabama Reading Initiative has reached over 500 schools and thousands of teachers and students to improve public school reading instruction and achievement in Alabama.

For more information, please visit www.alsde.org

Alabama Retiree Relocation Association

- Increase the awareness of community leaders, including elected officials, that the attraction of affluent retirees is an effective economic development tool for Alabama
- Develop and conduct an annual retiree attraction conference to promote best practices of the retiree attraction industry
- Develop a statewide network of individuals interested in retiree attraction

The Alabama Retiree Relocation Association has published three ACES retiree publications designed to detail reasons and means to attract retirees to Alabama communities and has developed an annual conference that promotes best practices. The project has also developed a partnership that includes Alabama's Advantage for Retiree Attraction and Relocation, Alabama Power Company, Alabama Sunrise Region, Southeast Alabama Trails, Alabama Cooperative Extension System, and many local communities.

Alabama Science in Motion

- Increase student interest in science
- Provide equitable resources to all public schools
- Enhance teaching through curriculum and staff development
- Establish a teacher network among high school teachers and with university faculty

The Alabama Science in Motion program serves an average of 15 school systems each year, reaching 20 schools, 30 teachers, and 2,800 students.

For more information, please visit www.auburn.edu/ausim

Alabama State Records Commission

- Conduct surveys of public records created by State agencies
- Issue regulations classifying all public records and prescribing the period for which records of each class shall be retained
- Determine which public records shall be preserved permanently because of historical value and which records may be destroyed or otherwise disposed of
- Approve records disposal requests submitted by State agencies prior to the records destruction

The Alabama State Records Commission was created and authorized by State law in 1955. The Commission developed records disposition schedules to promote efficiency of State agency operations, to promote public accountability, and to insure that valuable records are preserved.

For more information, please visit <http://www.archives.state.al.us/officials/state1.html>

Alabama State Water Program

- Help Alabama citizens and others better relate to water issues and concerns and assist them in identifying and solving water-related problems by providing internet-based resources
- Provide statewide GIS data that has application to land and water resource assessment, planning, management, restoration and pollution prevention

The Alabama State Water Program partnership with the USDA CSREES and Land Grant Colleges and Universities has provided web-based resources about water and land based resources that have been accessed by over 200,000 people since 2001. Since some of the information databases are developed to be generic, some other states make more use of this information than Alabama citizens. Our statistics indicate that over 3000 Alabama citizens will have accessed information from the databases by the end of 2005.

For more information, please visit <http://www.aces.edu/waterquality>

Alabama Student Tracking System

- Gather data on students with disabilities in order to provide information about their high school preparation programs and the effects if any those programs had on their post-school status
- Improve transition planning and related service programs at the local level
- Serve as an accountability index regarding the performance of Alabama's youth and young adults with disabilities
- Provide prescriptive feedback to those school systems that have a need for program improvement

Through the Auburn Transition Leadership Institute, the Student Tracking Outreach Project provides a sound basis for program improvement in public school systems, as well as an index of educational accountability beyond the school years. First, information obtained can ultimately lead to improved high school programs for students with disabilities and consequently improve their lives. Second, the general population benefits because improved outcomes for students with disabilities will result in more young adults who are economic contributors and integrated members of society. Finally, its significance lies in the fact that states are now being mandated to develop and implement similar student tracking programs for students with disabilities. The Student Tracking System has tracked data obtained on over 16,000 Alabama students with disabilities over the last nine years, representing students from more than 75% of Alabama's public school systems. Alabama is now considered a national leader in student tracking through the System and it is now implemented through the Auburn Transition Leadership Institute.

For more information, please visit <http://education.auburn.edu/academics/depts/rse/outreach/transitioninstitute/studenttrackingsystem/studenttrackingsystem.html>

Alabama Technology Network

- Strengthen Alabama's existing industry

The Alabama Technology Network has helped industry to increase sales by \$24.8 million, to retain sales of \$495.2 million, and to save in costs by \$24.5 million. Clients report that 693 jobs have been retained and 204 jobs have been created. Investment has increased by \$23.6 million. The Network has served 490 clients and completed 544 projects.

For more information, please visit www.atn.auburn.edu and http://www.ocm.auburn.edu/news_releases/techcenter.html

Alabama Technology Transfer Center

- Identify non-credit continuing education needs, conduct training, and evaluate program effectiveness

The Alabama Technology Center program has offered 195 training seminars and has reached over 28,000 participants in the past 20 years.

For more information, please visit <http://alabamat2.org/>

Alabama Tourism Partnership

- Develop a general policy for Alabama tourism involving discussions among eight statewide private and public organizations and agencies
- Raise awareness that tourism is a significant component of Alabama's economic development
- Improve the communications between the diverse components of tourism

The Alabama Tourism Partnership has helped increase the awareness of the importance of tourism to the State's economy, especially in Alabama's Legislature. The Partnership helped promote the annual Governor's Conference on Tourism and provided much needed representation for rural communities.

Alabama Transition Conference

- Positively impact the quality of life for Alabama's youth and young adults with disabilities as well as their significant others
- Increase participants' knowledge of transition problems, issues, resources, and programs, especially as they pertain to Alabama
- Expand and strengthen the network for all persons interested in Alabama's youth and young adults with disabilities who are in transition from school to work and community

The Alabama Transition Conference has hosted more than 8,000 participants from Alabama and other states in the region. Over 700 registrants are expected to attend the 2006 conference. The Alabama Transition Conference has been recognized as the best in the nation for numerous years and has drawn accolades from representatives from the U.S. Department of Education and leaders in the field of Transition.

For more information, please visit <http://education.auburn.edu/resourceesservices/tli.html> and http://www.ocm.auburn.edu/news_releases/browning.html

Alabama Urban Forestry Partnership

- Oversee the provision of more than \$250,000 in grant money
- Provide training to local tree commissions and beautification boards
- Provide youth education projects regarding trees in urban environments
- Support Arbor Day celebrations and urban forestry fairs
- Provide an internship and mentoring for youth and students

Alabama Voices: Writers in the Community

- Promote the reading and appreciation of Alabama writers
- Encourage reading and literacy

Alabama Voices: Writers in the Community has been fostering reading, promoting literacy, and the encouraging the appreciation of reading for ten years. Alabama Voices takes writers and cultural programs to communities all over the State. Each year, ten programs average between 800 and 1,000 participants each. The program encourages partnership, builds capacity, and fosters the development of local expertise and confidence in public programming. Alabama Voices has many more requests for programming than it can serve.

For more information, please visit <http://www.writersforum.org/programs/voices/>

AlabamaView

- Promote Research, Education, and Outreach of geospatial technology to Alabama citizenry
- Archive and share geospatial datasets amongst universities and State agencies online and make them available to the public for free
- Provide scholarships to students interested in using geospatial technology in a career
- Develop a workforce that has the ability to use geospatial technologies to help solve problems
- Aid in the economic development of the State of Alabama

AlabamaView funded a project at the US Space and Rocket Center that developed a statewide flyplan in which orthoimagery would be collected on a 4 year cycle. It is estimated that this flyplan, if implemented, could save the State several million dollars in the collection of orthoimagery used for mapping. It would also provide a regular cycle of image collection in a standardized format. The AlabamaView project has also started to provide free GIS and RS datasets to help educators provide classroom practical hands-on learning applications.

For more information, please visit www.alabamaview.org

Alley-cropping in Alabama

- Determine if "alley-cropping can be a viable and economical alternative to conventional pipe-outlet terraces for soil and water conservation in the southeastern United States

Thus far, the Alley-cropping in Alabama project has helped to determine that switchgrass has proved to be the most successful in reducing the surface water runoff and soil loss.

Alma Bryant High School Aquaculture Program

- Expand the school's ability to provide hands on science and math educational environment to students
- Expand the Alma Bryant High School Aquaculture Program
- Provide a demonstration site for other high school teachers in Southwest Alabama interested in beginning a program of their own
- Serve as a site for university research replicates to be carried out to the benefit of students who get a real world participation opportunity and that allows researchers to receive valuable data that corresponds with their work
- Investigate potential aquaculture species for commercial use in Alabama

The Alma Bryant High School Aquaculture Program provides two to three classes twice each year reaching approximately 30 students per class. The program has also led to advances in feed studies for red snapper and drawn more attention to the use of the Australian Red Claw as an aquaculture species in Alabama.

American State Administrators Project

- Gather information on State agency heads, agency activities, and inter governmental relationships
- Provide a report for administrators who participated in the project
- Provide data for scholarly journals and practitioner reports

Typically, about 1000 State agency heads across the country participate in the survey project. Agency heads use the comparative state government to benchmark the quality and experiences of their own agencies. Additionally, others read the reports and articles that appear in Public Administration journals. The Administrators Project allows graduate students to learn survey techniques and data analysis while pursuing this research

Angel Tree Project of the Salvation Army

- Promote service learning in nursing students
- Encourage community involvement in nursing students
- Provide Christmas gifts for needy children in the Auburn/Opelika area

The Angel Tree Project of the Salvation Army has engaged 400 nursing students in the past two years and has provided 200 needy children in the Auburn/Opelika area with holiday gifts. The children who receive the Christmas gifts are the very needy and underserved children in Lee County. The emotional, social, and psychological benefits to this population are great.

Anger Management

- Prevent child abuse
- Strengthen resiliency of families
- Educate citizens on how to respond to situations of abuse and violence

The project has educated more than 8,000 citizens.

Annual All Crops Field Day

- Distribute and demonstrate the latest agricultural research done at the research center

The Annual All Crops Field Day hosts approximately 125 attendees each year who interact with 10 to 15 University researchers who provide information to area farmers.

Anticoagulation Service

- Keep patient's lab values in desired therapeutic range
- Prevent adverse events related to medications
- Improve patient education

The Anticoagulation Service has helped 175 patients manage their warfarin therapy. The program averages approximately 30 patients each week. The initial results were positive indicating that 54% of patients managed by the pharmacist-run anticoagulation clinic were in their desired range versus 50% of patients previously followed by physicians. This is associated with fewer bleeding complications as well as fewer complications related to blood clots. The review also indicated that a greater percentage of patients followed by the pharmacist-run anticoagulation clinic were being monitored on a consistent monthly basis (93.2%) versus patients followed by physicians (87.2%). These numbers indicate close follow-up which usually translates into fewer complications for patients and better healthcare outcomes.

Appalachian Leadership Clearinghouse

- Encouraged the participation of Appalachian residents in leadership development programs aimed at community improvement
- Provided all communities and community organizations with access to capacity building activities to enhance their ability to marshal resources, plan, and develop solutions to local problems

The Appalachian Leadership Clearing House allowed students from the region to participate in leadership development training designed to help improve regional communities in the future. The program also involved local leaders and mentors to stimulate interest in community service.

For more information, please visit www.auburn.edu/student_info/student_affairs/arclc/info/html

Appalachian Regional Commission

- Assist low-income communities with community-based research to help them out of poverty

The Appalachian Regional Commission helps low income communities through their research. This research will be used to help community members out of poverty.

For more information, please visit <http://www.arc.gov/index.do?nodeId=1>

Architecture Summer Camp

- Introduce high school students to the field of Architecture

The Architecture Summer Camp enrolls 40 students each summer.

For more information, please visit <http://www.auburn.edu/outreach/architecture/>

Arthritis Presentation

- Provide multidisciplinary education on arthritis management to the Montgomery area

The Arthritis Presentation - Montgomery Arthritis Education Forum has had approximately 50 attendees and ten to twelve speakers. The Program is funded by Dr. Paul, a Montgomery rheumatologist.

Aspiring Youth to Achievement

- Increase the number of Lowndes County high-school students who pursue post secondary education
- Inspire students to achieve higher ACT, SAT, and AHSGE scores
- Increase student understanding of commitment to their home communities
- Increase participants awareness and comfort with careers which make them producers rather than consumers

In Lowndes County, close to 25% of the adult population lack high school diplomas. The route to escaping poverty for any group is education and land-ownership. The Aspiring Youth to Achievement project seeks to provide ideas to students about being manufacturers instead of consumers. In addition, the program recognizes that clarifying training methods is invaluable. The Aspiring Youth to Achievement program is in its inception stages.

Assessment of HIV Medical Care as it Relates To National Clinical Guidelines

- Evaluate HIV viral load and CD4 cells monitoring frequency
- Evaluate appropriateness of medication prophylaxis against opportunistic infections
- Evaluate delivery of indicated immunizations to HIV infected patients (ex: flu, hepatitis)

The Assessment of HIV Medical Care program has provided quality assurance information back to the health care institution in an effort to address deficiencies and optimize evaluation of the HIV-infected patients receiving primary care.

Association of Student Pharmacists - Health Fair

- Provide screening and education for multiple disease states for the Auburn community

The Association of Student Pharmacists - Health Fair program allows visitors at Auburn's mall to have their blood pressure, weight, waist circumference, and blood sugar evaluated. Education was provided on various medical topics and participants were encouraged to bring their medications for evaluation by a pharmacist or pharmacy student.

Asthma Education Video - Extension Agency

- Educate extension agents about asthma management and medication administration
- Educate patients about asthma medications

The Asthma Education Video was expected to be distributed to extension agencies throughout the southeast in an effort to educate agents and patients about asthma management and medication administration.

Auburn Baseball Home Run Derby and Scrimmage

- Raise money for the Boys and Girls Club of Auburn

The Baseball Home Run Derby and Scrimmage has involved approximately 100 children.

Auburn Football Hosts Hurricane Katrina Victims

- Give evacuees the opportunity to attend an Auburn football game

The Auburn Football Hosts Hurricane Katrina Victims program gave evacuees the opportunity to attend the Auburn football game against Ball State.

Auburn Parks and Recreation Day Camp Outreach

- Foster student-athlete interaction with children in the community
- Strengthen the relationship between the athletics department and the city of Auburn

The Auburn Parks and Recreation Day Camp Outreach has allowed 150 children in the community to interact with student-athletes, thus strengthening the relationship between the athletics department and the city of Auburn.

Auburn Technical Assistance Center - EDA University Center

- Facilitate economic development in all Alabama counties

The Auburn Technical Assistance Center - EDA University Center conducts approximately 100 projects each year linking service and manufacturing organizations and University resources to facilitate economic development. The Auburn Technical Assistance Center helps medium and large industries and organizations address problems to improve efficiency and effectiveness. ATAC forms project teams to help organizations address specific topics as diverse as marketing, strategic planning, business retention, technology transfer and industrial recruitment. Services are delivered by 20 faculty members and 12 graduate and undergraduate students. In 2005, 161 projects were completed creating \$2.3 million in private sector investment. Since 1994, some 1297 projects in 63 Alabama counties have been completed. The program is the longest standing University-based economic development program in the State (started in 1976) that links University resources to specific economic development projects.

Auburn University African-American Entrepreneurship Summit

- Help African-American business owners strengthen their business for global competition

The Auburn University African-American Entrepreneurship Summit has hosted approximately 10 annual conferences with an attendance at each reaching up to 500 participants. Participants received help in strengthening their businesses for global competition. The "Teen Challenge Summit" hosted 400 teens for a Youth Entrepreneurship conference that enabled them to explore career choices and learn about business loans, establishing credit, managing bank accounts, paying taxes, business planning, ethics, and marketing a business. Three conferences of this nature have been held.

Auburn University Early Learning Center

- Provide a model childcare program for the general public so participants in other programs can visit and learn high quality appropriate childcare practice techniques
- Provide a research population and venue for graduate students and professors

The Auburn University Early Learning Center involves approximately 30 to 40 undergraduates in educating approximately 36 students each year. The Center provides an observation booth that hosts over 400 annual visitors. This includes parents, other child care professionals who have come to the Center to observe a model program, students from Auburn and from other campuses and researchers. Many of the Center's undergraduate educators take the skills they have learned at the Center and apply them to the jobs they obtain upon graduation. The students who study at the Center often go on to jobs around the country. They take the best practice ethic that we have instilled in them to their work in preschools and daycares, hospitals, universities and a myriad of other related jobs. At least 3 parents have decided to pursue work in the field of education and childcare because of their experiences as parents in the Center. Occasionally we have undergraduates working at the Center who were preschool children at the Center. 25 to 40 Phenix City high-school students involved in child-care curriculum also receive educational experiences at the Center. The Center's participants and observers in turn educate others about learned practices and apply their skills in post-graduation careers. The Center enjoys a positive reputation in Alabama and nationally as well.

For more information, please visit www.humsci.auburn.edu/publish.php?=29

Auburn University Rural Studio

- Give students of the School of Architecture the opportunity to learn the critical skills of planning, designing, and building in a concrete, practical, and socially responsible manner
- Form leadership qualities by instilling the social ethics of professionalism, volunteerism, individual responsibility, and community service
- Help communities by partnering with State and local welfare agencies to provide suitable and dignified housing
- Develop materials, methods, and technologies that will house the rural poor in dignity and mitigate the effects of poverty upon rural living conditions

Over fourteen academic years, the Rural Studio, an architecture program within the School of Architecture at Auburn University, has designed and built more than 50 community projects and more than 15 charity homes in west Alabama. Over 600 architecture students have been educated in a service-learning model that has gained national and international recognition. The Rural Studio educates architects who have a refined awareness of necessary social, cultural, and technological concepts of designing and building. Honored for his exceptional work at Rural Studio, the late AIA Gold Medalist, Samuel Mockbee and colleague D.K. Ruth conceived the studio as a method to improve the living conditions in rural Alabama while educating architects utilizing the concept of service learning. The Studio's annual operating budget is in excess of \$400,000 and the annual project budget is usually over \$200,000. Most of this money is spent locally in West Alabama. The Rural Studio employs 8 people locally in Hale County. In a survey of Hale County residents, 98% of the respondents felt that AU Rural Studio had a "very positive" impact on their community both financially and socially.

The Rural Studio program was awarded the 2005 Award for Distinguished Service to Rural Life from the Rural Sociological Society, the first time this award was given to an educational program. In addition to a direct impact on the community and State, the Rural Studio has garnered national and international recognition which has a positive impact on the school and the State. Rural Studio is frequently featured on CBS Sunday Morning, ABC Nightline, CNN's Future Watch, The Oprah Winfrey Show, Home and Garden Television, and numerous public radio and television programs. The recently published book, "Rural Studio: Samuel Mockbee and an Architecture of Decency" is a Princeton Press's best seller, now in its fourth printing, and its sequel "Proceed and Be Bold: The Rural Studio After Samuel Mockbee" was recently published to rave reviews. Rural Studio articles have appeared in more than 700 contemporary and architectural magazines.

For more information, please visit www.ruralstudio.org

Auburn University Tax Practitioner Seminar

- Deliver instruction on current tax law to tax practitioners in Alabama

The Auburn University Tax Practitioner Seminar program is sponsored by the Outreach Program Office in cooperation with the Internal Revenue Service and the Alabama Department of Revenue. For over thirty years, this program has provided continuing education for tax practitioners, enrolled agents, certified public accountants, public accountants, and attorneys. The Auburn University Tax Practitioner Seminar delivers instruction on current tax law to 1,500 to 1,600 Alabama tax practitioners annually. These practitioners report that they prepare over 400,000 tax returns utilizing training received in the seminar.

For more information, please visit www.auburn.edu/outreach/tax and http://www.ocm.auburn.edu/news_releases/taxseminars.html

Auburn Urban Studio - Birmingham SOA

- Provide planning and design expertise for the towns and communities of Alabama
- Raise awareness of the value of planning and design in economic development and quality of life
- Provide architecture students with opportunities to work in conjunction with the outreach opportunities of the Urban Studio on real projects in Birmingham and in towns and communities across the State
- Provide strong connections between practicing professionals (architects, landscape architects, planners, interior designers and constructors,) the School, Auburn, and students in the professional programs of the School of Architecture
- Partner with like organizations, non-profits, and professionals to leverage the assets and opportunities of Alabama for advancing economic potential and quality of life

The Auburn Urban Studio - Birmingham School of Architecture outreach programs have reached many constituencies. The programs have resulted in an Appalachian Regional Commission sponsored Youth Leadership Training grant; design studies for Birmingham districts, and a Small Town Design Initiative program that has worked with over 35 towns and communities with a collective citizenry of over 400,000 people. The Urban Studio has supported work in Birmingham on the Center Master Plan, the Railroad Reservation Park, Red Mountain Park, Village and Valley Creek Greenways, Woodlawn, Ensley, Lakeview, Hope VI project and the Magic City Art Connection program - Eye Beam - for students in the public schools. Members of the Studio have or are working in 17 communities in ARC distressed counties as part of their Flex-E grant program (three grants of \$96,000-110,000 each.) The program is one of three in the US participating in at Trilateral Exchange as part of the Department of Education's FIPSE grant program. This is in conjunction with the University of Illinois Chicago and Oklahoma State and involves student exchange with three schools in Canada and three in Mexico. The Urban Studio's work gives communities a competitive tool for attracting grants, partners and resources and results in valuable promotion for communities.

For more information, please visit www.lib.auburn.edu/architecture/resources/urbanStudio/index.html

Autism Center Model Demonstration Program

The Model Demonstration Program serves children with autism alongside typical peers and is unique in the country. The program was developed based on the latest autism research and meets all National Research Council recommendations. The Auburn University Autism Center Model Demonstration Program has provided direct services to 11 children with autism and currently has a waiting list. On-site training has been provided to 504 parents and professionals from the region and Turkey. Sixty-five graduate and undergraduate students have received practicum and internship experiences through the Program. A research replication site for the program is housed in Birmingham, serves 16 children with autism, and is participating in program outcome research and publication. Program co-directors monitor program integrity at the research replication site.

For more information, please visit www.auburn.edu/autismcenter

Autism Center Statewide Parent/Professional Training

- Provide information on the comprehensive services available to individuals with autism, their families, schools, and other agencies through the Auburn University Autism Center
- Present the latest neurological, epidemiological, and biomedical autism research
- Provide information on the Center's empirically-based model of intervention
- Provide information on critical dimensions in autism program development

The Auburn University Autism Center Statewide Parent/Professional Training program has provided training to 635 professionals and 64 parents. The Alabama State Department of Education and the Alabama Council for Developmental Disabilities has provided funding to provide training in numerous Alabama cities. At present, the Center's training is the only outreach training available to meet the critical need in Alabama.

For more information, please visit www.auburn.edu/autismcenter

Autism Center Summer Educational Clinic

- Provide Auburn University graduate and undergraduate students with a model demonstration site for optimal practicum and internship experiences
- Prepare practicum and internship students for future professions in the field of autism
- Provide optimal services to individuals with autism in a model program based on the latest research

The Auburn University Autism Center Summer Educational Clinic has served 54 individuals with autism and currently has a waiting list of children whose families desire service. The Center provides a much needed service since extended-year autism services are scarce. Over 40 visitors from the region have benefited from on-site observation and 45 graduate and undergraduate students have gained practicum and internship experiences in the Clinic. Auburn University students are recruited with fervor upon graduation as Auburn University boasts the lone program in the region offering specialization in autism.

For more information, please visit www.auburn.edu/autismcenter

Battling Childhood Obesity

- Assess BMI of children
- Study diets of target group
- Study activity levels of target group
- Modify diets to focus on intake of calcium and fiber
- Increase exercise in target group
- Provide specific dietary and activity strategies for 4th and 5th graders living in selected counties during 2003 and 2004
- Modify increased risks for obesity, diabetes, cardiovascular diseases, and cancers

The Battling Childhood Obesity program assess children's BMI, diets, and activity levels and seeks to modify diets towards ones more nutritional, to increase exercise, to provide exercise strategies, and to mitigate risks for obesity, diabetes, cardiovascular diseases, and cancers.

Battling Cogongrass in Alabama

- Institute regional programs to help nursery managers economically produce healthy and vigorous planting stock

For this project, a team of Extension personnel and industry representatives provided information on the control and management of cogongrass to diverse audience of public officials, timber industry representatives, and local landowners. Extension has provided the latest research and management practices to these audiences and provided them with effective tools to manage and eradicate cogongrass.

Battling Formosan Subterranean Termites in Alabama

- Educate the Alabama public about Formosan Subterranean Termites

For this project, a number of Extension agents put their training to work in their own counties by conducting programs or demonstrations and writing newsletter or fact sheets to educate the public about Formosan Subterranean Termites.

For more information, please visit http://www.auburn.edu/administration/univrel/news/archive/03_03news/03_03termite.html

Battling the Tomato Spotted Wilt Virus

- Assist the peanut growers in fighting TSWV
- Develop an integrated approach with several pest management tools
- Optimize peanut production

During this project, peanut growers have been assisted in fighting the Tomato Spotted Wilt Virus. An integrated approach with several pest management tools was undertaken, and peanut production was optimized.

Beginning Education Early (BEE) program

- Increase parental capacity to provide appropriate guidance, emotional support, and involvement in school readying behaviors
- Provide parenting information and early childhood education
- Use a classroom-on-wheels format to show everyday parenting behaviors
- Facilitate school-readiness

The Beginning Education Early Program works one-on-one with more than 1,250 parents and families of preschool-age children in eight Alabama counties. Sixteen paraprofessional educators living in the targeted communities were recruited, hired, and trained to emphasize the importance of the parent's role as a child's first teacher. Results have been positive with reports from parents that they learned about parenting and childcare and with the ability of many participants to identify specific ways that the program positively influenced their relationship with their children. In addition, participants reported an increase of appropriate teaching behaviors in various areas.

The program benefits the wider community, as well. For example, training of BEE program personnel builds community capacity to work with low-income, at-risk families. Macon and Perry county program coordinators and the Macon county supervisor received

FACTS training (developed by the Cornell Empowering Families Project) designed to prepare front-line workers to build the strengths of families and the communities in which they live and to promote the development of healthy interdependence with the community and self-reliance for families.

For more information, please visit www.humsci.auburn.edu/abell/beeprogram/beeprogram.htm

Best Practices of Community Festivals

- Identify and disseminate best practices in conducting community festivals
- Conduct annual conferences on festival best practices
- Improve economic development in the State and region through successful community events

The Best Practices of Community Festivals program is the only one in Alabama that has focused on stimulating economic development through facilitating the creation of community festivals and expertise in the management of festival best practices. Five Best Practices of Community Festivals conferences have enjoyed the participation of over 200 people. Best practices in conducting community festivals were identified through research conducted in Alabama and a monograph was published detailing the findings. More than 500 monographs have been distributed to interested parties in Alabama. The program has helped to create several new community festivals.

BEST Robotics Competition

- Engage middle and high school students in robotics competition

The BEST Robotics Competition program has engaged 400 middle- and high-school students in Alabama. The program increases student interest in science, math, and engineering as well as college and showcases Auburn to potential future students, mentors, and business and governmental leaders inside and outside of the region. The Competition has received media and press coverage.

For more information, please visit <http://www.southsbest.org/about/history.html>; <http://www.alabamabest.org/>; and http://www.ocm.auburn.edu/news_releases/bestcompetition05.html

Biomass Grant

- Conduct focus groups to determine level of knowledge re: alternative energy
- Determine how much citizens would pay for alternative energy, if they want alternative forms of energy, how they get information about energy, and how to effectively educate about alternative energy

The Biomass Grant has provided to State officials and electric power companies a comprehensive report on focus group data collected to determine the level of citizen knowledge regarding alternative energy and their opinions about alternative energy. They also learned how "best" ways to educate citizens and to promote biomass energy to reduce pollution, provide jobs for Alabama farmers, and keep money in the State.

Bioremediation at Sanders Lead, Troy, AL

- Demonstrate the technology "in the field" as a pilot project
- Provide information and technical support to Sanders Lead for full-scale implementation
- Better characterize behavior of the metal contaminants in the subsurface

Dr. Saunders, Lee, and Wolf have volunteered their time and efforts to helping a company that is the largest employer in Pike County. Sanders Lead has been using an old inefficient remediation technique at the site that simply was not cleaning up groundwater even after 10 years of applications costing millions of dollars. The application of the Saunders patented technology to their site could save the company millions of dollars over time. The Bioremediation project has allowed Auburn graduate students to conduct research and to disseminate information about the project's success through theses and two peer-reviewed publications. As a result, companies around the country and abroad can evaluate the utility of the Saunder's process for remediating metals from contaminated groundwaters. The process accomplishes the remediation quickly and cheaply providing a positive environmental impact.

Black Belt Environmental Science and Art Network

- Expose 5-8th grade students to hands-on science and art projects in an outdoor classroom
- Augment classroom curriculum
- Offer insight into secondary education and occupational opportunities in the sciences and arts through discussion with module leaders

The Black Belt Environmental Science and Art Network conducts science and art field days for Wilcox County fifth through eighth grade students at the Black Freedmen's Living Historical Farm for Children in Furman, Alabama. Program administrators are currently pursuing grant funding to expand the program to other school systems within the Alabama Black Belt.

For more information, please visit www.humsci.auburn.edu/abell/beeprogram/beeprogram.htm

Blue Ridge Conference on Leadership and Learning Institute

- Provide leadership and management training for managers and executives through the annual conference
- Administer all activities of the conference and Learning Institute
- Develop a quality Board of Directors
- Develop additional management and leadership programming for the southeastern states in addition to the annual conference

The Blue Ridge Conference on Leadership and Learning Institute has reached more than 2,500 people in the Southeastern United States within the last 5 years. The Institute, which has been in existence since 1919, educates management and executives leadership skills and good human relations skills.

For more information, please visit <http://www.blueridgeleadership.com/index.htm>

Broadening Horizons with Summer Camps

- Help youth explore interests
- Help youth expand awareness of the world
- Provide a summer camp program
- Provide positive learning experiences in an outdoor setting
- Improve self-image of campers

Approximately 1000 youth and chaperones from 46 counties in Alabama as well as two neighboring states participated in camp during the first year. Since 1993, almost 16,000 youth have participated.

Brown Bag Prescription Program

- Evaluate medications for correct dosage, drug interactions, and less costly alternatives

Program administrators found duplicate drug therapy and identified drug interactions saving money through improved patient health.

Building Information Assurance Education Capacity with Alabama State University

- Assist the Mathematics and Computer Science Department at ASU to develop an Information Assurance program through an NSF grant

The Collaborative Research: Building Information Assurance Education Capacity with Alabama State University project brings to ASU and Auburn University research grants of about \$99,800 each for a two year period. The project started in late September, 2005.

For more information, please visit <http://mathlab.alasu.edu/~oworrob/nsfproject/asu/>

Business and Engineering Graduate Outreach Program

- Increase enrollment
- Provide educational opportunities to students throughout Alabama

The Business and Engineering Graduate Outreach Program involves between 400 and 500 students each year. The Program provides the opportunity for individuals located anywhere in Alabama through distance learning to receive a masters degree with the same level of instruction and assignments as our on-campus graduate students in seven disciplines in engineering and three in business. These are non-residency and non-thesis graduate degree programs designed for working professionals to obtain a masters degree without leaving their jobs or relocating their family.

For more information, please visit www.gop.auburn.edu

Camp Hill Strategic Plan

- Assist Camp Hill, AL and community residents develop and implement a strategic plan

Auburn Outreach has helped Camp Hill develop a strategic plan that is regularly used to make important development decisions. Approximately 300 Camp Hill residents helped to develop the plan over a 9-month period.

Camp War Eagle Athletic Speakers

- Inform parents and future Auburn University students about campus life

The Camp War Eagle Athletic Speakers projects have reached 1669 students and 1825 parents informing them about life on the Auburn University campus.

Canine and Detection Research Institute

- Produce the best canine candidates for detection work of various substances through selective breeding
- Train police supervisors/managers to provide better program oversight
- Train police canine trainers and law enforcement personnel to provide stronger training programs for canine detection teams in the field
- Train law enforcement personnel to train and utilize working dogs in the performance of their duties

Auburn University's Canine Detection Training Center has created approximately fifteen jobs, has had the participation of over 25 volunteers, and has produced over 87 explosive detection canine teams and 19 narcotic detection canine teams. These teams are located throughout the United States, Puerto Rico, Australia, and Saipan. The teams have been involved in counter-terrorism missions and have detected explosive ordinance and bomb making materials in support of Homeland Security.

For more information, please visit <http://www.delcomservices.com/auburn.htm>

Capstone Rural Health Center

- Improve patient knowledge of their disease states
- Improve control of individual patient disease states through proper use of medication to reach evidence-based guideline national goals
- Provide drug information to CRNP prescribers
- Provide medication knowledge to Clinical Psychology graduate students from the University of Alabama
- Provide a clinical experience for Auburn PharmD students

The Capstone Rural Health Center pharmacotherapy clinic has had approximately 500 patient visits in the last year.

Catching on to Grass-fed Beef

- Wtudy the feasibility of producing grass-fed beef in Alabama for the retail market

The Catching on to Grass-fed Beef program has a potentially great health impact. Previous research indicates that grass-fed beef is high in omega-3 fatty acids, can reduce levels of bad cholesterol, and contains about half as much saturated fat as beef raised in feedlots.

Catfish Hybrid Application

- Commercialize the channel-blue hybrid catfish to benefit the Alabama's catfish industry

The Catfish Hybrid project has created 20 jobs and has engaged approximately 50 participants in the effort to commercialize the channel-blue hybrid catfish.

Catoma Creek Ecological Learning Center and Recreation Area

- Develop a Regional Environmental Education Center
- Increase and highlight ecotourism
- Provide recreation amenities such as hiking, biking, and horse trails
- Develop a ADA Handicap Access Park
- Promote public archeology

The Catoma Creek Ecological Learning Center and Recreation Area is in the planning stages and the bidding process is in progress for phase I of the project. An interdisciplinary team of Auburn University students was involved in gathering and assimilating the information for this plan (Architecture, Community Planning, Building Science, Geography and Landscape Architecture).

Center for Forest Sustainability - Impacts of Urbanization on Water Quality

- Educate the general public, policy makers, and others regarding the impacts of urban sprawl on water quality and the benefits from maintaining forest cover in developing areas
- Develop an economic incentives program to reward landowners for maintaining and establishing forests in developing areas
- Collect feedback from stakeholders regarding water quality and urbanization problems and about their perceptions of potential economic incentive approaches

The program, centered in Birmingham and the Auburn area, has provided information to approximately 750 individuals. As a result, administrators have been invited to help in structuring city ordinances and other policy tools in Birmingham and elsewhere. In addition, many new groups within Alabama who are grappling with urban sprawl impacts have invited administrators to present our research and ideas. Also, interactions with a broad array of Alabama citizens has aided in extramural funding solicitations and has helped ensure that program research is very relevant to the needs of Alabama.

For more information, please visit www.sfw.s.auburn.edu/cfs

Center for Governmental Services Ask Alabama Public Opinion Poll

- Collect and distribute public opinions about critical issues facing Alabama
- Distribute poll result information to State Legislators, local officials, journalists and the general public

The Center for Governmental Services conducted four Ask Alabama polls, each among a representative sample of approximately 600 Alabamians. Eighteen reports were distributed to over 400 constituents including State and local officials and media outlets. Poll reports received wide media coverage reaching thousands of Alabama citizens.

For more information, please visit www.askalabama.org

Center for Governmental Services County Wage, Salary, and Benefit Survey

- Accumulate data on wages, salaries, and benefits provided to public employees in every Alabama County every two years
- Compile data on wages, salaries, and benefits
- Distribute survey results

The Center for Governmental Services gathers wage, salary, and benefit information about Alabama County employees. Data is gathered every two years. The accumulated data is compiled and published on the internet. The surveys are conducted in conjunction with the Alabama Association of County Commissions.

<http://www.auburn.edu/outreach/cgs/publications.htm>

Center for Governmental Services General Training Programs

- Provide on-site training to State and local governments in a variety of topic areas

The Center for Governmental Services General Training Programs has educated over 600 State and local government personnel who have completed one or more programs. Topic areas include Management and Supervision, Financial Management, Customer Service, Communication, Conflict Resolution, Leadership and Motivation, Harassment and Discrimination Awareness, Team Building, Strategic Planning and Management, Performance Measurement, Benchmarking, and Total Quality Management.

For more information, please visit www.auburn.edu/cgs/training

Center for Governmental Services Municipal Wage, Salary, and Benefit Survey

- Accumulate data on wages, salaries, and benefits provided to public employees in every Alabama municipality each one to two years
- Distribute survey results

The Center for Governmental Services gathers wage, salary, and benefit information about Alabama municipal employees. Data is gathered from cities with populations above 2,000 annually and data is gathered from towns with populations less than 1,999 every two years.

The accumulated data is compiled and published on the internet. The surveys are conducted in conjunction with the Alabama League of Municipalities.

For more information, please visit <http://www.auburn.edu/outreach/cgs/publications.htm>

Center for Governmental Services Survey Research Lab

- Provide quality research services at a reasonable price to State and local governments, associations, and University faculty and administrators
- Provide public opinion data to government officials and the general public on important issues facing Alabama

The Center for Governmental Services has conducted approximately 35 survey projects for governmental and State organizations, University colleges and departments, and private businesses. The Center has published reports about a variety of issues that have been disseminated in an effort to provide valuable information to the general public.

For more information, please visit <http://www.auburn.edu/outreach/cgs/srl.htm>

Center for Sustainable Rural Living at E.V. Smith Ag Research Center, Milledgeville, Alabama

- Create a Regional Education Center for Alabama grown/value added products
- Provide a conference center
- Showcase Alabama grown organic products
- Create a Living laboratory for Low Impact Development and healthy living
- Encourage Ecotourism

The Center for Sustainable Rural Living is in the starting phase. The Center will be anchored by a Learning Center astride I-85 featuring state-of-the art design features that will provide tourism information, an auditorium, and other meeting facilities. A program of agricultural and environmental education will complement the core research activities on sustainable agriculture. Students and faculty will be involved in conducting research, education, extension, and demonstrations for sustainable and environmentally sensitive rural living systems.

For more information, please visit <https://fp.auburn.edu/guyifan/csrl/index.htm>

Central Alabama Farm Analysis Association

- Assist farmers with management decision making by utilizing production and financial records

The Central Alabama Farm Analysis Association serves approximately 60 farm families.

Character Education for Public Schools

- Support the State law mandating 10 minutes of character education each day
- Develop character education materials
- Provide resources for teachers in "Character Counts!"

The Character Education program provides support of State law and for classroom teachers in providing for character education and development. "Character Counts" focuses on 6 identified pillars of character. There are trained agents in each county. More than 40 teachers attended the training in 2001 and as of 2002 more than 100 teachers have been trained. The program assists in helping to safeguard the future by helping young people grow into responsible adults with characters solidly rooted in key values.

Cheerleading Camps

- Provide training for high-school and junior high-school cheerleading squads

The Cheerleading Camps provide training to approximately 5,000 high school and Junior High-school cheerleaders, dancers, and coaches each year.

For more information, please visit www.auburn.edu/summercamps

Cherokee Language Revitalization

- Help people (re)acquire the Cherokee language

The Cherokee Language Revitalization program has developed an instructive interactive web site to help users (re)acquire the Cherokee language. Over 26,136 individuals have visited the website. In addition, the programming for the website is available for use by other groups wishing to revitalize their heritage languages.

For more information, please visit <http://php.auburn.edu/outreach/dl/echota/index.php>

City of Decatur, Fiscal Policy and Procedures Manual

- Assist the city in documenting financial procedures
- Make recommendations to the city leadership best practices in fiscal management

Auburn Outreach has helped Decatur, Alabama with their Fiscal Policy and Procedures Manual by assisting the city in documenting financial procedures and by recommending best practices in fiscal management.

Clear Water Guardian Program

- Protect local waterways
- Provide recognition to contractors who limit the impact that their building and development has on Mobile County waterways

The Clear Water Guardian Program seeks to protect Mobile County waterways and to recognize contractors who responsibly limit the impact that their building and development has on the waterways.

Collaborative Project between Architecture and Building Science Students

- Learn collaborative skills
- Serve the community

The Collaborative Project between Architecture and Building Science Students gives students the opportunity to take classes and to volunteer their time to help construct a Habitat for Humanity house. The project introduces students with ways to collaborate to meet a shared goal (community service). Students also have skill and knowledge in the design and construction of new homes. The Project allows them to work along side the homeowners as well as future colleagues.

College of Liberal Arts Day

- Reach out to minority and disadvantaged students located in rural areas
- Engage students to participate in college academic activities
- Gain school/community support for community growth
- Recruit students to Auburn and the Liberal Arts College

The College of Liberal Arts Day enjoys the participation of four schools and organizers expect participation from three more schools in fall, 2005. Students in rural counties are encouraged to participate in college academic activities. The Liberal Arts Day helps introduce disadvantaged students to Auburn University and gains school and community support for community growth. Hopefully, the program will produce good students that will be able to give back to their respective communities. In turn, cities and towns or counties will benefit by an economic growth. Students will begin to invest in their communities because of the opportunities that were presented to them as far as access to a public institution. The rural area communities are made more aware of the opportunities and information that Auburn brings to them on the home front. As a public institution, it is our duty to serve Alabamians and to ensure an economic future for our children and in the community in which we live.

For more information, please visit www.cla.auburn.edu/clastudents/advisement/cla_day/index.htm

Communication Methods to Hispanic Communities

- Connect the growing Hispanic and Latino populations to the Nation's information infrastructure
- Help connect citizens at risk of exclusion
- Provide on-line resources for connection to the larger community

The project to enhance communication methods to Hispanic Communities removes barriers to information access through the use of a variety of networks and methods. The program seeks to develop and extend the "Para Nuestros Amigos Latinos", Spanish-only website, to provide a variety of information to Alabama's Hispanic population. The System's WECAN\$U website had over 3,700 hits. Additionally, a Spanish-speaking Agent was hired to better meet the needs of the Hispanic groups. This Agent is located in Marshall County which has the largest population of Spanish-speaking clientele.

For more information, please visit www.aces.edu/urban and www.aces.edu/urban.metronews

Communitas: ARCH 4900

- Provide Community Service
- Apply knowledge of construction in the repair and rehabilitation of local homes for elderly citizens
- Collaboration with local government and volunteer agencies

The Communitas: ARCH 4900 program has involved the participation of 30 to 40 students each year who will work on the repair of one house per year. Rebuilding Together will work on 10 houses per year and students from this program will work on one of these houses.

Community Based Restoration Initiatives

- Build the capacity of AU Masters of Landscape Architecture students to address real world issues with cutting edge technologies
- Create an awareness of issues that face rural communities because of rapid urbanization
- Implement demonstration projects of wise watershed management practices

The Community Based Restoration Initiatives has conducted at least 5 workshops hosting approximately 200 participants and plan future workshops to teach improved landscape management techniques. These workshops have inspired several Alabama communities to implement watershed management practices. "BluePrints" on environmentally friendly practices have been prepared for 5 Alabama communities. Plans have been made to host landscape demonstration projects around Alabama in the future. The partnership between the Alabama Cooperative Extension System, Auburn University Department of Landscape Architecture, Alabama Clean Water Partnership (non-profit watershed organization), local governments, and other industries has set the stage nicely for low cost technical assistance to communities to help them better manage environmental resources, balancing economics, policy, the environment, and quality of life.

For more information, please visit <http://www.aces.edu/waterquality/cbri.htm>

Community Course: Basic Handgun

- Educate participants about Alabama laws
- Familiarize participants with safe and proper firearm handling and cleaning
- Increase level of participant's competence and confidence in handling firearms

Approximately 200 people have completed the handgun course. Participants have learned safe and proper methods to clean and handle firearms and have an increased confidence in handling firearms.

Community Courses Program

- Make the resources of Auburn available to the local community via continuing education classes

The Auburn University Community Courses Program provides continuing education classes to approximately 1,500 to 2,000 people annually.

For more information, please visit www.auburn.edu/outreach/communitycourses

Community Cultural Programs

- Provide opportunities for local audiences to engage with scholars, writers, and artists

The Community Cultural Programs has enjoyed the participation of more than 2,500 people in approximately 20 programs within the last year.

Community Education Presentations

- Provide information on health related topics to a target audience

The Auburn University Pharmaceutical Care Center clinicians provide an average of three to five presentations on health related topics to community groups who request them.

Community Leadership Development

- Provide discussions that focus on leadership elements and the development of communication skills needed for community leaders

Community leadership programs are one way to build bridges between various segments of a community. Not only do they help talented people find an avenue for getting involved, they also provide excellent leadership training. The Community Leadership Development program has taught numerous mayors, State legislators, and other community and State leaders valuable leadership skills and helped them realize the importance of community leadership.

COMP1003/4 Course

- Educate through the use of a computer literacy program

Marketing and scientific surveys have shown that computer knowledge is now a common requirement in hiring professionals for many jobs at all levels. Hence, computer literacy is no longer optional in our today's society. In this course, students learn how to use an IBM PC, its operating system, and several application packages. Each student is required to complete a series of assignments on Windows XP, Internet and World Wide Web (WWW), Microsoft Word 2003 (word processor), Microsoft Excel 2003 (spreadsheet), and Microsoft Access 2003 (database management), Microsoft PowerPoint 2003 (developing Power Point professional presentations) and Microsoft FrontPage 2003 (developing and maintaining a web page and a web site). The Auburn Outreach COMP1003/4 course educated 65 participants.

For more information, please visit https://fp.auburn.edu/comp1000/comp1003_04/index.htm

Comprehensive Breast Cancer Education Project

- Enhance awareness and knowledge of breast cancer
- Influence the ways in which women respond to this health issue
- Teach how to conduct BSE

The Comprehensive Breast Cancer Education Project was a 4-year project in conjunction with the American Cancer Society, with a 1998 kick-off.

Connections: Schools, Communities, and the People Who Made Them

- Engage in the study of educational history in selected local communities, and the study of civic engagement in local communities around issues of education
- Determine whether communities and schools can be re-connected through a study of history

The Connections: Schools, Communities, and the People Who Made Them program engages approximately 75 people from three Alabama communities to study educational history and civic engagement in local communities and issues of education in a goal to determine if communities and schools can be reconnected through a study of history.

Continuing Education Presentations (Pharmaceutical Care)

- Provide up to date information on a health related topic

Auburn University Pharmaceutical Care Center clinicians provide an average of 4 continuing education presentations annually.

Continuing Legal Education Seminars

- Provide continuing legal education for attorneys

The Auburn University Continuing Legal Education Seminars provide continuing legal education for approximately 100 attorneys annually.

For more information, please visit www.auburn.edu/outreach/cle

Cooperative Research between Auburn University and USDA-ARS National Soil Dynamics Laboratory

- Promote conservation agriculture for farm profitability and environmental protection

The Cooperative Research between Auburn University and the National Soil Dynamics Laboratory has reached over 3000 farmers, agriculture professionals, and Alabama citizens through scientific conferences, field days, and exposition exhibits. Information is widely disseminated through fact sheets, web sites, and displays.

For more information, please visit <http://www.ars.usda.gov/Main/docs.htm?docid=6502>

Coordination of Patient Education Programs

- Provide education to patients about their disease state
- Provide education to patients about their medications
- Provide information to patients about how their medications and disease states work together

Patients are often not aware of information regarding their healthcare. It is proven that patients that have knowledge about their disease state and medications are empowered to take better care of themselves. This service is provided on a daily basis to patients at the clinic and should result in improved health and decreased use of expensive healthcare dollars. The Coordination of Patient Education Programs has involved the participation of approximately 500 patients on a daily basis for the last 4.5 years.

Coordination of Patient Medication Assistance Program/Drug Company Card Programs

- Assist patients in obtaining their medications

Due to the great expense of medications, many patients are facing choices about how to obtain their medications. The Coordination of Patient Medication Assistance Program has allowed clinicians to help find ways for patients to obtain their medications.

Cotton Tours and New Technology

- Provide information regarding rapid and widespread adoption of new technologies
- Provide growers with first-hand exposure to new technologies
- Provide growers with opportunities to talk with Extension specialists and other growers using new technologies

Critical Thinking for K-8th Grade Teachers in Math

- Improve the math content knowledge of K-8th grade teachers
- Improve the problem solving ability of K-8th grade teachers
- Improve the understanding of working in groups to explore math

The Critical Thinking for K-8th Grade Teachers in Math project has been enthusiastically embraced by over 100 teachers in Alabama, affecting their confidence in doing math. Teachers benefit by exploring alternative approaches to problem solving questions on the ARMT test.

Customer Service Training

- Increase an awareness of the importance of good customer service to city employees by identifying better listening, communication, and problem solving strategies

The Customer Service Training program has educated approximately 80 city employees on positive customer service skills such as problem solving, listening, and communication.

Dauphin Island Coastal Public Access Study

- Evaluate the potential for a proposed new public access boat ramp near Dauphin Island
- Comment on the appropriate number, types, and sizes of slips and other amenities
- Analyze site locations for pocket parks and view spots, to include but not be limited to, boardwalk locations and fishing spots
- Prepare a master plan for each selected site
- Provide a written report containing the conclusions of the feasibility study and survey analysis

The Dauphin Island Coastal Public Access Study is evaluating the potential for development that will provide public access near Dauphin Island and will analyze viable amenities and locations. A master plan for selected sites will be developed and a written feasibility report will be authored. Auburn University Community Planning will collect available data, develop protocols for access suitability index, and develop rules to implement the protocols to develop a master plan, which identifies areas of suitability and feasibility for the construction or expansion of public or private access points in the Dauphin Island, Alabama area with emphasis on enhanced public access.

Design Camp

- Introduce high school students to the field of Industrial Design

The Design Camp educates 20 students in the field of Industrial Design each summer.

For more information, please visit www.auburn.edu/outreach/design

Designhabitat

- Assist Habitat for Humanity in improving compatibility with Alabama Neighborhoods, in lowering homeowner operation and maintenance costs, and to educate students about affordable housing design and construction

The Designhabitat project is the result of collaboration between the College of Architecture, Design & Construction at Auburn University, DesignAlabama, and the Alabama Association of Habitat Affiliates (AAHA). Begun in the summer of 2001, this partnership was initiated by DesignAlabama as a means to bring together the resources and expertise of Auburn University with Habitat for Humanity, perhaps most significant “builder/developer” of affordable housing in Alabama, to see if Habitat homes could be made “better”. The Designhabitat program has produced five model homes in Alabama for Habitat for Humanity. One home was built by Auburn students and four by Habitat for Humanity affiliates. The program helps Habitat for Humanity produce homes with improved energy performance thus lowering costs for homeowners and provides homes that are more compatible with Alabama neighborhoods. The program also teaches students about ways to design and construct affordable housing. The Designhabitat program received a HUD Secretary's “Silver Award” for Affordable Housing Design and a Collaborative Practice Award from the Association of Collegiate Schools of Architecture.

For more information, please visit www.designhabitat.org

Developing Healthy Habits

- Provide up to date information on a variety of topics to the general public and healthcare professionals

The Developing Healthy Habits newsletter project distributes over 200 newsletters to subscribers at least quarterly and provides the public and healthcare practitioners with up-to-date health and medical information.

Development and Commercialization of Bioenergy in Alabama

- Develop and commercialize bioenergy

Currently, Alabama produces 70% of its electrical power from burning coal, and 60% of the coal needed is imported from out of state, mainly Wyoming. This amounts to over half a billion dollars leaving the State each year to purchase coal. Biomass material is plentiful in Alabama, and can be used to replace some imported coal, thus reducing the amount of money that leaves the State each year to purchase coal. Additionally, recent hurricanes (especially Katrina and Rita) have emphasized the reality of global warming and our vulnerability regarding our energy supply: the US uses 25% of the world's oil supply, but owns only 3%. Demand for oil and coal from China and India is largely responsible for the sharp increases in the price of fossil fuels. However, liquid fuels can be produced from fibrous biomass, such as wood and agricultural materials. Since Alabama is a biomass-rich state, development of biofuel production from biomass offers multiple benefits. The Development and Commercialization of Bioenergy in Alabama program has begun initial commercialization of green power by Alabama Power at the Gadsden power plant along with the institution of a marketing program including production of a television commercial. The program has also provided much needed education to farmers, business people, utility personnel, the general public, and State politicians regarding environmental, economic, and rural development benefits of bioenergy.

Diabetes Clinic

- Improve patients’ knowledge of their diabetes and beneficial diet and exercise
- Increase the number of patients receiving the ADA recommendations of medical care
- Improve the control of diabetes patients in this clinic

The Diabetes Clinic has had 39 patient visits this year and has helped patients improve knowledge about their diabetes and ways to manage the disease. Clinicians teach patients about diabetes and how to better manage the disease through diet and exercise.

Diabetes Education Classes

- Provide diabetes education to patients
- Improve achievement of diabetes goals

Diabetes Education Classes have been provided to approximately 210 patients and caregivers. The classes have provided individual education to patients with diabetes about how to check their blood sugars, how to administer insulin injections, and practical nutritional information. Initial research on the adherence to national guidelines for diabetes care revealed that the care for these patients could be improved. This information was presented as two different posters at a national meeting and was compared to another clinic in the state and was submitted for publication. Follow-up research in March 2005 has revealed that patients not involved in our diabetes education are not meeting national guidelines for diabetes care. Scores on a post-class quiz indicated 44% of patients had greater than 70% knowledge of key facts related to their diabetes care. All of these numbers indicate patients are learning about their diabetes which empowers them to take better care of themselves which usually translates into less complications related to diabetes and less use of healthcare dollars.

Diabetic Dyslipidemia Clinic

- Provide pharmacotherapy to help achieve lipid goals in patients with diabetes and to help achieve appropriate glycemic control

The Diabetic Dyslipidemia Clinic program is currently serving 468 veteran outpatients at pharmacist-managed clinics in Veterans Administration clinics located in Montgomery and Tuskegee, Alabama and Columbus, Georgia. These clinics have also led to improved services provided by the interdisciplinary diabetes team that the Central Alabama Veterans Health Care System.

Dietary Manager Independent Study Program

- Train food service managers in nursing homes and hospitals

The Dietary Manager Independent Study Program has trained over 500 Alabama food service workers in preparation for their national certification exams. This program trains food service workers in nutrition, food safety and sanitation, personnel management, inventory manager, and purchasing in the health care industry. Also, the Program has helped nursing homes and hospitals meet Medicare Standards.

For more information, please visit http://www.auburn.edu/distance_learning/programs/dm/

Digital Microscopy in Earth Systems

- Provide digital microscopy exercises that emphasize K-12 Earth science instruction goals
- Promote scientific literacy and observation skills in K-12 classes through microscopy exercises
- Increase technology awareness among K-12 students by explaining digital (computer-based) microscopy
- Integrate various Alabama K-12 curriculum goals (in art, mathematics, writing, etc.) with science instruction

The Digital Microscopy in Earth Systems program has set up laboratories in every Auburn public school. The program has 12 teacher participants and 150 students who have participated to date. Presentations about the project have been given at national education meetings. The project has impacted other outreach activities of Auburn University, as well. For example, microscopy exercises facilitated by participants were included in summer Y.E.S. (Youth Experiences in Science) at Auburn this year, with middle- and high-school participants from throughout the State.

Distance Diagnostics through Digital Imaging

- Learn to use a program for rapid diagnosis of plant diseases
- Use digital imaging to identify and diagnose diseases in plants
- Save money, reduce crop loss, and lower treatment costs

Twelve Distance Diagnostics through Digital Imaging sites are operational with two more in the planning process. Fifty county Extension Agents in Alabama work on this project.

Distance Learning: M.Ed. and Ed.S. in Foreign Language Education

- Administer foreign language education through distance learning
- Provide certified teachers of the State of Alabama and surrounding States opportunities for professional development
- Provide teachers opportunities for advanced certification at the "A" and "AA" levels

The Distance Learning program in Foreign Language Education is making it possible for teachers of foreign languages in the State of Alabama to improve their skills. The Distance Learning program has educated 45 students, 9 of whom have graduated. Six graduates have been employed in Alabama schools and three accepted positions in schools in other states. Current students teach in schools throughout the southeast.

For more information, please visit http://www.auburn.edu/distance_learning/auonline/auol_credit_courses.php

Downtown Trick or Treat

- Encourage Student-athlete interaction with children on Halloween

The Downtown Trick or Treat program allowed student-athletes to interact with children on Halloween.

Draughton Seminars in State and Local History

- Provide information about new and ongoing Alabama History research to State citizens

The Draughton Seminars in State and Local History program has engaged communities in Alabama in hosting more than 100 programs on Alabama history for teachers, students, and the public. Each program has an audience of 20 to 250 people.

Drug Information Center

- Provide health care professionals with immediate access to objective, concise and unbiased information on drug therapy problems
- Supplement the continuing education of health care professionals
- Provide both experiential and didactic training in drug information for pharmacy students and residents
- Provide advanced services such as formulary management, Pharmacy and Therapeutic Committee drug monographs, medication usage evaluation services, clinical practice guidelines, and disease state management services in a contractual manner

The Drug Information Center has fielded on average 270 to 400 questions per year from health professionals about information on drug therapies and therapy problems. The Center contributes to the education of pharmacy students to alleviate the shortage of pharmacists in Alabama and to the ability of practicing pharmacists to perform their tasks at the highest level.

For more information, please visit <http://pharmacy.auburn.edu/dilrc/dilrc.htm>

Drug Information Responses

- Provide information on drug therapy to the patients seen in the Auburn University Pharmaceutical Care Center and to area physicians

The Auburn University Pharmaceutical Care Center handles an average of 45 drug information responses annually and provides information on drug therapy to Clinic patients and area physicians.

Early Childhood Motor Interventions

- Provide healthy exercise opportunities for young children who are at-risk of the negative effects of high stress
- Ensure that young children learn fundamental motor skills for the future application in sport and physical activity
- Provide model physical play and motor programs for early childhood teachers

The Early Childhood Motor Interventions program has served over 500 children within the last 5 years. The program has hosted workshops, demonstrations, and contributed articles that have educated thousands of early childhood teachers about motor skill development, healthy exercise, and how to motivate children to be lifelong exercisers. The program is in the process of creating training materials to assist early childhood specialists on how to provide a quality physical play program for young children. Program research suggests that we can improve health (aerobic benefit and stress response) and advance motor skill development through our physical play approach.

East Alabama Medical Center Skilled Nursing Facility

- Optimize healthcare for patients being treated at EAMC's Skilled Nursing Facility
- Provide rotation/clinical experience for P4 students at AUHSOP
- Model clinical pharmacy for community/hospital

The East Alabama Medical Center Skilled Nursing Facility provides 30 patients (at any given time) a thorough review of their medications, their medication history, and medication education and recommends ways for physicians to optimize medication therapy through communication. Additionally, the program trains nurses about medication administration, monitoring, and efficacy parameters.

East Alabama Regional Inservice Center

- Provide rigorous training in critical needs areas for the State's public school personnel

In 2003-2004, the East Alabama Regional Inservice Clinic sponsored or co-sponsored 283 staff development programs with participation totaling over 4,500 providing training in critical needs areas for Alabama public school personnel.

For more information, please visit www.auburn.edu/earic

East Alabama Services for the Elderly (EASE) Housing

- Draw plans for the renovation of the house used for adult day care in Opelika by East Alabama Services for the Elderly
- Draw a master plan for the entire day facility site
- Provide cost estimates for renovation and a phased rehabilitation schedule and a comprehensive rehabilitation plan

The East Alabama Services for the Elderly Housing project serves Lee County by opening places for the elderly and disabled to be housed and cared for during the day.

Economic Development and Better Quality of Life for People and Communities

- Create a State urban forestry coordinator position and a community volunteer development position
- Create an advisory council
- Develop and implement a State UFandCF strategic plan

Urban forestry is a perfect example of how urbanization presents new and challenging opportunities to a land-grant institution. In this case, urban forestry allows Auburn University to apply research, teachings, and extension to address issues where communities can be made better for people through trees. The program has secured a State urban forestry coordinator position, a community volunteer development position, has created an advisory council, and has worked toward the development and implementation of a State UandCF strategic plan.

Economic Development in Black Belt - Uniontown Cares

- Involve citizens in economic development in Uniontown, Alabama
- Create public space for citizen involvement
- Utilize Auburn University faculty, staff, and students as resources for community development
- Facilitate citizen dialogue and deliberation
- Create partnership between citizens and government

The Economic Development in the Black Belt - Uniontown Cares project brought together a diverse group of citizens in a polarized community marred by high levels of distrust to work with government officials to improve their community. As a result, a non-profit organization has been created that raises money for community needs and serves as the vehicle for strategic planning. The project has assisted with technology in the community by creation of a web page and donation of used computers.

Economic Development in Bullock County

- Develop the economy through historic tourism

Business Outreach has aided economic development in Bullock County through historic tourism and ideas have been generated and implemented to start at least two Bullock County businesses.

Educating Farmers in Precision Agricultural Techniques

- Assist farmers in maintaining competitiveness
- Learn ways to become more cost and time efficient
- Apply geospatial principles with yield monitoring in order to better utilize resources
- Increase efficient use of equipment, fertilizers, and pesticides
- Provide information to evaluate adoption of precision agriculture and to assess user needs

The Educating Farmers in Precision Agriculture Techniques has provided information to evaluate adoption of precision agriculture, to assess user needs, and to educate about how precision agriculture technologies can be adopted to positively impact profitability on farms. In 2003, training sessions were held at Clemson University and the University of Georgia and in 2004 the program provided two on-farm field tour days.

Education of Healthcare Providers at Carraway Medical Foundation

- Improve drug knowledge in healthcare professionals
- Improve disease knowledge related to drug knowledge in healthcare professionals

Continuing education to help healthcare professionals stay up-to-date in their knowledge of disease states as well as the drug therapy used to treat them. The Education of Healthcare Providers program allows pharmacists and pharmacy students to share knowledge with healthcare professionals, nurses, stay up-to-date on healthcare knowledge which should result in improved care of patients. The program has provided 34 continuing education programs over the last 4 years resulting in approximately 80 hours of continuing education credit for nurses.

Educational Support for Hispanic Immigrants Children

- Facilitate the educational process of Hispanic immigrants with language difficulties
- Provide Auburn Honors Spanish students with service ethic
- Link Spanish at the University with local public schools

There is currently very little educational support available locally for the growing population of Hispanic immigrants in the Auburn-Opelika area. Hispanic kids to be successful in school so that they become integrated into our communities as productive upstanding citizens. The Educational Support for Hispanic Immigrants Children program teams honors students in Spanish with four Hispanic students to help them prepare for their class work and to improve their scholarly performance. This service will grow to include more honors students at Auburn, assisting more students in the Auburn-Opelika area.

Elderhostel Programs

- Provide educational programming for seniors

The Auburn University Elderhostel Programs provides education to seniors and attracts approximately 500 residents of other states to the Auburn area annually.

For more information, please visit www.auburn.edu/outreach/elderhostel and http://www.ocm.auburn.edu/news_releases/elderhostel.html

Elections Administration Certification Program

- Provide professional training for elections officials
- Improve voter registration and elections process in the United States

The Elections Administration Certification Program trains hundreds of elections officials throughout the United States and several states require high level elections officials to obtain certification through the program. The program received a national award for best continuing education certification program and the program facilitated the process to draft the code of ethics for the profession that has been adopted by several states.

Elementary School Outreach

- Introduce children to plant material in general
- Provide a hands-on display of Alabama Agronomic crops/ invasive weeds/vegetable crops
- Show examples of seeds and teach requirements of successful germination
- Present basic information on soil, potting mix, and why it isn't "dirt"
- Present at Career Days

The Agriculture Experiment Station Elementary School Outreach program increases Alabamians' awareness of agriculture and crops and how they impact lives through education of students and educators about plant material, presentation of Alabama plants and crops, lessons about seed germination, and information about soil and potting mix. The program helps students to connect agriculture from the farm to products from the grocery store.

Emergency Preparedness

- Create an awareness of the emergence of potential pandemics and associated dangers

The Emergency Preparedness program has educated over 200 individuals about potential pandemics and associated dangers.

Employee Training - East Alabama Medical Center

- Educate and increase employee standardized test scores to allow for advanced training
- Prepare underemployed for more advanced positions

The Employee Training program aims to increase employee standardized test scores and prepares underemployed individuals for more advanced positions. The pilot program affects approximately 20 employees.

Encyclopedia of Alabama

- Create a comprehensive, authoritative, online reference work on the Alabama's history, culture, geography, and natural environment
- Provide the encyclopedia at no cost to anyone with Internet access by 2007 or 2008
- Initially include approximately 600 articles on topics of national or statewide significance
- Eventually include at least 50 local articles for each Alabama county as well as other pertinent articles
- Secure the funding needed for future development and sustenance
- Ensure that by 2010 EOA is recognized as a reliable, comprehensive, and authoritative source of information on any topic related to the State of Alabama

The Encyclopedia of Alabama project has created a statewide alliance of cultural organizations and educational institutions committed to the common cause of creating a dynamic, accessible information resource on Alabama that will serve local, statewide, national, and international audiences. The Encyclopedia will be delivered via the internet will provide user's to learn about Alabama's history, culture, geography, and natural environment, among other information. The Encyclopedia is expected to generate hundreds of thousands of hits per month. The potential of the Encyclopedia is vast. It will provide authoritative information on Alabama's history, culture, geography, and natural environment to Alabama's 800,000 K-12 students and will present a balanced and full picture of Alabama to anyone in the world who has access to the Internet. Businesses and industries considering new facilities in the State will be able to quickly obtain reliable information on Alabama. The New Georgia Encyclopedia, which has been online since 2004, routinely receives upwards to 250,000 hits per month. In some months Georgia's hits have exceeded 300,000. The Encyclopedia of Alabama can anticipate similar use statistics. Auburn's leadership in planning and developing the Encyclopedia clearly demonstrates an innovative approach to serving the needs of all Alabamians.

For more information, please visit <http://encyclopediaofalabama.org/> and http://www.ocm.auburn.edu/news_releases/encyclopedia.html

Engineering Professional Development Program

- Provide courses for professional engineers, land surveyors, architects, and business professionals to meet license renewal requirements

The Engineering Professional Development Program is recognized and approved by the Alabama Licensure Board to provide continuing education for professional engineers so that they can meet license renewal requirements. This program extends expertise in engineering and business through distance learning to working professionals and corporations across Alabama.

For more information, please visit www.bece.auburn.edu

Entrepreneurship in Hale County

- Promote Community Development in Hale County
- Promote the development of entrepreneurial talents among youth
- Develop institutions for community development

The Entrepreneurship in Hale County project has aided in the sponsorship of a variety of youth entrepreneurship projects, has added an entrepreneurship class to the Akron curriculum, and has led to consultation concerning the establishment of a local Community Development Corporation.

Entrepreneurship Policy Journal

- Contribute to the base of research on entrepreneurship, leading to economic growth
- Provide an arena for sound, methodologically diverse, and solution-oriented policy discourse on entrepreneurship issues affecting the African-American community
- Encouraging scholarly dialogue and communication among academics, policymakers, community leaders, and practitioners
- Improve the public policy process by integrating the perspective of African-Americans into formulation, implementation, and evaluation of entrepreneurship policy

The Entrepreneurship Policy Journal reached numerous international policy makers and small business development practitioners, academics, and governmental entities. Journal material focused on minority business development and small business development. The journal production created a forum for ongoing and increasing communication about entrepreneurship and has provided a way to disseminate information and avenues to increase discussion about small business development and minority entrepreneurship within Alabama, the United States, and internationally. The Journal was a partnership with the Office of Diversity and Multicultural Affairs and Outreach.

Environmental Education and Agricultural Safety Training

- Provide the general public with facts about environmental science and stewardship that affects the water and air quality around us
- Train farmers and horticultural businesses about workplace safety and how to comply with OSHA regulations

The Environmental Education and Agricultural Safety Training programs have provided information and training to farmers, horticultural businesses, and the general public about safety and Occupational Safety and Health Administration regulations and have inspired many Alabama farmers and horticultural businesses to institute a safety plan. The Environmental Education program has reached more than 40,000 citizens most of who are in agriculture. Success of the program is indicated by the fact that Lake Guntersville has a significantly increased oxygen level and reduced turbidity with less organic matter content since the program began in 1990. The project has garnered more than one and a half million dollars in Federal grant support since its inception in 1990. The Farm and Agricultural Safety Education program was begun in 2002 and was supported by a USDA grant of approximately \$20,000 per year. Since the inception of the program, the number of farm worker fatalities has declined by 41.6 percent from 2002 through 2004. The Extension Agricultural Safety program for Horticultural businesses is the only program in the nation that is currently approved by the Occupational Safety and Health Administration.

For more information, please visit <http://www.aces.edu/farmsafety>

Environmental Stewardship Conference (4-H)

- Help students understand scientific concepts that impact environmental issues
- Promote environmental awareness, concepts, and skills
- Promote personal responsibility and stewardship
- Provide the Environmental Stewardship Conference

The 4-H Environmental Stewardship Conference encourages potential future leaders in the areas of the environment with an emphasis on critical thinking skills needed to identify environmental and economic development issues and determine well-reasoned actions to achieve a balance.

For more information, please visit <http://www.aces.edu/fourh/environment/4-H-ESProgram.htm>

Envision Opelika - The Brown School

- Design and plan a cultural arts center for Opelika at the existing Brown School

EQUITY via Problem Solving

- Increase teachers' pedagogical and content knowledge related to mathematical problem solving in order to increase student achievement in mathematics
- Establish mechanisms for meaningful parent or caretaker involvement in children's learning of school mathematics
- Monitor the teachers' implementation of the strategies they learned in the workshop in their classrooms

Enhancing Quantitative Understanding in Teachers and Youth via Problem Solving (EQUITY Via Problem Solving) was a collaborative project between Auburn University and Notasulga Elementary School. The project provided kindergarten through grade five mathematics teachers a minimum of 20 hours of professional development that addressed adult level mathematics content; instructional methods to promote student understanding and problem solving (including use of manipulatives, cooperative learning strategies, and use of technologies); research on children's learning of critical mathematical constructs; mathematics curriculum standards; authentic and performance-based assessment; strategies to increase the mathematics achievement and preparation of rural students; and community resources for continuing mathematics education. The project also gave teachers at the school over \$2100.00 in resources and materials for teaching mathematics. As a result, elementary students at the school benefited from the teachers' implementation of the new strategies and their use of the materials.

Ethical Decision Making in Medical Contexts

- Continue a dialogue with health professionals concerning ethical issues as they arise in the health care context

The Ethical Decision Making in Medical Contexts program has conducted workshops with East Alabama Medical and Hospice staff that have served over 100 employees and impacted numerous patients. The project administrator is a "community" member of the Ethics committee at EAMC. The committee is a group of health professionals as well as community members that meet to discuss ethical issues that arise in the hospital. The workshops have been an attempt to provide an opportunity to address ethical issues as they arise in the community to better serve patients

Eufaula 2020

- Develop an interdisciplinary planning team at Auburn to assist local communities in strategic planning
- Assist Eufaula and its other partners in the development and implementation of a strategic plan

Auburn University responded to the need in Eufaula for strategic planning by organizing an interdisciplinary team from the University represented by members of different colleges and outreach organizations. These individuals coordinated their efforts with other partners, including the City of Eufaula, Audubon International, and Goodwin, Mills, and Caywood. The Eufaula 2020 Strategic Plan involved the direct participation of approximately 600 participants in preparing a plan that is based on sustainability and environmental protection. Several hundred other individuals contributed to the process by responding to a survey. The completed plan was featured on CNN as a great example of a community development plan that is based on sustainability and environmental protection. Eufaula received the honor of being named the first "Audubon Cooperative Sanctuary" city in the United States by Audubon International.

Evaluation of Cholesterol Monitoring in HIV-Infected Patients

- Evaluate if patients on HIV treatment were being monitored for cholesterol as indicated by the HIV clinical guidelines

The Evaluation of Cholesterol Monitoring program has raised awareness of cholesterol monitoring and resulted in more consistent evaluation in treated HIV patients in screenings of cholesterol changes. Prior to this program, patients were not being evaluated routinely for high cholesterol. As a result, patients were identified who needed cholesterol management.

Evaluation of Drug Therapy for Drug-Related Problems

- Review medication regimens of HIV-infected patients to identify or prevent drug-related problems associated with therapy or drug-drug interactions

The Evaluation program has allowed the review of medication profiles of approximately 60 HIV-infected patients each week who receive medical care through a federally-funded outpatient clinic. Patients' drug therapy is reviewed to optimize therapeutic success and to identify, address, and prevent medication-related adverse events.

Expanded Food and Nutrition Education Program

- Provides educational programs
- Decreasing the numbers of low birth weight babies born to Alabama's low income mothers
- Increasing the numbers of healthy well-nourished children, youth and families

The Expanded Food and Nutrition Education Program is designed to promote healthy diets among limited-resource citizens. The program was started several decades ago and began in five Alabama counties. The Program reached more than 20,000 Alabamians with multiple nutrition education lessons in 2000. By 2004, over 5,100 client families and 20,000 individuals were reached. The Program will expand to 43 counties in 2005. The Expanded Food and Nutrition Education Program has been so successful that it is being replicated in other states.

Facilitator for Alabama Childhood Lead Poisoning Elimination Workgroup

- Facilitate and document the efforts to develop a plan to eliminate childhood lead poisoning in the Alabama by 2010

The Facilitator for Alabama Childhood Lead Poisoning Elimination Workshop helped a group assembled by the Alabama Department of Public Health to develop a plan to eliminate childhood lead poisoning in Alabama by 2010.

Family and Community Development through Integrated Watershed Management and Education in the Middle Jequitinhonha River Valley, Minas Gerais, BRASIL

- Research on suitability of alley cropping to semi-arid conditions in the Jequitinhonha Valley
- Identify soil fertility constraints
- Create improved rooting conditions for increased drought tolerance in crops
- Improve soil conservation in watersheds
- Train technical staff in conduct of applied research

Family and Community Development through integrated Watershed management and Education program has partnered collaborators from Auburn and Brazil to conduct experiments over a three-year period that provided valuable data collection experiences and taught farmers in four communities about alley cropping and the importance of reducing soil loss in agricultural fields. Approximately 100 to 200 farmers have been impacted by this program.

Family Child Care Partnerships

- Increase the quality of professional practices of family child care providers
- Move licensed family child care providers to national accreditation standards
- Reduce the costs and barriers to attaining high child care standards

Family child care providers, particularly those in rural areas, have difficulty in finding accessible after-hours training that addresses the particular challenges home-based caregivers deal with in their work. With 20 full-time mentors located throughout Alabama targeting primarily non-metropolitan areas, the Partnerships overcome these barriers. Since 2000, the program has served over 500 family child care providers. In 2005, Partnership mentors have provided over 12,000 hours of individualized training for enrolled providers, more than 1600 individuals attended community group workshops, and over 3000 training hours were awarded. As a result of participation, 40 Alabama family child care providers have attained national accreditation standards. Mentors trained to provide technical assistance and education visit 230 providers and 110 provider assistants each week. Fourteen-hundred preschool-age children receive in-the-home care by participating providers.

For more information, please visit www.humsci.auburn.edu/fccp

Family Violence and Child Abuse

- Provide supportive services to families and communities
- Develop domestic violence task forces
- Develop conflict resolution resources and processes
- Develop and utilize media campaigns
- Focus on the links between animal abuse and human violence

Over 1,000 people participated in a Family Violence and Child Abuse program that "spotlighted the link between animal abuse and human violence." Twelve counties were involved in this program.

Fayette County Schools Curriculum Evaluation Project

- Assist Fayette County Schools to evaluate the academic impact of single-sex education
- Provide Fayette County Schools with an impartial third-party evaluation
- Assist Fayette County Schools in developing a comprehensive single-sex curriculum model
- Provide Auburn University with a testing platform for the evaluation of a bio-neurological research model

The Fayette County Schools Curriculum Evaluation Project is designed to help Fayette County schools develop a comprehensive single-sex curriculum and is evaluating the impact of the curriculum so that it can serve as a model for the fundamental reorganization of curriculum of all middle schools in Alabama. This evaluation project is being provided free of charge to Fayette County, representing a savings of tens of thousands of dollars.

FBI's Marked Man

- Find non-drug solutions to bacterial and parasite-induced poultry diseases

The launch of Ag-security.com in 2002, which uses existing and new and developing technologies to detect, identify, and respond to both natural outbreaks and agriculture-based bioterrorist attacks.

For more information, please visit <http://www.Ag-Security.com>

Fire Ant Management Program

- Conduct fire ant control demonstrations
- Control pests
- Promote the use of fire ant baits
- Disseminate information about fire ants in the media

Fire Ant Management Program administrators research improved methods of dealing with fire ants, in concert with a priority that control measures be environmentally friendly and that alternatives to conventional pesticides be considered and explored. Extension agents work to identify biological control agents. Information is provided in print and broadcast media.

Focus on Forestry

- Help youth explore interests in forestry
- Provide "Classroom in the Forest" and related activities
- Provide education and information about forest management, wildlife habitat and environmental history

Forest in the Classroom is a 4-H project that helps youth apply classroom theory to practical applications in the forest. The program is designed to "help young people explore their interests and expand their awareness of the world in which they live so they will grow up to become responsible adult decision makers." Forest in the Classroom provides youth an understanding of the link to the natural environment and the need to conserve and manage these resources. In 2004, 15,000 youth from 10 counties participated in "Classroom in the Forest" activities.

Food Laws and Regulations Training

- Provide training and educate participants about food laws, regulations, and ways to find specific legal information on the internet

The Food Laws and Regulations Training course has provided information and training to 241 participants, helping industry personnel obtain current legal information needed to keep their food processing plants operating.

For more information, please visit <http://www.ag.auburn.edu/poul/pdf/foodlawsinformation.pdf>

Food Source Lures Commercializing AU/Private Venture Product

- Provide income to principles, jobs to residents, and tax revenue on profits to help entrepreneurs commercialize their technology

The Food Source Lures program employed technology developed jointly by Auburn researchers and private enterprise. The project resulted in the development of a new product that is not harmful to the environment and wildlife in its use and that competes in the marketplace and has resulted in a new production process that reduces negative impact on environment in its manufacturing process. The project has created 5 to 10 jobs in manufacturing this product and spin-offs.

For more information, please visit www.foodsourcelures.com and http://www.ocm.auburn.edu/news_releases/lure.html

Forage and Cattle Field Day

- Provide latest research findings on forages and cattle

The Forage and Cattle Field Days host about 75 participants and highlights research and provides an opportunity for researchers and farmers to interact.

Fort Decatur Archeological Site Pre-Development Plan

- Develop a master plan for the Ft. Decatur site and assist in its nomination to the National Historic Register
- Highlight and connect the cultural resources of the site with the proposed new Center for Sustainable Rural Living and Learning at E.V. Smith Agriculture Research Center
- Provide a network of trails and riverside views
- Provide connectivity from a small visitor's/information-history center to the site
- Provide parking for those visiting the site

The Fort Decatur Archeological Site Pre-Development Plan is designed to increase tourism to Fort Decatur and to help the community's nomination to the National Historic Register. Auburn University Landscape Architecture is assisting in a pre-development plan for the Fort Decatur historic site at the E.V. Smith Agricultural Research Center. The plan will compliment other data for the listing of the site on the National Historic Register. The final plan involves a visitor's information history center, public parking for recreational use, and a trail network including signage, picnic areas, and restrooms.

Fort Mimms State Historic Park Development Plan

- Resolve the conflicts between the Alabama Historical Commission and residents of north Baldwin County concerning the Fort Mimms site
- Preserve the significant historical artifacts on the Fort Mimms site
- Increase economic development through increased tourism through the development of the Fort Mimms State Historical Park

The Cooperative Extension System has helped develop a comprehensive development plan for Fort Mimms Historical Park in consultation with residents of north Baldwin County and Alabama Historical Commission officials. Since the development of the plan, maintenance of the site has improved, facilities have been constructed, and interpretive signage has been developed and displayed.

Forward Price for Propane

- Save money on cost of fuel for farmers
- Help farmers manage costs effectively

Managing costs effectively is one of the greatest challenges to Alabama's farmers, and the Forward Price for Propane helps farmers manage these costs. During 1999 and 2000, farmers who participated in the program of forward pricing for propane saved a total of \$201,641 compared with those who did not forward price heating fuel.

Freedmen's Farm

- Create an Environmental Education Center for Wilcox County

The Freedman's Farm project has allowed hundreds of Wilcox County school children to participate in environmental education programs using the Farm facilities.

From Pasture to Plate

- Participate in beef quality assurance training and health program
- Tag cattle with electronic tags for tracking purposes
- Track animals through feeding and harvesting processes
- Promote AL cattle industry

2003 was the first year of the Alabama Beef Connection—From Pasture to Plate program. Fifty cattle operations participated with 3,000 head of cattle.

Gadsden Commercial Development Authority

- Assist city officials and agencies establish a Commercial Development Authority
- Help the Development Authority prepare a strategic plan

The Gadsden Commercial Development Authority has benefited from Auburn University expertise and Gadsden now has an active and successful Commercial Development Authority that attracts commercial businesses and assists existing businesses. The Authority boasts a strategic plan that guides focused development activities.

Ganges Radio Show

- Provide information about the culture and ecology of the Ganges river basin in India

The Ganges Radio Show was created to provide information about the culture and ecology of the Ganges river basin in India and will air on National Public Radio in 12 segments during 2006 and 2007. The show will reach over 2 million listeners.

For more information, please visit www.ibaradio.org/India/ganga/ganga.htm

Getting the Lowdown on High Tunnels

- Evaluate the economics and effectiveness of "high tunnels" - greenhouse like structures - that may extend the growing season for tomatoes and other crops

The Getting the Lowdown on High Tunnels project is still being researched. The project could potentially allow small-scale farmers to increase profits by producing early- and late-season tomatoes and other high-value vegetables and cut-flower crops, which could be sold straight off the farm and command premium prices.

GIS and Ecotourism: Interactively Mapping the Lower Cahaba River Basin for Recreation and Tourism Opportunities

- Provide an interactive GIS map to increase the awareness of ecotourism opportunities in the Lower Cahaba River Basin

The GIS and Ecotourism project has been funded and active work has begun. The project aims to produce detailed interactive and paper media-based maps of the lower Cahaba River basin that will show many ecotourism locations of the area. Interviews with local stakeholders have been conducted, and it has been determined that some stakeholders in the lower part of the Cahaba River basin are not aware of the opportunities and economics of recreation and tourism, especially ecotourism.

Global Bridges Preschool Project

- Design and implement a Comprehensive Preschool Global Bridges Curriculum for Chinese Pre-School Children
- Train Western-based and Chinese teachers to implement the Global Bridges Curriculum

The Global Bridges for Preschool Project currently serves approximately 1,000 Chinese early learners. Six Western-based teachers work collaboratively with Chinese teachers in 8 pre-schools in the Beijing, China area to design and implement a Comprehensive Preschool Global Bridges curriculum.

For more information, please visit www.educatingchina.com and http://www.ocm.auburn.edu/news_releases/chinapreschools.html

Governmental Excellence and Best Practices

- Encourage discussion on current issues facing government in the Alabama
- Identify successful programs and solutions
- Address problems faced by government at the city, county, and State levels
- Discuss and collaborate on the best governmental practices in the State and across the nation
- Anticipate and address future government concerns in Alabama

The Governmental Excellence and Best Practices program encourage discussion on issues facing government in Alabama, identifies successful programs and solutions, addresses problems faced by the local and State level governments, allows for discussion and collaboration on best practices in the State and across the nation, and helps anticipate and address future Alabama governmental concerns. Past topics of conferences include “Developing Excellence in Government” in Alabama, where participants had an in-depth look at Alabama’s “grade” in *Governing Magazine*, Perspectives on Gaming in Alabama, and Financing Alabama’s Future.

For more information, please visit <http://www.auburn.edu/outreach/governmentalexcellence/>; http://www.ocm.auburn.edu/news_releases/govexcellence.html; http://www.ocm.auburn.edu/news_releases/gambling.html; and http://www.auburn.edu/administration/univrel/news/archive/02_03news/02_03conf.html

Graysville, Alabama Economic Development Plan

- Assist community residents prepare and implement a strategic economic development plan

Auburn Outreach has helped Graysville, Alabama in the ongoing development of a viable economic development plan. To date, approximately 25 Graysville residents are helping develop the plan.

Groundhog Job Shadow Day

- Offer services and resources to students, families, and communities
- Provide career information and workforce preparation that leads to employment opportunities
- Offer The Economics of Staying in School and the Yes I Can Curriculum

Nine hundred students were afforded the opportunity to shadow a person in the workforce through the Groundhog Job Shadow Day Project. Eighteen hundred students from ten middle schools with an average of 30 students per class participated in the "Yes I Can Curriculum" for six weeks.

For more information, please visit www.wecan4u.edu

Group Project Abroad to Peru for Elementary, Middle, and High School Teachers of Spanish

- Educate teachers about the many aspects of Peruvian life and culture through a study abroad experience so they can educate others

The 5-week Group Project Abroad to Peru for Elementary, Middle, and High-school Teachers of Spanish gave 13 participants the opportunity to learn about many aspects of Peruvian life and culture. Spanish teachers in Alabama were given government grants to study abroad and to extend their knowledge of the Spanish-speaking world. In turn, the participants returned to their schools with materials that they created in Peru to educate their students. The program was sponsored by the Fulbright-Hays Group Study Abroad Program.

For more information, please visit <http://www.auburn.edu/~barrmys/>

Grow Your Own Jobs in West Alabama

- Develop commercially-viable value-added food products to be processed in a food-processing facility in Thomaston, Alabama
- Encourage local, small-acreage farmers to grow vegetables for value-added processing in Thomaston
- Make training videotapes that can be used to train local workers and farmers

The Grow Your Own Jobs in West Alabama project has worked with the Rural Heritage Foundation in Thomaston, Alabama and has helped them develop commercially-viable revenue generating food products and has conducted taste testing for new products at two Thomaston community events. The project team also worked with 20 to 25 local small acreage farmers to encourage production of vegetables for value-added processing at a facility built in Thomaston by the Auburn University Rural Studio. Overall, this and the previous projects' impacts in Thomaston have included major renovation of an unused, deteriorating school building through the involvement of the Auburn's Rural Studio; development of a small food-processing enterprise; increased sales tax revenue; leverage to obtain over \$600,000 in HUD and USDA grants; employment of 1 to 5 local people; and the involvement of at least 500 people in taste-testing. In addition, several Auburn undergraduate classes were involved in the project and two classes went on field trips. Six research presentations including a peer-review published article were produced from this project. Outside of Alabama, Auburn faculty members have made research presentations at a number of local, regional and national meetings. At international meetings in Chicago and Honolulu, the Auburn projects generated considerable interest among participants from across the United States and other nations where self-help micro-enterprises are encouraged.

Guide Book for Historic Center Guides

- Provide current and consistent information for volunteer guides and tour groups

A guidebook for historic center guides is currently in the writing phase.

Gypsy Moth Detection Program

- Establish and set traps for moths
- Monitor spread of the moth
- Provide information to the forestry industry

The Gypsy Moth Detection Program provided services to 45 counties in North Alabama where there is high risk of moth spread.

HACCP Roundtable

- Assist poultry processing plants in meeting federal regulations

The HACCP Roundtable has hosted 43 participants at the request of the poultry industry to help participants more efficiently meet federal regulations.

Hale/Pickens County Strategic Plans

- Assist Hale and Pickens counties prepare and implement strategic plans

The Hale and Pickens County Strategic Plans have involved hundreds of people in their development. The plans are used by county officials and citizens to make key development decisions that contribute to the well being of all county residents.

Harris Early Learning Center

- Offer high quality care and education for young children and their families
- Provide training and education for college and university students who will work with young children and families
- Conduct and support scholarly research efforts that expand understanding of how children grow and develop and how teachers can support their growth and development
- Work collaboratively with community members and other early childhood professionals and programs in expanding the availability of high quality care and education

The Harris Early Learning Center of Birmingham has served more than 190 preschool children from six weeks to five years of age and their families. Monthly parenting seminars and fairs are offered through the Center each year. Over 400 college and university students participated in observations of young children over the past year and more than 150 preschool teachers and paraprofessionals have participated in training opportunities. The teaching philosophy of the facility is grounded in the concept of "developmentally appropriate practice" in which children "learn by doing" and are guided by a curriculum designed to capitalize upon knowledge of how young children learn. The Center opened in 1995 and is managed by Auburn University and the Department of Human Development and Family Studies at Auburn University. Thirty-seven full time teaching staff are employed at the Center and two full time teachers are in each of the Center's 16 classrooms. In addition, there are part-time staff who are employed at the Center.

For more information, please visit <http://www.harriselc.org/index.htm>

Health Education/Wellness Program @ Blue Creek Coal Mine #4-Jim Walters Mines

- Provide mine employees with health education to prevent disease complications in the future

The Health Education/Wellness Program is new but has counseled approximately 150 employees on common diseases and educated them

about healthy lifestyles within the first month. The Program has been in service since October 1, 2005.

Health Fair

- Encourage a healthy workforce and to improve and maintain a healthy population countywide

The Health Fair has had a direct effect on 115 people who learned how to lead healthier lives at work and in general.

Health Fair in Rural Alabama

- Screen for diabetes, hypertension, and osteoporosis
- Make referrals for treatment

The Health Fair in Rural Alabama has helped diagnose previously undetected hypertension and diabetes and helped patients secure treatment for diabetes through screenings and referrals.

Health Fairs/screenings

- Provide health related screenings such as cholesterol, osteoporosis, cardiovascular risk assessment, blood pressure and/or body composition analysis
- Identify real or potential health issues early

The Auburn University Pharmaceutical Care Center provides health screenings to the community at least twice a year. Events that have been coordinated include Legislative Day at the Alabama Capital and industrial and community based health fairs. There have been over 1,000 participants over the last five years.

Health Law Issues Presentations

- Note and explain legal problems in the health profession

Presentations on health law issues have helped health care practitioners and providers over the states of Alabama and New York.

Health Literacy in HIV-Infected Patients

- Evaluate the health literacy of HIV-infected patients in a rural health clinic
- Determine deficiencies in health literacy as it relates to patient care outcomes

Health literacy is critical for patients with HIV infection to reduce the development of medication resistance related to medication administration. This limits treatment options to the infected patient and shortens survival. It is also important to determine health literacy as it relates to transmission of HIV. Program administrators believe by determining misunderstandings of fundamental concepts, these points can be emphasized in education to HIV-infected patients who are served and potentially improve therapeutic outcomes and reduce transmission of HIV in Montgomery County. The Evaluation of Health Literacy in HIV-infected Patients program anticipates enrolling 50 to 100 patients in an effort to evaluate their health literacy and to determine deficiencies in health literacy related to care outcomes.

Healthy Couples, Healthy Children-Targeting Youth

- Document program impact of youth's knowledge and skills related to healthy dating relationships and marriages
- Determine factors related to positive outcomes in adolescents' romantic relationships
- Establish a model of best practices for relationships/marriage education work with adolescents

The Healthy Couples, Healthy Children - Targeting Youth program helps to determine factors related to positive outcomes in adolescent romantic relationships. The program is establishing a model of best practices to educate adolescents about romantic and marital relationships in Alabama and across the nation. The program also aims to document the impact of youth's knowledge and skills relative to healthy dating relationships and marriage. The program was first implemented in 2004, with a pilot project in 12 Alabama high-school classrooms. From 2005 to 2010, the program is expected to be offered in more than 250 Alabama classrooms. It is anticipated that this program will reach over 5000 Alabama youth and will promote positive outcomes in the areas of increasing adolescents' knowledge and skills in developing and maintaining healthy close relationships, reducing dating violence, and reducing risky sexual activity.

Helping Families

- Enhance communication
- Serve parents and adolescents
- Increase effective communication
- Teach ways of dealing with conflict, discussing sensitive topics, rules, and tolerance and diversity

The Helping Families program has served 185 adolescents.

Helping Schools through the Arts and Humanities

- Offer opportunities for arts and humanities enrichment to Alabama public schools

The Helping Schools through the Arts and Humanities program has served more than 1,000 students in more than a dozen schools and/or school-related sites. The interest in this program on the part of teachers and schools is high and growing. The project may have 30 to 40 schools request programs. Teachers frequently cite the lack of arts/humanities cultural programming in their school and sometimes in their community. These programs are especially important to low-resource schools and communities.

Here a Roach, There a Roach

- Develop and validate techniques and products for managing and controlling pests and on studying their biology and physiology

The AAES have developed a "cockroach index," a mathematical model in which homeowners enter basic data about their home and get an accurate estimate of cockroaches lurking in their houses.

For more information, please visit <http://www.ag.auburn.edu/~spouny/cockro~1.htm>

High School Invitational

- Educate high school students in chemistry, physics, and geology
- Provide examples demonstrations for high-school teachers
- Recruit students to science programs at Auburn

The High School Invitational program attracts hundreds of high-school students to visit Auburn to witness demonstrations and learn about chemistry, physics, and geology. Interest among teachers in learning how to conduct demonstrations has increased. Additionally, this program has attracted science majors to Auburn.

Hispanic and Latino Contributions to Alabama Cultural and Economic Life

- Assist the target populations in adjusting to Alabama
- Assist target populations in their integration into the mainstream
- Assist target populations in expanding roles in Alabama's social, cultural, and economic life

For more information, please visit www.aces.edu/urban

Hope Grief Center

- Assist in planning and designing a grieving center that will serve people of all gender and ages
- Devise a plan that would incorporate a multitude of spaces where people can seek comfort and security after losing a loved one

East Alabama Medical Center has received the design and plans to build the Grieving Center in the future.

Hot New Use for Used Motor Oil

- Using furnaces fueled by recycled motor oil (instead of propane or natural gas) to heat poultry houses
- Find an alternative to curb the State's poultry grower's heating costs

The Hot New Use for Used Motor Oil program has resulted in the improvement of in-house bird performance and the reduction of costs of heating poultry by 50 to 60 percent.

Housing Authority Nursing Clinics

- Provide housing authority residents and other undeserved populations with health promotion activities, provide health information, educate about health maintenance activities

Nursing Clinics are available to Auburn Housing Authority residents three days a week at four different sites to provide health promotion activities and health monitoring and maintenance activities. The Clinics achieve demonstrable outcomes such as residents' lowered blood pressure, blood sugars, and cholesterol levels.

For more information, please visit http://www.ocm.auburn.edu/news_releases/nursingoutreach.html

Human Resource Assistance, Center for Governmental Services

- Provide legally sound personnel policies and procedures
- Provide equitable and legally sound compensation systems
- Provide legally sound job descriptions
- Provide assistance with employee performance appraisal systems

The Human Resource Assistance program has assisted approximately 16 counties, 14 municipalities, six public utilities, and two boards of education by providing human resource tools to help better manage their employees.

<http://www.auburn.edu/outreach/cgs/personnel.htm>

Huntsville Hospital

- Provide pharmaceutical care and pharmacotherapy to Huntsville Hospital patients
- Provide education to students, and residents of the UAB School of Medicine, Huntsville Campus, and AU 4th year pharmacy students
- Optimize pharmacotherapy of patients in Huntsville Hospital in order to benefit patients and the organization

The Huntsville Hospital project has saved Huntsville Hospital more than \$200,000 in pharmacotherapy costs over a two-year period.

I-85 Corridor Initiative/Alliance - Tourism and Community Development

- Remain committed to innovation, prosperity, collaboration and competitiveness along Interstate 85 in Alabama
- Improve economic development and quality of life through increased tourism in the corridor region
- Create long-term prosperity for the I-85 corridor region

The I-85 Corridor Alliance represents over 100 educational, public, and private sector members committed to sustainable growth along I-85 in Alabama. The I-85 Corridor Initiative e-Tourism and Community Development project has assisted in the development of the tourism assessment for the region represented by the Alliance. The result is the increased marketing of the Alliance and will result in an increase of tourism dollars in the area.

For more information, please visit www.i85corridor.org and http://www.auburn.edu/administration/univrel/news/archive/03_03news/03_03i-85.html

Improving Alabama's Senior Citizens Diets

Extension has been instrumental in the formation of local farmers markets where producers could sell their fruits and vegetables and in the certification of producers so they can accept the SFMNP vouchers. More than 100 farmers were certified through Extension efforts. Statewide more than 1200 farmers participated in the program and more than 47,000 seniors received vouchers. The program is enhancing seniors' diets by providing them with fresh, nutritious food.

Improving Alabama Families Money Management Skills

- Create and educate about "Investing in Your future" to provide basic investment education and financial management information
- Teach business record keeping
- Educate Habitat for Humanity homeowners about personal money management

Estimates are that more than 1,000 people made more than 4,000 long-term changes that will affect family financial situations. Eight counties produced newsletters containing financial management information reaching more than 6,000 citizens/families. Forty Habitat for Humanity homeowners were educated about financial issues including personal money management.

Independent Learning Program

- Provide college credit courses to citizens away from campus

The Independent Learning Program has provided college credit courses to hundreds of Alabama citizens in their own locales allowing them to broaden their education while continuing to meet their family and job responsibilities.

http://www.auburn.edu/distance_learning/programs/dlot_il/courses.php

Influenza Immunizations

- Provide influenza immunizations to individuals in the Lee County area

The Influenza Immunizations program has administered over 100 vaccinations to members of the Lee County public.

Innovative Secondary School Physical Education Curriculum

- Encourage underserved children and youth to engage in physical activity outside of school physical education
- Empower underserved children and youth to take personal and social responsibility and ownership of their own health and wellness
- Provide physical educators with innovative, culturally relevant, and developmentally appropriate physical education curriculum models
- Engage pre-service teachers in programs in schools in order to nurture their own sense of civic responsibility
- Provide positive role models for underserved children and youth

Secondary school physical education has been in a crisis of credibility for several years now. There is an urgent need for an innovative, culturally relevant, and developmentally appropriate approach to today's secondary school physical education curriculum. The Innovative Secondary School Physical Education Curriculum was developed to include Personal Challenges and Team Challenges and incorporates strategies for implementing personal and social responsibility. More than 100 Auburn University teacher candidates and approximately 500 young people in Alabama middle- and high-schools have been impacted by this partially grant-funded project.

INR Monitoring Reminder Program

- Remind physicians when patients need a PT/INR done for their anticoagulation patients

The INR Monitoring Reminder Program administers PT/INR tests to clinic patients at least once every four weeks following CHEST guidelines.

Instructional Improvement Initiative

- Improve quality of education
- Provide leadership capacity training to students, teachers, and administrators
- Lower drop out rates
- Develop actions plans and engage in action research to resolve local issues

The Instructional Improvement Initiative served four school systems and had participation from over 60 student leaders, more than 100 teachers, and many administrators. As a result, student achievement improved, drop-out rates were lowered, grant writing teams were formed in school systems, and local grants were pursued.

For more information, please visit <http://education.auburn.edu/resource/services/trumanpierceinstitute/instructional.html>

Integrated Physical Education Curriculum Project

- Provide physical educators with innovative, culturally relevant, and developmentally appropriate physical education curriculum models
- Provide an innovative model of integrated curriculum to classroom teachers and physical educators
- Provide resources and lesson plans so that teachers can implement the models themselves
- Engage pre-service teachers in programs in schools in order to nurture their own sense of civic responsibility
- Encourage underserved children and youth to engage in physical activity outside of school physical education
- Empower underserved children and youth to take personal and social responsibility and ownership of their own health and wellness

The integrated curriculum of physical activity for children foregrounds awareness of diversity and of other cultures in the United States and around the world while encouraging health enhancing physical activity. Curriculum models and lessons for physical education that include dance, sport, games, and other forms of physical activity characteristic of specific cultures were created. The accompanying classroom lessons and activities focus on other aspects of the cultures such as nutrition, education, and customs. Children log their out-of-school activities and report them to their classroom teacher every week. Mileage accumulated by the children is totaled in order to “travel” and arrive at various “cultural destinations.” The focus of the cultural destination is on a group of people or on the geographic location itself. This is a funded program through which schools have received much needed physical education equipment and classroom materials. The Integrated Physical Education Curriculum Project has been implemented three times impacting approximately 360 children, 21 teachers, and 30 Auburn University teacher candidates each time.

Integrated Termite Management

- Inform Alabamians about termites and new technologies and products for the promotion of integrated termite management in urban the environment

The Integrated Termite Management program educates Alabamians about termites and the destruction these pests cause, informs them about how to combat termites, and transfers new technologies to pest control professionals to help them control termites safely and in a way that is environmentally friendly. This helps to mitigate the enormous 3 to 4 billion dollar loss sustained due to termite damage each year.

Intensive Economic Development Course

- Train local economic developers
- Help develop strategies for sustaining long-term economic growth
- Introduce individuals to all phases of industrial and economic development
- Teach developers how to increase local employment
- Teach developers how to strengthen local economies

The Intensive Economic Development Course is a service of the Alabama Cooperative Extension System that began in 1984. A 2-week course is provided in order to help local communities develop strategies for sustaining long-term economic growth. Over 450 individuals have been trained through the course.

Interdisciplinary Diabetes Class

- Provide medication education to patients with diabetes

Two Interdisciplinary Diabetes Classes are held each week at facilities in Montgomery and Tuskegee, Alabama educating between 10 and 20 patients about why they have diabetes and how to manage the disease. Educators are an interdisciplinary team including pharmacists, podiatrists, physicians, nurse practitioners, dieticians, and social workers.

Internal Medicine Pharmacotherapy Practice

- Ensure appropriate pharmacotherapy and prevent drug misadventures for internal medicine patients at the University of South Alabama Medical Center
- Document overall cost saving related to the provision of this service
- Provide education to medical students, interns, and internal medicine residents

The project by the Internal Medicine Pharmacotherapy Practice monitors medication lists of ten to twenty patients daily. The evaluation of one aspect of the project, involving anticoagulation patient education on hospital discharge has reduced readmission for related events by 40 percent.

International Association of Workforce Professionals Conference

- Provide an educational program developed and conducted jointly by a university and a chapter of the association to improve knowledge or principles and practices in the field of workforce professionals

The International Association of Workforce Professional Conference enjoys the participation of approximately 100 to 150 individuals who work throughout Alabama with industrial relations. Participants receive an educational program designed to improve knowledge of and principles and practices in the field of workforce professional practices. The program is provided through a joint affiliation of the Center for Governmental Services and the Alabama Department of Industrial Relations.

For more information, please visit www.auburn.edu/cgs/training

Introduction to HACCP

- Provide International HACCP Alliance certification training to the food industry to product safety
- Improve safety of products being produced

The Introduction to HACCP course provides both online and face-to-face training necessary for meat and poultry processing plants to continue operating. One-hundred and thirty-eight participants have been certified.

For more information, please visit <https://openwebct.auburn.edu:444/public/HACCPIntro/index.html>

Job Analysis and Wage Plan Development for Wellborne Cabinet Company, Ashland, AL

- Document job responsibilities and duties for 200 manufacturing jobs
- Evaluate 200 manufacturing jobs using the American Association of Industrial Management's job evaluation instrument
- Conduct a labor market wage survey for selected benchmark jobs
- Compute a pay formula and classify 200 manufacturing jobs into pay classes

The Job Analysis and Wage Plan provides Wellborne Cabinet Company, an employer of over 900 individuals in Clay County, Alabama, a legally defensible pay plan that assists in employee recruitment and maintenance of employee morale. The project documents job responsibilities for all site manufacturing jobs aid job placement and employee training. Through the program, over 300 employees were interviewed to obtain job information. Information and data from this project, which was aimed at improving the human resource management and compensation system of a large Alabama employer, were used in classroom instruction for both graduate and undergraduate students at Auburn University.

Joint Product Development with University of Plymouth (England)

- Have Auburn University students participate in a global design project

There have been approximately 40 students involved in 5 product design projects.

Junior Master Gardener

- Increase youth knowledge in horticultural education by utilizing environmental science as a vehicle to develop academic skills, character education, and service learning
- Enhance reading, writing, science, and math skills through "hands-on" and applied learning
- Provide a strong and positive link between the public and higher education to collaboratively prepare youth for tomorrow's workplace through career exploration, school to work programs, and basic life skill enhancement
- Improve the health and nutrition of youth through gardening and nutrition education
- Provide certification and recognition for youth for attaining personal goals

The Junior Master Gardener program in Alabama trained over 620 teachers, leaders, volunteers, and Extension personnel. In 2004-2005, there have been more than 115 registered Junior Master Gardener groups. Just under 4,000 youth have been impacted by this program.

For more information, please visit <http://www.jmgkids.us/>

Keeping Alabama's Poultry Industry Healthy

- Address needs of the poultry industry to promote industry health

With diverse projects, Extension specialists working with the county Extension agents were able to address many of the needs of the poultry industry, including those of the individual growers as well as processing facilities. Projects targeted to help the industry included: Troubleshooting Salmonella Control in Broiler Operations; Sand as an Alternative Bedding Material for Broilers; Value of Production Feed Additives in Broiler Performance; Nutritional Studies for Bobwhite Quail; Computer Short Course for Poultry Managers; Evaluation of Incineration for Disposal of Poultry Mortality; Educating the Educators; Career Development Program; and Backyard Poultry Flock Production. The projects also reached large numbers of school teachers and young people, better educating them about the nature of poultry industry in Alabama as well as industry career opportunities.

Kiwifruit in 'Bama

- Grow kiwifruit in Central Alabama as a specialty crop

Researchers predict commercial growers in Alabama could realize yields as high as four to five tons of kiwifruit per acre.

For more information, please visit http://www.auburn.edu/administration/univrel/news/archive/01_03news/01_03kiwifruit.html

Large Business Wage-Salary Benefit Survey

- Provide recipients with a current survey of large business in Alabama

This provides a specific wage-salary-benefit survey for large businesses in Alabama. The type of data generated is not available from any other source in the detail we provide. It has been a fundings source for graduate assistants for many years.

Leadership Randolph County

- Identify and select emerging leaders to participate in Leadership Randolph County
- Inform and educate program participants of the needs and opportunities related to Randolph County
- Inspire program participants to become more proactively involved in Community Development
- Introduce potential leaders to present leaders and encourage discussion among these groups
- Encourage program participants to become actively involved in citizens' politics in the county

Leadership Randolph County has over 225 graduates who are actively involved in making a difference in their communities and in Randolph County.

Learning in Science and Technology for Youth

- Prepare Alabama youth for meaningful careers
- Expose Alabama youth to fields of science and technology
- Provide interesting and engaging learning experiences
- Provide programs that target underserved youth populations

The 4-H Learning and Science in Technology for Youth project trained 56 Extension Agents in 2003.

Lee County AIDS Housing

- Provide men and women with AIDS a sense of home and security and the space and privacy to maintain their individual family units

The Lee County Aids Housing project has partnered the Auburn Outreach Center and Lee County AIDS Outreach and the collaboration has built a house for men living with AIDS, a screen porch, and an activity room. In designing and building housing for AIDS victims, the team sought to be responsible both with the health of the victims and with the cost to build and maintain the design. There are future plans to build a house for women and their children.

Lifestyle Changes

- Offer Health fairs, cooking schools, recipe handouts and publications for cancer survivors and those at risk

The Lifestyle Changes programs were designed to give individuals recipes, printed publication and health information that they could live by on a daily basis to assist them with targeted areas of illness such as diabetes, heart disease and obesity.

Lime for Udder Health

- Develop a product that will safely prevent and control mastitis

The Lime for Udder Health project could provide dairy farmers with a highly economical, all-natural mastitis-preventing tool: hydrating lime that would be applied to the "mattress pads" where dairy cows rest. Mastitis causes United States milk producers an estimated 1.4 billion dollars each year.

Livingston, Alabama Charette

- Conduct an evaluation process culminating in a presentation to church congregation
- Create plans for renovation of the Houston-Bailey House were drawn
- Draw master plans of the entire church complex
- Present cost estimates and a phased rehabilitation plan
- Present the complete restoration schedule presented

The Livingston, Alabama Charette program has allowed University Design-Build Master's Program students to provide design and construction expertise in planning for the restoration and rehabilitation of the Houston-Bailey House in Sumter County. A three-day evaluation process was conducted, plans were drawn, cost estimates and a phased rehabilitation plan were presented, and the complete restoration schedule was presented.

Make Mine Porchetta

- Produce and market a gourmet Italian pork product that has been available only in the city of Ariccia, Italy

Early test marketing indicates that the product could be very successful. If so, porchetta will be an economic boon for Alabama and for struggling small-scale Alabama pork producers who will be needed to grow pigs specifically for the product.

Making the Switch to the Organic Niche

- Launch a project devoted entirely to organic vegetable production
- Provide growers solid data on transitioning to organic, becoming federally certified, maximizing their production and marketing their organic crops

The Making the Switch to the Organic Niche project improves the quality of life for all Alabamians, especially small family farmers.

Management Training

- Provide management training for health care managers

The Management Training program has provided training for 90 health care manager participants.

Managing and Valuing Diversity—Soy Unica, Soy Latina

- Increase understanding and tolerance of cultural differences
- Promote and/or establish collaborative work
- Increase information and awareness of the Hispanic population in Alabama

The Managing and Valuing Diversity “Soy Unica, Soy Latina” project has involved the participation of 500 elementary children, 350 families, and 2000 clients.

Marketing Plan for the Alabama Scenic Byways Advisory Council

- Promote rural Alabama by promoting the scenic byways program
- Increase economic development in rural communities through tourism
- Reduce the costs to local communities to develop an official State scenic byway

The Cooperative Extension System has developed a statewide marketing plan to promote existing and potential byways. Ten regional workshops have been conducted in conjunction with the Alabama Bureau of Tourism and Travel.

Master Cattle Producers Training Program

- Provide comprehensive information to beef producers on how to produce beef cattle in Alabama
- Certify cattle producers
- Ensure that Alabama-grown beef meets or exceeds consumer demands
- Assist cattle-producers to remain competitive in the larger market

Between 1999 and 2000, the Cattle Producers Training Program certified more than 800 cattle producers and, to date, has provided comprehensive information to over 3,000 beef producers. The Alabama Beef Quality Assurance Certification Program strives to ensure that Alabama-grown beef meets and even exceeds consumer demands. Both Tennessee and Louisiana are developing programs based on those held in Alabama. South Carolina, Tennessee, and Oregon are developing manuals based upon the Alabama prototype.

Master Gardener Program

- Educate Master Gardener Volunteers who serve the public with community service projects
- Provide gardening and home grounds educational outreach
- Promote research based information
- Encourage safe use of equipment, proper lawn care, pesticides and IPM
- Organize community action groups

The Master Gardener program has had approximately 1,876 volunteers in over 40 Alabama counties within the last three years. These volunteers educate the general public on gardening related topics. The program has logged over 15,000 volunteer hours that have contributed to lowered production and labor costs for non-profit organizations and municipalities.

For more information, please visit <http://www.aces.edu/mg/> and <http://www.alabamamg.org/>

Master Plan for Crossroads Home for Boys

- Provide homeless at risk teen boys a short-term, safe, and stable living arrangement
- Teach teens guardians life skills
- Offer counseling sessions for at risk teens and guardians

The Master Plan for Crossroads Home for Boys at Chambers County, Alabama provides homeless at risk boys a short term, safe, and stable living arrangement and provides teens and their guardians counseling and education of life skills. A studio of Auburn University Landscape Architecture students gathered and assimilated the information for the Crossroads facility master plan.

Master Wildlife Program

- Host a Master Wildlife satellite series in 2003
- Provide information on wildlife management topics

The Master Wildlife Program was broadcast from Clemson University and was hosted by 32 counties in Alabama. Twenty-five percent of the participants were from Alabama, totaling 800 landowners, wildlife enthusiasts, biologists, and loggers.

Medication Assistance

- Provide assistance with medication costs to patients

The program has helped 36 patients with medication costs this year.

Medication Safety Media Information

- Educate the public about the importance of properly storing and using medications and identifying common medication misconceptions

A media program has been prepared to inform viewers about medication safety and proper storage and usage of medications and that identifies common misconceptions regarding prescription and over-the-counter medications. The program will be broadcast throughout Southwest Georgia and East Alabama on the WRBL Channel 3 (Columbus, Georgia) 11:00 news broadcast.

Meeting Needs of Peanut Farmers

- Conduct a Peanut Scouting School
- Provide information on insect pests and management options
- Provide information on new technology
- Increase value-added income to the State
- Improve and increase peanut production

The Meeting Needs of Peanut Farmers initiative strives to support and assist peanut farmers and to reduce the number of peanut farmers who consider quitting peanut production or getting out of farming all together. Peanut Scouting Schools have been held for over 20 years, including 2 in 2003 and 4 in 2004. The initiative focuses on how to run a profitable operation while dealing with increasing production costs and changes in farm legislation.

Memory and Healthy Aging Center

- Provide education and support for persons with memory problems and their families
- Refer persons dealing with memory problems to appropriate resources
- Foster interdisciplinary work to improve approaches in care of families of individuals with memory problems

The Center has served over 120 families in its 1.5 years of existence.

Middle East Politics

- Educate the general public and policy makers about U.S. policy in the Middle East
- Enhance public debate about U.S. policy in the region
- Help the government formulate better, or at least more informed, policy toward the region

The Middle East Politics project has educated the public, teachers, students and policy-makers about the Middle East and U.S. Middle East policies. Education is provided to the general public and local groups through public talks, policy papers, briefings, participation in governmental conferences, publication of op-ed pieces, and expert witness testimony. Additionally, expert speakers have been brought to Auburn to provide education, including six speakers during the Presidential Symposium in Spring 2003 who talked about the Gulf in the weeks leading up to the war. Talks and papers also target United States policy makers and analysts. These targeted talks and papers are designed to widen the informational base on which policy is built and to link abstract theoretical arguments to concrete policy questions. The Middle East Project administrator has also acted as an expert witness lending expertise to complex court cases.

Middle School Evaluation Project

- Evaluate the effectiveness of the International Baccalaureate (IB) program in its first year of implementation
- Evaluate effectiveness of the staff training and development process employed during the initial year
- Determine how the middle school teachers can be most effectively trained regarding IB goals, objectives, and practices
- Determine the effectiveness of the IB program in improving student achievement

A group of University researchers are assisting a middle school leadership team in the development and implementation of professional learning strategies that seek to promote the successful implementation of the International Baccalaureate Programme (a methodologically innovative program steeped in best practices for student learning). The Middle School Evaluation Project has impacted 20 teachers, 232 students, and the students' parents and communities.

Moundville Medical Center

- Provide medication assistance to the underserved
- Aid Medicare beneficiaries in choosing and enrolling in a Medicare Part D prescription benefit plan
- Provide drug information to physicians/nurse practitioners
- Provide an educational site for PharmD students from Auburn

The Center has received approximately 200 patient visits and provides patients with medication assistance and Medicare assistance and education. The Center also provides drug information to members of the medical community.

Multicultural Curriculum for Alabama Youth (MCAY)

- Promote racial tolerance, develop youth diversity leadership skills, and expose high school students to various cultures

While America has made tremendous strides in its historical struggle in eliminating the formal and legal structures of racism, many of its more informal aspects remain and their negative impact on society continue to be significant. Multicultural Curriculum for Alabama Youth, by training our next generation of leaders in developing and living comfortably the multicultural and inter-racial diversity of Alabama, positions Alabama not only to overcome its lingering racial difficulties, but to realize its potential as an increasingly racially and culturally diverse State in an equally culturally diverse globalized world. The Multicultural Curriculum for Alabama Youth Program is in the fundraising stage and is expected to begin in spring 2006.

Music Director, International Collegiate Programming Contest

- Provide theme music for an annual contest

The music director provided theme music for the annual International Collegiate programming Contest. The composer's music has been performed in Prague and Shanghai.

Music in the Schools

- Inspire students and encourage school involvement in the arts through personal contact and artistic performances

The Auburn University Singers have performed an average of six performances each year giving approximately 5,000 school children in Lee, Russell, Macon, and Chambers county students an invaluable experience in the arts. Blue Cross-Blue Shield of Alabama sponsors the program.

NASA Southeast Regional Technology Transfer Center Affiliate

- Provide NASA technology transfer assistance to Alabama businesses resulting in new product development, higher profits, and job growth
- Assist Alabama businesses in obtaining NASA funding to conduct research and develop products for use in the space program

Over 375 Alabama businesses have been contacted and made aware of cutting edge NASA technologies and funding opportunities to improve their business.

National Egg Products School

- Train industry personnel and government officials on the safety and quality of eggs and egg products

The National Egg Products School program was created based on the needs and requests of industry and government officials across the United States. The program enhances the knowledge of State and federal inspector and industry personnel leading to improved profitability and potentially improved product quality and safety.

www.ag.auburn.edu/poul/neps

Non-traditional Agriculture

- Collaborate and partner regarding experimental biotechnology, commercial fishing, aquaculture recreational fishing, environmental stewardship, urban horticulture, and horticulture food share projects
- Address needs of small producers and underserved communities

The Non-traditional Agriculture project is a four-year project involving 1,890 institutions for the advantage of agbiotech to farmers and consumers. The project assists and supports non-traditional farmers, small farmers, and small enterprises in succeeding within these changing agricultural environments.

Notasulga Journalism Project

- Draw plans to rehabilitate a building in Notasulga for an Auburn University Journalism Outreach Program

The Notasulga Journalism Project is currently in the fund-raising stage.

Nutrition Education Program

- Improve the likelihood that Food Stamp participants will make healthy food choices with a limited budget and choose active lifestyles consistent with the current Dietary Guidelines and USDA Food Guidance System
- Enhance practices related to thrifty shopping and preparation of nutritious foods
- Teach ways to safely handle, prepare and store food

The Program allows Extension agent assistants to help Food Stamp participants in rural counties of Alabama to select more nutritious and affordable foods. Food Stamp recipients are starting to purchase more fruits and vegetables, low-fat dairy foods, whole grains, and lean meats. Better nutrition will positively impact the number of Alabama citizens who suffer from chronic diseases.

www.nal.usda.gov/foodstamp/National_FSNE.html

Nutrient Management and Waste Vendors

- Form a multi-agency waste-management team
- Increase quality and profitability through agricultural education
- Protect the environment
- Develop and provide educational materials and programs

The Nutrient Management and Waste Vendors provided training sessions on nutrient-waste management at the producer and company level to enhance water quality throughout Alabama. In addition, multi-agency waste-management teams were created to assist Alabama livestock producers to comply with State and federal regulations. More than 600 people were certified in the years 2000 to 2003 to transport and apply animal waste using environmentally safe methods.

Oak Park Nursing Home

- Optimize patient care for residents at Oak Park Nursing Home
- Provide education to nurses and staff of the nursing home
- Provide education to residents of the Oak Park Assisted Living Facility

The Oak Park Nursing Home Project has provided approximately 45 patients and 10 to 15 residents in the facility with chart reviews and education. Recommendations were made to physicians to optimize treatment, as needed. Inservices were provided to nursing staff.

Ogletree Elementary Kick Off Assembly for Alabama's Get Caught Reading Program

- Encourage kids to read

The Ogletree Elementary Kick Off Assembly for Alabama's Get Caught Reading Program involved over 450 students, teachers, and members of the media in an effort to encourage kids to read.

For more information about the Get Caught Reading program, please visit <http://www.alabamabookcenter.org/programs/get-caught-reading.html> and for more information about the Ogletree Elementary Kick Off, please visit http://www.auburn.edu/academic/liberal_arts/cah/news/release_gcr_launch.htm

On Line Master Degree in Rehabilitation Counseling

- Upgrade the skills of employed rehabilitation counselors in the Southeast through the provision of a graduate online degree program
- Provide a one week per semester on-campus educational experience for the online students
- Graduate a class of at least 20 graduate rehabilitation counseling students each two years
- Provide full time (3 courses) on-line graduate coursework each semester in rehabilitation counseling

The On Line Master Degree in Rehabilitation Counseling program is sponsored by the U.S. Department of Education, Rehabilitation Services Administration and has federal monies which have been used to upgrade the skills of Alabama Rehabilitation Counselors. Each counselor works with up to 250 disabled Alabamians and their having better skills from taking the course work and earning a degree from the program should impact on thousands of Alabama citizens with disabilities toward making them productive workers and tax payers. The program has graduated three classes of approximately 66 degreed counselors that work for various vocational rehabilitation agencies in the region. The fourth class, enrolling 22 students, began fall 2005.

www.auburn.edu/cspd/

Operation Diabetes

- Screen for diabetes
- Educate the community about diabetes and its management

The Operation Diabetes program is an initiative of the American Pharmacists Association Academy of Student Pharmacists. The program helps screen community members for diabetes and educates citizens about the disease and how to manage it. Screenings are conducted approximately twice a year and serve between 50 and 100 patients during each event.

Organic Production/Certification/Research

- Locate suppliers for components needed for organic production of transplants
- Rate products and make information available to local producers
- Design a greenhouse system to produce high quality vegetable transplants following the OMRI and NOSB Guidelines
- Produce quality transplants for the field research at E.V. Smith and Cullman Research Stations
- Become certified as an Organic Grower
- Produce a potting mix that is OMRI approved, made with locally available components, and is available to local area farmers to buy or make on their own

The Organic Production/Certification/Research program has approximately 20 people working to accomplish their goals. Two jobs have been created by the organic initiative. This program will benefit all of the south eastern states. At the conclusion of our research we will have a farm design and a greenhouse design in place that area farmers will implement at their own fields to produce value added organic products.

For more information, please visit <https://fp.auburn.edu/auorganicveg/>

Osteoporosis Screening

- Provide community based screening for osteoporosis in a retail drug store setting

The Osteoporosis Screening program has allowed over 300 individuals to be screened for the disease.

Outdoor Alabama Partnership

- Promote Alabama's ecotourism opportunities to residents and visitors to Alabama
- Develop a statewide ecotourism association
- Increase jobs in rural areas while protecting the environment through ecotourism opportunities

The Outdoor Alabama partnership is in the initial stages and will, within the next year, provide Alabama communities with a manual identifying assistance that is available from State, federal, and private organizations to develop and promote ecotourism opportunities.

Partners across the Pond: Using Technology to Link Loachapoka Elementary and Buildwas County Primary School, Shropshire, England

The Partners across the Pond: Using Technology to Link Loachapoka Elementary and Buildwas County Primary School, Shropshire, England program has involved 60 third grade students, 40 Auburn University students, and 30 Buildwas Primary School students in an effort to form a partnership that benefits teachers and students at both Loachapoka and Buildwas schools. By the end of the projects, third grade students not only learned the game of cricket that is popular in another culture and technological skills of using a computer and digital cameras, but established communication via e-mail with peers from another culture.

For more information, please visit <https://fp.auburn.edu/sinelo/3010tech>

Partners in Community Service

- Establish a University-wide culture that embraces diversity, community engagement, and civic responsibility through the vehicle of service learning

The Partners in Community Service program encourages students in University Courses to volunteer hundreds of thousands of service hours to underserved and demographically diverse communities, providing over \$1 million in in-kind contributions to Alabama.

Pediatric Inpatient Care

- Improve medication adherence, medication therapy, and patient outcomes of pediatric patients admitted to a local hospital
- Educate pediatric patients and parents on medication
- Educate pharmacy students about pediatric pharmacotherapy

Each patient entering the University of Alabama, Birmingham pediatric service is evaluated for appropriate and optimal medication use. Patient and parents are also educated on their home medications and diseases. The Pediatric Inpatient Care program has allowed thousands of patients to receive care and has resulted in an approximately \$80,000 reduction of pharmacy costs per year for the service.

Pediatric Intensive Care Patient Outcomes

- Review and optimize medication therapy of patients admitted to the pediatric ICU

The Pediatric Intensive Care Patient Outcomes project reviews hundreds of patients yearly to optimize their medication therapy. Patients admitted to the Huntsville Hospital Pediatric Intensive Care Unit receive reviews and optimization of medication therapy, thus improving patient outcomes.

Persistent Issues in History Network

- Develop the foundational knowledge of history and government necessary for effective democratic citizenship
- Engage students with reasoning about persistent issues of democratic life
- Develop teachers' abilities to conceptualize and implement complex instruction about historical and civic issues
- Develop technology tools to facilitate historical and civic inquiry for teachers and students
- Develop and support a community of master teachers who are skilled in engaging their students in problem-based historical inquiry (PBHI)

The Persistent Issues in History (PIH) Network has provided direct development and classroom instruction to 55 teachers, 15,625 fifth through twelfth grade students, and 325 undergraduate and graduate students at Auburn and Indiana University. The Network provides resources and professional development tools to a growing national group of history teachers. PIH funding has been used to develop video case studies of PIH curriculum units through 2007. The plan is to continue to develop content for our long-term goal of establishing a robust distance learning outreach environment for PIH. The PIH website offers teachers online professional development, classroom-tested curriculum materials, and authoring tools for creating their own technologically supported lessons. Innovative uses of technology provide students with more realistic encounters with the past and with online support as they engage in the challenging task of historic thinking.

For more information, please visit www.pihnet.org

Pesticide Training and Education

- Provide a training program to certify worker protection handlers and pesticide applicators
- Train in safe pesticide use
- Organize and conduct pesticide-dealer meetings
- Educate farmers about safe use of pesticides

The Pesticide Training and Education Program educates farmers and others about the safe use of pesticides and other restricted use agricultural chemicals. The program also teaches proper stewardship of the land. In 2000, 150 people attended the program, with a total of 2,500 new pesticide applicators trained. In 2001, more than 2,700 new pesticide applicators were trained. In 2002, more than 30 training sessions were held and almost 4,000 people were trained.

Pharmaceutical Care Services on the Total PEEHIP

- Lower the cost of providing healthcare for the PEEHIP (Public Education Employees Insurance Program) population while maintaining or improving the health of the constituents

Over 80 PEEHIP enrollees have participated in the program.

For more information, please visit http://www.ocm.auburn.edu/news_releases/medcosts.html

Pharmacist-managed Anticoagulation Service

- Provide a clinical experience for pharmacy students
- Provide a service that assists physicians in the patient management
- Decrease hospitalizations of patients due to anticoagulation therapy
- Decrease healthcare costs
- Provide education to resident physicians in training

The Pharmacist-managed Anticoagulation Service has managed 25 patients and had 143 patient visits this year.

Pharmacotherapy Consultation Service

- Provide a drug information resource, pharmacotherapy guidance, and education for physicians

The Pharmacotherapy Consultation Services provides a drug resource and pharmacotherapy guidance and education to physicians and is used by physicians every day.

Pharmacotherapy Services for Carraway Methodist Medical Center, Internal Medicine Residency Program

- Improve drug therapy knowledge among residents
- Improve patient drug outcomes

It is vital for medical professionals to continue to be trained to take care of patients (citizens of Alabama). Pharmacists working in conjunction with medical professionals help to prepare them to take better care of their patients and provides high quality healthcare. The Pharmacotherapy Services for Carraway Methodist Medical Center, Internal Medicine Residency Program has involved approximately 40 internal medicine residents. Approximately 500 patients who receive primary care from the residents have been aided.

Pharmacy Continuing Education Seminars

- Provide graduating pharmacy students a venue to demonstrate presentation skills
- Provide pharmacist continuing education through live CE hours
- Improve understanding of the skills related to the evaluation of drug literature

The Pharmacy Continuing Education Seminars provides approximately 20 hours of continuing education over the course of six months. The sessions are provided free-of-charge and are webcast to area hospitals. Approximately 25 pharmacists have taken advantage of these seminars, on average.

Pharmacy Poison Prevention

- Educate first graders on issues related to poisoning

Each year, over 100 first graders participate in the Poison Prevention project and learn about poison and poison prevention.

Pharmacy Student Provided Patient Education

- Increase the amount of diabetes education to our patients with diabetes at Columbus Regional

The program trains students to increase diabetes education at the Columbus Regional Medical Center. Columbus Regional Medical Center is the tertiary care referral center for Southwest Georgia and East Alabama. A large number of patients come from rural East Alabama.

Physical Education Curriculum for 4H Centers of Alabama

- Provide Physical Education curriculum packets with equipment to all counties in Alabama

The Physical Education Curriculum for 4H Centers of Alabama program is in the development stages. It is expected to impact more than 111,000 youth total in all counties in Alabama.

Pirouge Containers - Katrina

- Propose a way to provide substantial, livable housing units to people in need
- Design and build prototypes for housing units by AU Design-Build Masters Program students
- Present research to FEMA, the Red Cross, and other relief agencies with the hope that mass production techniques will provide all displaced families with warm and dry rooms

The Pirouge Containers - Katrina project has given the Design-Build Master's Program students the opportunity to research, construct prototypes, and share information with other Universities and FEMA, the Red Cross, and other relief agencies in an effort to provide all displaced families with warm and dry rooms using steel shipping containers. There is a surplus of steel shipping containers in the southeast region and throughout the United States. These shipping containers are typically 8 feet wide by 40 feet long and have a ceiling height of 8 to 9 feet. These containers are designed to be weather tight and to withstand harsh environmental conditions.

For more information, please visit www.cadc.auburn.edu/design-build and http://www.ocm.auburn.edu/news_releases/katrinahousing.html

Policy Education

- Educate producers, agribusiness, and those concerned with agriculture on emerging and existing Federal and State agricultural legislation
- Provide an informational framework for the development, evaluation, and consequence of public policy

The program has informed over 100,000 agriculture producers, extension educators, agribusiness professionals and government employees. Education programs on the new farm bill and a base software update have been provided to producers, crop advisors, farm analysis personnel and all agricultural extension agents. This project has received numerous awards.

Polypharmacy/adherence Counseling

- Improve patient adherence to medication therapy
- Assist physicians in determining ways to decrease the number of medications a patient is receiving or the number of doses a patients takes per day

The Polypharmacy/Adherence Counseling program has seen 24 patients for counseling to encourage adherence to medication therapy this year.

Precision Agriculture and Precision Forestry in Alabama

- Identify ways to apply precision agriculture technology (e.g. global positioning systems) to Alabama crops and timber management conditions and transfer that technology to the State's farming and land management communities

Through Precision Agriculture and Precision Forestry in Alabama, AAES is creating the tools and techniques necessary to assist farmers in using this new technology to their own and the environment's benefit. Further work is adapting the same technology to the practice of intensive forestry.

Prescription Drugs for Hurricane Victims

- Provide emergency medications and prescriptions information to individuals displaced by Hurricane Katrina

The Prescription Drugs for Hurricane Victims Program has helped provide medication for patients displaced by Hurricane Katrina averting serious medical consequences. The program participants have donated their time and medications to the Red Cross at no charge.

Presentation on Medication Safety

- Educate Alabama Extension Agents about safe storage, administration, and use of medications

The Presentations on Medication Safety were provided to approximately 20 agents at each of two presentations.

Presenting the Virtual Chicken

- The implementation of a 3-D animated interactive DVD of the reproductive tract of a chicken

The Presenting the Virtual Chicken project is implementing an interactive DVD educational product of the reproductive tract of a chicken that will put you inside that tract to see, among other things, how an egg forms. This model can be used as a teaching tool across the nation.

Prevention of Relapse and Recidivism for Incarcerated Adolescents of Alabama

- Determine the feasibility of our adaptation of Emotionally Focused Therapy for use with incarcerated adolescents and their families to reduce recidivism and relapse
- Determine if the adolescents and family members show clinically significant improvement over the course of treatment in emotion regulation, attachment models (IWM), family functioning, and problem behaviors and psychopathology
- Determine if the adolescents and family members accept the EFFT treatment and if we can deliver EFFT with our proposed masters student therapists, with our chosen population of incarcerated adolescents and their families, and in the juvenile correctional facilities in which we will offer this treatment
- Determine if the adolescents and family members receiving treatment show greater improvement in those areas compared to a manualized alternative therapy (control group) upon which this new EFFT treatment has been designed to improve
- Determine if EFFT reduces relapse to problem behaviors and recidivism to the correctional facilities

The Prevention of Relapse and Recidivism for Incarcerated Adolescents of Alabama project started the Multiple Family Group Intervention in August and the Emotionally Focused Family Therapy Treatment is expected to begin by January, 2006. During training, ten sex offending adolescents and the dorm staff at Mt. Meigs Juvenile Correctional Facility were treated and in the current multiple family group ten sex offending adolescents and their families are being treated.

For more information, please visit <http://www.humsci.auburn.edu/publish.php?id=168>

Pro Bono Legal Services

- Benefit students at Auburn University, individuals in the Auburn, Alabama and Albuquerque, New Mexico communities, those affected by recent storms, and federally recognized tribes in Alabama, Arizona, and New Mexico

Pro Bono Legal Services has allowed some individuals to secure relief, circumvent legal problems, and avoid harmful legal mistakes.

Productive Land Use Systems Project, Haiti

- Assist USAID-sponsored non-governmental agencies to sustainably improve agricultural production and marketing in Haiti
- Provide market research support
- Provide technical support in crop production
- Carry out agroforestry and tree improvement research
- Carry out on-farm variety testing and soil conservation research

The Productive Land Use Systems project has helped USAID programs and non-governmental agencies in Haiti enjoy stronger technical support in agricultural and forestry fields. Improved marketing, improved crop varieties, soil conservation, tree planting, and other initiatives have benefited several thousand Haitian farmers.

Professional Logging Manager Training Program

- Provide training program
- Provide for forest sustainability
- Develop materials, information, and resources
- Utilize satellite and internet to connect with loggers in Alabama

The Professional Logging Manager Training Program provides certification and recertification of loggers under the Sustainable Forestry Initiative. One hundred forty-five loggers completed the Professional Logging Manager program in 2004 and 61 loggers completed the PLM program in 2003. Extension provides approximately 20 percent of the total 14,000 hours of logger Continuing Education offered in Alabama.

Project ECLIPPS

- Increase the quantity and improve quality of personnel available to serve young children with low incidence disabilities and their families

The Project ECLIPPS has certified approximately 51 individuals to serve as special instructors in early intervention programs serving infants and toddlers with disabilities. Approximately 15 individuals have completed or are working on Master's degrees in Early Childhood Special Education. Project ECLIPPS is funded by a Department of Education Office of Special Educations Programs Personnel Preparation grant that was funded for five years. Auburn professionals submitted the grant to meet a statewide need for individuals trained to serve infants and toddlers with disabilities.

For more information, please visit www.auburn.edu/eclipps

Project Underpants

- Promote service-learning in nursing students and student involvement in the community
- Provide underwear and socks for children in the headstart program

Project Underpants has allowed approximately 400 nursing students to participate in community service projects and provides underwear and socks for students in the Head Start program.

Project Uplift

- Help children develop constructive, happy lives to decrease delinquency Lee County

Project Uplift has served over 4,000 children and volunteers to help children develop constructive and happy lives to decrease delinquency in Lee County.

For more information, visit http://www.auburn.edu/student_info/project_uplift/

Promoting Alabama Youth Development

- Enhance adolescents' individual skill development and interpersonal competence
- Reduce adolescents' engagement in negative risky behaviors
- Increase adolescents' future orientation

The Promoting Alabama Youth Development program has been provided to over 3000 Alabama adolescents in Health, Family, or Consumer Science classes or as part of after-school programming. Promoting Alabama Youth Development modules have been accessed by extension personnel and youth-serving professionals nationally.

<http://www.aces.edu/teens/alyouthdevelopment/index.htm>

Property Tax Education and Certification Program

- Provide an educational program to assist Alabama State and county property tax personnel achieve more equitable administration of the property tax laws of the State of Alabama in partnership with the Alabama Department of Revenue
- Enhance appraisal, mapping, and management skills so that participants may be certified by the State
- Enable participants who successfully complete the curriculum and pass a comprehensive certification exam to earn the designation of Alabama Certified Appraiser of Real Property, Alabama Certified Appraiser of Personal Property, Alabama Certified Tax Administrator, Alabama Certified Digital Mapper, Alabama Certified Manual Mapper, or Certified Support Staff Level I or II

The Property Tax Education and Certification Program has allowed approximately 1,400 Alabama State and county employees to participate. Four-hundred and fifty-four of the participants have gained certification as mappers, personal property appraisers, real property appraisers, and tax administrators. The remaining participants are currently taking education courses toward a specific certification.

www.auburn.edu/propertytax

Providing Group Parent-Child Interaction Therapy to Community Families

- Provide needed services to high-risk families
- Obtain treatment outcome data that can inform the development of future community-based services
- Aid in the prevention of child maltreatment and disruptive behavior disorders in the State of Alabama
- Decrease the total funds required to address the long-term sequelae of these social problems

The Providing Group Parent-Child Interaction Therapy to Community Families program has provided group parent training to over 30 families, helping children at risk of expulsion become actively enrolled in school. The program also teaches parents who have been court-ordered to undergo treatment following physical abuse in order to learn non-physical ways to discipline their children. Over 30 undergraduate students have gained training in behavioral management techniques and ten Ph.D. graduate students have received supervised training. The Parent-Child Interaction Therapy program has been noticed by some DHR case workers as the best resource in

Auburn/Opelika for families with disruptive children. Partners of the program include the State of Alabama Department of Economic and Consumer Affairs, the United Way of Lee County, The Child Advocacy Center of East Alabama, the City of Opelika, and Auburn University.

<http://www.auburn.edu/~brestev/pcitgroup.htm>

Providing Support to Military Families

- Help children cope regarding issues surrounding their parents' deployment
- Develop and provide a network of support for children whose parents are deployed
- Provide safe and structured activities for children of the deployed

The Providing Support to Military Families serves children and families of troops deployed from Alabama military bases.

Putting the Pigs Out to Pasture

- Study whether pasture-raised pork production is a viable alternative to confined production, especially for small-scale pork producers

Small scale pork production could revitalize Alabama's pork industry by helping farmers produce a product that consumers want. This project is collaboration between AAES, Alabama Farmers Federation Pork Division, Tuskegee University, and the Tallapoosa River Electric Cooperative. It is a part of AU-SPICE (Swine Production in Concert with the Environment).

Quality Service and Hospitality Training Program

- Extend the number of days travelers stay in Alabama by providing them with information on what to see and do in Alabama, particularly in the rural areas
- Improve the attitudes of front-line personnel
- Improve the attitudes of city and county government employees as they provide services to city and county residents

The Cooperative Extension System has conducted quality service training programs for the hospitality industry and local city-county governments. A one-hour Quality and Services Training seminar was developed so local personnel can present the materials to hospitality frontline personnel. The curriculum includes a PowerPoint presentation, a 12 minute customer service training DVD, and a 27 page handout.

Quilts in the Community

- Provide quilts to areas of the community in need of the comfort a quilt provides
- Teach AU theatre students to use and improve their sewing skills
- Include Auburn Theatre students in community service

The Quilts in the Community program has provided quilts to individuals in need of comfort and has allowed Auburn University theatre students to use and improve their craft skills and give a valuable service to the community.

Quilts of Gee's Bend in Context

- Teach the general public about social, cultural, historical, economic, art contexts for the quilts of Gees Bend
- Raise awareness of value and achievement of Alabama quilters
- Provide materials to K-12 schools to teach contexts of the quilts of Gees Bend
- Teach K-12 teachers usage of technology for teaching material development
- Promote research on Alabama quilts made by African American women
- Encourage the conservation of Alabama quilts made by African American women

The Quilts of Gee's Bend in Context had the participation of thirty Alabama teachers in a curriculum development workshop. An art education project called "Adventures in Art" involved the participation of a number of schools. In addition, hundreds of people have attended special lectures and performances organized by The Quilts of Gee's Bend throughout Alabama and more performances are scheduled. Online materials have been viewed by numerous students and members of the public. The Quilts of Gee's Bend in Context project raises the awareness of the cultural heritage of Alabamians, showing that people from Alabama create art that is nationally and internationally acclaimed.

For more information, please visit <http://www.auburn.edu/geesbend> and http://www.ocm.auburn.edu/news_releases/geesbend.html

Raptor Education Outreach

- Provide education about raptors and environmental issues
- Increase Conservation Issue awareness
- Educate about natural history
- Provide interdisciplinary teacher training

In the past year, the Southeastern Raptor Center has had 80,000 children involved in educational programs. Approximately 150 educational programs are held each year and help fund the Center. Yearly, the rehabilitation hospital treats over 300 birds. Species that are treated at the Center include Bald Eagles, Golden Eagles, Peregrine Falcons, Great Horned Owls, and Red-tailed Hawks. In November 2005, the Raptor Center dedicated a 300 seat amphitheater designed to allow more opportunities for local and out-of-town individuals to see a raptor program and provides greater educational opportunities to the public.

For more information, please visit www.auburn.edu/raptor and <http://www.vetmed.auburn.edu/index.pl/raptor>

Reading with the Tigers

- Encourage elementary school children to read

Real Estate Education Fair

- Provide continuing education for real estate professionals

The 3 day Real Estate Education Fair provides continuing education for 120 to 200 real estate professionals each year.

For more information, please visit www.auburn.edu/outreach/refair

Reasons to Rotate

- Develop of a crop rotation cycle to improve productivity and profits for Alabama farmers

The Reasons to Rotate program developed a 4-year rotation cycle that includes two years of Bahia grass followed by a year of peanuts and a year of cotton. Results so far indicate that this rotation reduces farming costs and increases yields. In addition, grazing cattle on the Bahia grass the second year means increased income from the cattle. Studies are ongoing and data is currently being collected.

Recovering the Contaminated Landscape: Brownfield Redevelopment, Tarrant, Alabama

- Encourage smart growth and sustainable design
- Open Space Master Planning and Recreational Greenway
- Develop and promote clean air, stormwater, and alternative transportation initiatives

The Recovering the Contaminated Landscape project has partnered University Landscape Architecture students and faculty with the Birmingham Regional Redevelopment Task Force to assess brownfields for potential designs along the Fivemile corridor. The program presents workshops and design charettes focusing on smart growth principles and citizens' visions for their communities. Currently, the project is focusing on Tarrant, Alabama, and materials developed and lessons learned will be used in other targeted communities.

Red Cross Hurricane Katrina Relief

- Raise money for the Red Cross and Hurricane Katrina Relief
- Allow student-athletes to help in the relief effort for Hurricane Katrina

The Red Cross Hurricane Katrina Relief effort has allowed student-athletes help raise money for the Red Cross and Hurricane Katrina relief for residents of the gulf coast.

Reducing Risks of Indoor Air Contamination

- Protect public health
- Help consumers make decisions affecting quality of indoor air

The Reducing Risks of Indoor Air Contamination 2-day program provided training to Extension agents from 24 counties. Public education has also been provided through a variety of modes and methods.

Regional Volunteer Tourism Associations

- Increase economic development in a multi-county region through increased tourism and through attracting affluent retirees to relocate to the region
- Establish strong volunteer organizations to organize and promote tourism and retiree attraction efforts in a multi-county region

The Development of Regional Volunteer Tourism Associations project has assisted in the development of six multi-county regional organizations that enjoy a limited corporate sponsorship and that share a primary mission to promote, protect, and develop cultural, historical, and eco-tourism over a linked geographic region.

For more information, please visit www.alsunrise.com; www.southeastalabamatrails.com; www.tenntom.org/tourism.htm; www.alabamafrontporches.org/thoughts.html; and www.rcced.uwa.edu/wara/tourism.htm

Rehabilitation Counseling Distance Education Program

- Increase skills of currently employed rehabilitation counselors

The program has educated over 50 master's level graduates and 23 enrollees in skills necessary to rehabilitation counselors.

For more information, please visit www.auburn.edu/csd

Relocation of Alabama Retirees

- Relocate retirees to rural areas in Alabama
- Develop strategies to capitalize on relocation of retirees
- Develop SEATS (Southeast Alabama Trails)
- Determine how to attract retirees through outreach efforts

The project began in 1998. A full-time executive director for SEATS has been hired and is headquartered in Lauderdale County. The project provides benefit to local economies as well as to the retirees. This initiative has spread to include targeted efforts in 15 Alabama counties.

Reniform Nematode Management in Cotton

- Improve profitability of cotton production in reniform infested fields
- Identify management options to reduce reniform economic damage and reduce pesticide applications

The Reniform Nematode Management in Cotton project helps improve productivity of cotton production in reniform infested fields and identifies management options to reduce economic damage and to reduce the application of pesticides.

Resource Information for the New Driver's License Laws

- Improve tracking of foreign nationals residing in the Alabama
- Act as a pilot program for the entire nation on changes in the driver's license laws per US Dept. of Homeland Security

The program acts as a resource for local municipal and county judges and law enforcement personnel in locating translators for court cases. We also serve as a source of information for attorneys who may have divorce or criminal cases involving foreign nationals.

Responsible Citizenship, Life skills, and Youth Governance

- Teach good citizenship to youth
- Provide involvement opportunities for youth
- Promote 4-H Youth State Council
- Build youth leadership skills
- Help youth experience 4-H

Review of City of Auburn Licensing Practices

- Assist the city in streamlining licensing practices
- Assist the city with comparative research to other peer cities and progressive cities
- Assist the city in projecting the revenue effects of license fee changes

Auburn Outreach has helped the City of Auburn, Alabama review licensing practices to streamline them. The project has conducted benchmarking research and has helped the city in projecting revenue effects of license fee changes.

Row Crop Producers

- Select correct crop varieties to plant each year
- Provide information to farmers to assist in making decisions
- Provide information to farmers to help growers overcome disease, weed, and soil problems
- Conduct cotton variety trials
- Conduct variety and foliar insect/disease treatment tests for wheat

Cotton variety trials show a difference of almost 400 pounds of lint per acre between the highest yielding variety and the lowest one - yielding a monetary difference of \$236 per acre. This makes the difference between making a profit or losing money on a crop. In 2003, four multi-state regional conferences were held hosting 145 participants.

Rural Alabama AHEC Interdisciplinary Education Program

- Recruit and retain health care practitioners in rural, underserved areas

The Rural Alabama AHEC Interdisciplinary Education Program has allowed pharmacy students in rural health to serve patients in 4 clinics and assisted in implementation of medication assistance programs in rural clinics. In addition the program has provided continuing education for approximately 650 pharmacists and provided educational opportunities for pre-medical and medical students. In addition, the program has provided a liaison between program participants and University of Alabama medical providers and students.

Rural Pharmacotherapy Services

- Ensure appropriate pharmacotherapy and educational services for rural patients

Rural Pharmacotherapy Services has allowed 101 patients to receive services and scheduled 708 individual appointments within a 2.5 year period. The project has conducted 3,938 educational interventions including medication history review, compliance teaching, disease state teaching, dietary and exercise counseling, and tobacco cessation counseling. Clinical interventions occurred 732 times.

Safe and Secure Food and Fiber Systems

- Hazard Analysis and Critical Control Points (HACCP)
- Research and prevent Bovine Spongiform Encephalopathy (BSE) or Mad-Cow Disease
- Enhance the ability to traceback the subject animal, to the point of origin to control disease

The Alabama Cooperative Extension System has long worked to ensure that Alabama and other states enjoy a Safe and Secure Food and Fiber System. One focus of these efforts has been on Alabama's seafood market. Seafood is a big business on Alabama's Gulf Coast and Extension's training efforts have met a crucial need for seafood processors. In addition to HACCP workshops, Extension specialists have worked with small businesses to improve their bottom lines, enhance product quality, and comply with safety regulations. In addition, Extension's efforts have included working on ways to track market animals. Extension's efforts to trace animals back to the breeder have been extremely successful.

School-to-work Program

- Educate and facilitate discussion of high-school seniors and student leaders with business community mentors to identify success strategies

The School-to-work program has helped introduce high-school seniors to business mentors and to other high-school student leaders so that they can learn important strategies for success.

Science Olympiad

- Foster science education in grades 6-12
- Provide extra-curricular science and math activities and challenges in a competitive atmosphere
- Inspire students to pursue careers in science and math

The Science Olympiad provides science and math activities, challenges, and competitions to approximately 2,000 kindergarten through 12th grade students each year. The Science Olympiad typically sponsors three middle-school teams and one high-school team. One middle-school team has won the regional and State competitions for the past 5 years and has placed in the national top 25. The high-school team has won the State competition and has competed at the national level four out of the last five years.

For more information, please visit www.soinc.org and <http://www.auburn.edu/%7Eharriga/olympiad/>

Science Teacher Education Program

- Provide information about the role of science in ensuring that food products are safe and are of a high quality

The Science Teacher Education Program has provided information to 23 participants.

For more information, please visit <http://www.ag.auburn.edu/step2003.html>

Service Learning: Helping Teens Transition from Pregnancy to Parenthood

- Provide Auburn University School of Nursing (AUSON) students with meaningful reality-based learning experiences
- Provide Services to the Early Head Start Program with a focus on adolescents

Alabama Council on Human Relations, Inc. received an Early Head Start grant five years ago. Part of the program is set up to provide services to families with pregnant moms, infants and toddlers. Two years ago they became involved with the three school systems in Lee County in providing services to pregnant teens and teen moms. Since that time they have worked with over 100 teens. They have found that teens are uninformed about many health issues that pertain to prenatal and women's health care. AU nursing students provided needed support and services to the pregnant teens in Lee County. This was also a beneficial experience for the nursing students. The Service Learning program helping Teens Transition from Pregnancy to Parenthood has provided services to the Early Head Start Program, has helped provide bi-weekly health promotion programs for pregnant adolescents and provided nursing students with a reality-based learning experience. The program has also created a booklet to help in the promotion of healthy habits and behaviors.

Shedding Light on Environmental Health Issues

- Hold a two-day training sessions that provides more than 40 Extension agents in 34 counties with intensive instruction and materials
- Encourage extension agents to carry out environmental health programs
- Increase awareness of Alabama citizens of environmental health issues
- Increase community contacts regarding access to health care information about environmental health

The Shedding Light on Environmental Health Issues is a program that encourages Cooperative Extension System Agents to carry out environmental health programs in their communities. These local programs have taken many forms, including environmental health conferences with local health professionals, school and community health fairs, newsletter columns, and public service announcements. More than 1,100 professionals have been trained through the county environmental conferences. These professionals have included school nurses, pediatric nurses, child care providers, public health officials, social workers and parents. Those attending the environmental conferences were able to obtain Continuing Education Units from Auburn University and other institutions for credit hours earned through training.

Shelby County Economic Development Plan

- Assist county residents draft a strategic plan for future economic development
- Suggest implementation strategies for the plan

Auburn Outreach has helped Shelby County, Alabama, the fastest growing county in the State, in the development and implementation of an economic development plan that is regularly used to make key development decisions that will affect the county for many years into the future.

Shooting Sports Program

- Provide prevention education
- Emphasize positive youth-adult interactions
- Emphasize peer leadership
- Provide training in: archery, rifle, muzzleloading, pistol, shotgun, and/or program management
- Promote volunteer leader training and techniques for teaching youth

This 4-H Shooting Sports Program has been in operation since the early 1990s. To date, 131 volunteers have been trained and certified as Volunteer Leaders in one of the shooting sports. Collectively, these leaders reach approximately 3,500 4-H-ers on an annual basis.

For more information, please visit <http://www.aces.edu/fourh/ShootingSports.php>

SIAS University Documentary Film

- Research the potential for a film on a unique Auburn/China project
- Capture preliminary photo and videographic material
- Conduct pre-interviews and scout locations

The SIAS University documentary film project administrators have researched the potential for a film about a unique Auburn/China program and have gathered material and scouted locations for the film. Alabama Public Television has expressed much interest in such a film.

For more information about SIAS International University, please visit http://www.ocm.auburn.edu/news_releases/chinaweiss.html

Six Sigma Black Belt Training in Quality Control and Improvement

- Provide training managers and participants on the tools and techniques for improving quality and productivity, workforce utilization, and resource utilization
- Improve the competitive position of represented companies

The Six Sigma Black Belt Training in Quality Control and Improvement project has conducted workshops at Auburn and on-site to train 60 to 90 participants in better management practices to improve quality, productivity, workforce, and resource utilization. Participants also completed a project using data and information from their organization setting. Some of the projects have led to enormous savings in the company. For example, Boise Cascade reported a savings of about half a million dollars for one particular project.

Small Business Development

- Train and counsel individuals in starting or growing a small business and in making good business financial decisions
- Serve as a trusted resource to the community

In 2003, the Auburn University Small Business Development Center was recognized as the number one Small Business Development Center in the State, and in 2005, Auburn-Opelika MSA was recognized as the top town for small business growth. Client surveys show an overwhelming satisfaction with services received from the Center. Since 2001, 3,784 participants have been trained and counseled and numerous clients have started or improved their businesses with help from the Center.

Small Community Strategic Planning Projects

- Assist small communities with limited resources to develop strategic plans and help them cope with uncertain futures
- Identify priorities, resources, and assistance needed to implement strategic plans

The Small Community Strategic Planning Projects have developed partnerships involving Alabama Power Company, the University's Economic Development Institute, regional electrical cooperatives, local communities and ACES. Strategic plans have been developed that have involved intense community participation. Completed plans included goals, action steps, estimated completion dates, funding requirements, and responsible parties.

Soccer Camp

- Teach school age girls soccer skills
- Expose young soccer players to Auburn University

The Auburn Summer Camp employs approximately 15 Auburn students and hosts approximately 300 participants each summer and soccer players are invited from the entire State to participate in these camps.

www.auburntigers.com

Soil Management Practices for Sustainable Production on Densely Populated Tropical Steeplands

- Research on adapting alley cropping to hillside agriculture in Haiti
- Sustain crop production with alley cropping
- Identify appropriate hedgerow species for different environments
- Study soil fertility on different soil types in relation to alley cropping
- Study adoption of alley cropping and other soil conservation practices

The Soil Management Practices for Sustainable Production on Densely Populated Tropical Steeplands project has resulted in the publication of technical bulletins that were sent to USAID missions worldwide, to governmental and non-governmental agencies, and to schools working in Haiti. In addition, farmers were exposed to alley cropping. As a result of this program, two Haitian agronomists and one Haitian social scientist received Ph.D. degrees.

Southern Forest Nursery Management Cooperative

- Identify, test, evaluate, and promote the registration of pesticides for use in forest tree nurseries
- Minimize the environmental impact of nursery cultural practices
- Develop integrated pest management programs
- Maximize the cost effectiveness of tree planting systems
- Serve as a clearinghouse of information related to nursery production and tree planting

The Southern Forest Nursery Management Cooperative has 20 members and has provided data to help register more than 12 pesticides for use in forest tree nurseries. The program has contributed to more than \$2 million of savings in weed control costs each year compared to methods used in 1975.

<http://www.sfws.auburn.edu/sfnmc/sfnmc.html>

Southern Humanities Review

- Provide a general interest journal for the citizens of the world

The Southern Humanities Review, a general interest journal for citizens of the world, circulates between 600 and 700 copies of each issue to both subscribers and non-subscribers. The core constituency is the Southern Humanities Council which meets yearly.

<http://www.auburn.edu/english/shr/home.htm>

Spatial Analysis of Outdoor Warning Siren Network

- Determine geographic location (latitude and longitude) of existing sirens with GPS technology
- Compute area covered by existing sirens with GIS technology
- Analyze existing coverage in relation to population density distribution pattern
- Identify potential sites for new sirens to ensure coverage of high population density areas

The Spatial Analysis of an Outdoor Warning Siren Network in Lee County, Alabama provided results that supported requests by the Lee County Emergency Management Agency to request funds to purchase and install 20 sirens. The Alabama Emergency Management Agency reviewed the results of the Lee County study and concluded that they would adopt this methodology and conduct identical surveys in every county in the State. Five individuals participated in the analysis including members of the Lee County Emergency Management Agency, an Auburn Faculty member, and two Auburn undergraduate students.

<http://www.leecoema-al.org/>

Specialized Residency in Primary Care at DCH Regional Medical Center

- Train post-graduate pharmacists to provide primary care services

The Specialized Residency in Primary Care program has had five pharmacist who have successfully completed the 1 year training program, all of whom have gone on to successful careers in the field.

Speech and Hearing Clinic

- Train students to be future speech-language pathologists and future audiologists
- Provide the public with speech-language-hearing clinical services that are affordable via sliding fee scales and Medicaid agreements

The Auburn University Speech and Hearing Clinic helps to train about 50 to 60 undergraduate students and 15 to 25 students pursuing masters or professional degrees. Once these students graduate, they are in high demand and achieve 100% employment. The Clinic also provides the public with speech-language-hearing clinical services.

Statewide Haylift

- Provide of farm-relief effort
- Identify farmers who need hay
- Provide management techniques to farmers during times of drought

The Statewide Haylift project provided more than 18 million pounds of hay to producers in 34 counties.

Stay Connected

- Enhance the overall quality of parent-adolescent relationships
- Improve parent-adolescent communication
- Facilitate parent-adolescent engagement in activities
- Increase perspective taking of adolescents and parents

The Stay Connected program has engaged approximately 500 adolescents, 100 parents, and 100 family educators and counselors in Alabama and provided resources, curriculum, and training. Activity ideas and public service announcements have been distributed to the Department of Defense for distribution to U.S. military installations.

<http://www.mfrc-dodqol.org/healthyparenting/auburn.cfm>

Stockton, AL Strategic Plan

- Assist residents of Stockton community prepare a strategic plan and provide advice on implementation strategies

Auburn Outreach has helped Stockton, Alabama, an unincorporated community, prepare a strategic plan that is routinely used to make development decisions. Approximately 35 Stockton residents helped to develop the plan over a 9-month period. Since 2001, 374 individuals have been trained and counseled by the Small Business Development project team. Numerous clients have successfully started businesses or improved their businesses with assistance from the SBDC.

Story Book Farms

- Interact with children who have a handicap

Story Book Farms allows for an interaction with children who have a handicap.

For more information, please visit www.story-book-farm.org

Summer Outreach (Dealing With Disabilities) Computer Literacy Program for Children

- Provide the community with a computer camp geared for both typical children and children with special needs
- Offer university students hands on experience in working with the school-aged population

The Summer Outreach Computer Literacy Program for Children helped 23 children of University employees gain valuable computer literacy skills. This pilot project was deemed successful based on the program evolution results. All children were excited about engaging and completing computer projects, especially in a college computer lab and surrounded by graduate students. Overall, Computer Science and Software engineering (CSSE) graduate students were truly impressed by the eagerness, hard work and progress made by children toward becoming someday true computer wizards. At the end of the program, CSSE graduate students felt better prepared as future educators and developers of educational computer applications. Students with disabilities not only increased their computer skills, but also improved their communication skills. Department of Communication Disorders (CMDs) graduate students reported they gained knowledge in working with students with disabilities in an inclusion program. The CMDs graduate students further indicated they would feel more comfortable establishing communication goals that were academic based, after having the hands on experience this pilot program provided.

For more information, please visit <https://fp.auburn.edu/comp1000/SummerOutreach/index.html>

Sun Safety

- Educate about the dangers of sun overexposure and protection methods

The Sun Safety program has educated over 3,000 people about ways that they can protect themselves from harmful sunlight exposure.

Surplus Property Transfer Program

- Provide surplus equipment at no charge to Alabama public schools and State governmental entities

The Surplus Property Transfer Program has provided more than 4,000 items to Alabama public schools and State governmental entities within the last two years.

For more information, please visit http://www.auburn.edu/administration/auxiliary_services/property/surplus.htm

Surveillance of Avian Influenza Infections

- Monitor wild bird and commercial poultry flocks for avian influenza

The Surveillance of Avian Influenza Infections project helps to detect cases of avian influenza in wild and commercial birds by developing faster and more accurate laboratory tests. Thus far, no influenza cases have been identified.

Sustainable Alley Cropping Systems for Steeplands of Northern Vietnam

- Assist Hanoi Agricultural University to conduct alley cropping research on hillsides of Northern Vietnam
- Improve soil conservation

The Sustainable Alley Cropping Systems for Steeplands of Northern Vietnam project has fostered exchanges of faculty between Hanoi Agricultural University and Auburn University. Seminars have been presented on agroforestry practices and alley cropping in Vietnam and at Hanoi Agricultural University. Research on alley cropping was conducted at three Northern Vietnam locations.

Swine Production in Concert with the Environment

- Improve market opportunities for small pork producers
- Improve the financial status of rural Alabama

Information from the Swine Production in Concert with the Environment (SPICE) program will improve the financial status of rural Alabama by improving the production costs and market opportunities for small pork producers. For example, Porchetta Originale could result in a market for 250,000 pigs per year.

Tackling Diabetes in Alabama

- Forming Community Coalitions and support groups
- Testing for Diabetes as part of countywide Health Fair
- Offer an educational series addressing nutrition, foot care, and stress management

Extension has effectively used its access to research and its county-based delivery system to reach people with vital information on diabetes, a major health issue in Alabama. Extension is confident that the education that was provided regarding Diabetes in Alabama will help increase knowledge and skills as well as reduce the risk factors associated with chronic disease.

TEAM-Math

- Provide information and training to teachers to encourage mathematics education improvement efforts at the district or school level

TEAM-Math has educated over 750 teachers in 15 East Alabama school districts during their summer institute and professional development events. The program networks with over 100 teacher leaders who lead improvement efforts at the district or school level. Briefings are held to provide effective mathematics education information to administrators, guidance counselors, and parents. TEAM MATH has helped develop curriculum leading to the improvement on the Alabama High School Graduation Exam among 11th graders. In late 2003, TEAM-math was awarded a \$9 million grant by the National Science Foundation.

For more information, please visit <http://www.team-math.net/> and http://www.ocm.auburn.edu/news_releases/mathprogram.html

Teen Leadership Connection Curriculum

- Provide for youth leadership and mentoring
- Develop leadership skills
- Address community issues through youth projects
- Implement curriculum in several urban areas in Alabama

The Teen Leadership Connection Curriculum emphasizes socialization skills, leadership, and mentoring. In 2002, more than 650 youth were mentored.

Teen Pregnancy Prevention

- Prevent teen pregnancy
- Develop and implement Teens Getting Involved for the Future

Teens Getting Involved for the Future is based upon the Managing Pressures before Marriage curriculum focusing on helping young people develop skills to resist sexual activity prior to marriage. More than 4,000 6th graders, 500 teen leaders, and 650 adults were involved in the program provided at 23 public high-schools in 8 counties during 2002 and 2003.

Telemedicine for Veterinary Practitioners

- Create interest in the use of telemedicine technology for veterinarians
- Utilize the Internet2 as a means of disseminating information to veterinarians
- Establish a better infrastructure at the College of Veterinary Medicine for Telemedicine
- Train veterinary practitioners in telemedicine technology
- Utilize the continuing education aspects of this telenology

The program educates about and creates an interest in the use of telemedicine and internet technology among veterinary practitioners. This project will benefit pet and livestock owners throughout the State and improve animal health. Plus, veterinarians will be benefited with improved diagnostic skills and new technology skills. Also, this project has the potential to assist homeland security efforts by giving veterinarians instant access to diagnostic centers in cases that might threaten our food supply.

For more information, please visit http://www.vetmed.auburn.edu/index.pl/telemedicine_conference

The Advocates Toolbox

- Provide quality education to professionals who respond to domestic and sexual violence victims in the legal system
- Develop working relationships with professionals in the care continuum for violence against women
- Advance the University mission of outreach

The Advocates Toolbox program provided training for over 50 professionals including attorneys, law enforcement officials, forensic science professionals, nurses, clinicians, advocates, students, and academics to educate and develop relationships with those who respond to domestic and sexual violence victims. The program was a partnership with Alabama Coalition against Rape, the Department of Sociology, and the Safe Harbor Program at Auburn University.

The Alabama Beef Connection Program

- Implement a comprehensive data analysis and interpretation system to improve growth and carcass attributes of Alabama feeder cattle
- Participate in a voluntary program for data collection on beef calves
- Access information regarding beef cattle through use of electronic ID tags
- Improve the quality and consistency of beef available to the American consumer
- Create an increased feeder calf buyer awareness of the quality of Alabama feeder calves through various media and marketing campaigns
- Educate producers and industry in Alabama on the pending National Animal Identification Plan

The Alabama Beef Connection Program has allowed approximately 400 producers access to an extensive post-weaning data retrieval system and carcass data system. The project has provided educational meetings throughout Alabama to introduce the pending National Identification System. The Program has partners in both the government and the cattle industry.

For more information, please visit www.abcbeef.net

The Alabama Review: A Quarterly Journal of Alabama History

- Publish a peer-reviewed journal of scholarship and book reviews on the history of Alabama

The Alabama Review provides an outlet for excellent scholarship on Alabama history and publishes and disseminates articles based on this scholarship. In 1995 the future of the Alabama Review was uncertain, but Auburn took responsibility for hosting the project. Consequently, Alabama did not join the handful of states without a scholarly journal devoted to State history, thanks to Auburn's leadership. Additionally, Auburn's role in editing the Review has secured its status as the leading center for the study of Alabama history. The Alabama Review enjoys a circulation exceeding 1,500.

For more information, please visit <http://www.auburn.edu/~bamarev/>

The Alabama Virtual Library Project

- Provide cost-effective access to all citizens of Alabama to reference and research databases in all libraries
- Provide training for teachers and librarians so they can use and teach their students how to use the databases

The Alabama Virtual Library project began as a grassroots effort by two Auburn University Librarians, Sherida Downer and Harmon Straiton, and Dr. Sue Medina the director of the Network of Alabama Academic Libraries. For two years the possibilities of the idea were demonstrated when the State legislature was in session. Auburn University Libraries hosted a website to explain the project. The librarians began reaching out to the public libraries, the K-12 teachers and librarians and the post secondary librarians for their support. Eventually the legislature saw the great potential and in 1999 officially began funding the project. The Alabama Virtual Library Council was formed and approximately 2,000 librarians and teachers were trained under the original development of the program. When the project received legislative funding, it was agreed that the funding monies would reside with the Alabama Public Library Service, hoping the program had a better chance of receiving continued State funding as a neutral statewide project rather than assigning it to an individual library. The AVL Council was formed and the responsibility for training and database selection was given to the council. Since then thousands of people have been a part of the organized training program. Alabama has been able to build a cost-effective virtual library that serves the needs of every Alabama citizen. The Virtual Library Funding (currently nearly \$400,000.00) provides the AVL Council with the ability to bundle database packages, negotiate with vendors in a more cost effective manner and provide citizens with access to materials they would otherwise never be able to afford. The Alabama Virtual Library Project has provided all libraries and public schools in Alabama access to full text educational databases, encyclopedias, and dictionaries. This initiative has resulted in the ability of all Alabama citizens to access reference and research materials.

For more information, please visit <http://www.virtual.lib.al.us/about/index.html> and www.avl.lib.al.us

The Auburn Engineering Technical Assistance Program

- Provide Alabama's manufacturing enterprises with convenient and cost effective access to high quality technical assistance, workforce training, and advanced technology
- Help increase their competitiveness in the rapidly changing world of international commerce
- Stimulate the transfer of knowledge into practical innovations using Information Technology
- Train tomorrow's flexible and diverse workforce
- Catalyze and enhance enabling infrastructure and partnerships

The Engineering Technical Assistance Program has used the cooperation of faculty and students of Auburn University engineering departments to create an estimated economic impact of \$9 million per year in terms of increased efficiency, industrial worker safety, job retention, and job creation. In addition the Program has developed a Knowledge Sharing System being used by students and county agents to transfer timely information from research labs and academia and to facilitate the transmission of practical research knowledge from industries and federal laboratories to university classrooms. AETAP has provided technical assistance to 870 manufacturing units and has

organized 19 seminars to Alabama manufacturers and 12 workshops to help ACES county agents develop their engineering know-how so they can better coordinate AETAP activities around Alabama. Thirty-five ACES agents have been trained in industrial engineering and the program has helped train 16 minority engineering students in partnership with the BellSouth Minority Engineering Program in the College of Engineering. AETEP has been very successful at raising funds through highly competitive grants and has received much recognition and a prestigious industry award.

For more information, please visit www.eng.auburn.edu/aetap

The Changing Family Profile

- Provide information and resources to meet needs of changing families
- Provide educational outreach to help families and communities respond positively to changing family needs
- Provide an Annual Family Conference regarding healthy lifestyles
- Provide classes to single parents on parenting
- Reduce abuse
- Establish partnerships, networks, and support groups to strengthen the resiliency of families

The Changing Family Profile efforts recognize that the family unit is changing and works to advance families economically, socially, and physically by establishing partnerships, networks, and support groups to strengthen the resiliency of families in urban communities. Additionally, the establishment of an intersystem task force of State agencies to support "non-traditional" family units is being created.

The Designated Service Office for the US Dept. of Homeland Security's USCIS and BICE Division and the US State Department

- Issue documents that assist visiting researchers, faculty, and students, and their dependents with visa applications to enable them to lawfully enter the USA
- Act as a source of information for local judges, attorneys throughout the State, to assist the court and law enforcement with locating interpreters for court cases

The Designated Service Office helps the government issue documents and visa applications to allow visiting faculty, researchers, and students and their families to more easily enter the United States. This aids economic growth in Alabama, especially in light of the number of industries that choose the State for their operations and who rely on foreign national employees and their knowledge and expertise.

For more information, please visit http://www.auburn.edu/academic/other/international_education/

The Forest Products Development Center

- Provide economic development assistance for new industrial projects
- Provide economic development assistance to developers, industry and economic development groups
- Provide technical information and analytical assistance to forest products companies
- Develop an entirely new forest-based operation

The Great Oyster Drop

- Breed an oyster that can survive periods of low or no oxygen in order to replenish Alabama Gulf Coast's largest commercial oyster reef

Two weeks after category 3 hurricane Ivan stormed Alabama's Gulf Coast, marine biologists and conservation officials dropped 55,000 finger-size oysters that were being raised as part of the lab's low-oxygen-tolerant-oyster project into Mobile Bay to replenish the commercial oyster reef.

For more information, please visit http://www.ocm.auburn.edu/news_releases/oysters.html

The Longleaf Alliance

- Promote the economic, ecological, and social values of longleaf pine ecosystems
- Restore functioning longleaf pine ecosystems as a significant component of the southeastern US forest landscape

The Longleaf Alliance has hosted 10 conferences with a total attendance of 2,100 and has hosted or presented at 450 workshops (200 conducted within Alabama) that focus on specific topics or aimed at specific interest groups. The workshops average about 40 participants and cater to landowners, professionals who interface with landowners, and kindergarten through 12th grade educators. Also, the Alliance communicates with thousands of individuals via one-on-one meetings, telephone conversations, and electronic communications. Numerous jobs have been created with the aid of Alliance efforts. There are over 700 active Longleaf Alliance members, with 40% being from Alabama. These members range from individuals to agencies and their financial contributions provide 90% of the operating costs of the Longleaf Alliance. The Alliance website has had over 35,000 hits in the last 3 years. In the past 10 years, 600 million longleaf pine seedlings have been planted on about 1 million acres. Approximately 30% of the planting occurred in Alabama and represents a seven-fold increase over the previous decade. A quality measure is recognition received from other local, regional, and national agencies and organizations. The Longleaf Alliance has received eight major awards since 1999.

<http://www.longleafalliance.org/>

The Private Forest Management Team

- Provide a support system
- Provide a web site (primary activity) for information
- Assist in making management decisions

The Private Forest Management Team is designed to assist forest landowners, public, private, and forest landowner support organizations, and industrial and agency natural resource management organizations in Alabama.

For more information, please visit www.pfmt.org

The Safe Harbor Project

- Reduce the number of sexual assaults to Auburn Students
- Promote healthy choices via educational programming, awareness events and community partnerships
- Improve the reporting of sexually based crimes, dating violence, and stalking
- Develop on and off campus resources to serve student victims of crime
- Improve and expand the care continuum for victims of sexual violence through professional partnerships and by providing quality professional continuing education

The Safe Harbor Project has served over 500 victims of crime and has participated in all University orientation programs in the last six years. In addition, the project participants actively work with the greater Auburn community to provide sexual assault assistance and to raise the awareness of dangers to Auburn students. Professional training programs are offered either free of charge or at significantly reduced rates. This affords access to non-profit sector professionals who would not otherwise be able to attend quality professional training. Auburn trainings tend to attract a wide variety of professionals so the student-student interaction is truly a unique and value added experience for all Alabamians.

For more information, please visit www.auburn.edu/safeharbor

Tiger Treks

- Educate primary students in the fields of math and science

Although the Tiger Treks program is young, approximately a few hundred primary students have participated and learned about math and science.

www.eng.auburn.edu/tigertreks

TigerFit Health and Fitness Assessment Program

- Provide low-cost comprehensive health assessments for the general public

Tiger Fit has allowed for the completion of over 600 comprehensive health assessments since 2001. Participants receive an evaluation and a personal and confidential report on their health and fitness as well as an exercise prescription.

Trade Adjustment Assistance for Fishermen

- Provide quality control training to fishermen
- Complete eligibility for Trade Adjustment Assistance

The program has increased the knowledge of approximately 90 fishing enterprises of on-board handling techniques thus improving product quality and revenue intake. Those trained by the program are eligible for financial Trade Adjustment Assistance.

<http://www.agrisk.umn.edu/taa/Commodities/ShrimpAlabama/>

Trick-or-Treat to Benefit Easter Seals

- Provide interaction with children with developmental and chronic illnesses
- Promote service-learning and volunteerism in nursing students

The Trick-or Treat to Benefit Easter Seals program involved 180 nursing students and 20 Human Development and Family Sciences students to benefit 500 to 600 students who are served by the Easter Seals facility. Promoting service-learning and the need for community involvement is important to emphasize in nursing students. As graduates they will be going into many of Alabama counties and cities to work. They will carry with them, hopefully, a desire to participate in many community and State volunteer organizations that will benefit many of the under served Alabama.

Tuskegee Tourism Projects

- Develop a comprehensive tourism plan for Macon County and Tuskegee to increase jobs and the quality of life for community residents

The Tuskegee Tourism Projects have developed a comprehensive plan for Macon County and Tuskegee, Alabama highlighting the need for improvement of the downtown area and for a county-wide leadership plan. Macon County and Tuskegee have requested assistance in the implementation of the plan and development of a county-wide leadership program. As a result Tuskegee has initiated a downtown renovation project, which will result in more tourism dollars being spent in Tuskegee rather than in neighboring cities. The county is also beginning to develop a county-wide leadership program.

UAB-Huntsville Family Medicine Pharmacotherapy Service

- Ensure appropriate pharmacotherapy and educational services for family medicine patients

The Family Medicine Pharmacotherapy Service serves approximately 10 to 20 patients each week to ensure that patients and families receive appropriate pharmacotherapy and educational services. Forty-four medical services providers have been involved in the project.

Uniontown Strategic Plan

- Assist the Uniontown community with preparation and implementation of a strategic development plan

Auburn Outreach has helped Uniontown, Alabama in the development of a strategic plan that has been implemented and is routinely used to make important development decisions. Approximately 50 Graysville residents helped develop the plan.

Uniontown, AL HUD COPC Project

- Provide tutoring and mentoring assistance to students at R.C. Hatch High-school
- Provide technical assistance to local businesses interested in expansion
- Conduct adult and youth leadership classes for community residents

- Provide city government assistance in budgeting and personnel management
- Provide design suggestions for community landscaping

The Uniontown, Alabama HUD COPC Project has helped improve reading levels for high-school students involved in tutoring projects; has involved more community residents in leadership activities primarily through a non-profit development organization called Uniontown Cares; and has helped Uniontown achieve an up-to-date budgeting and personnel management system.

For more information, please visit http://www.auburn.edu/administration/univrel/news/archive/02_03news/02_03uniontown.html

University of Promise

- Engage volunteers with a commitment to fulfill the program's promises to America's youth
- Caring Adults - Caring adults, mentors, teachers, tutors, coaches, parents
- Safe Places - Places with structured activities non-school hours
- Healthy Start - Providing info and opportunity for healthy start and future
- Marketable Skills - Skills through effective education
- Opportunities to Serve - Opportunities to give back through community service

The University of Promise program has engaged student volunteers with a commitment to fulfill one or more of the program "five promises to America's youth: caring adults, safe places, a healthy start, marketable skills and opportunities to serve."

University of the Middle East Project

- Improve educational leadership skills in the Middle East and North Africa
- Provide for collective experiences among educators in MENA region

The University of the Middle East Project allowed 25 educational leaders in the region to participate in a month long program in Toledo, Spain. Also, the effort has provided links among Arab and Israeli educators and interest groups.

For more information, please visit http://www.ocm.auburn.edu/news_releases/starr.html

US Military Academy outside Consultant

- Ensure quality teaching at the US Military Academy

The project of consultation to the U.S. Military Academy to ensure quality teaching has helped develop quality instructors and instruction at the Academy.

Water Conditioning - Deep Water (Non-Impact)

The Water Conditioning - Deep Water (Non-Impact) course provides exercise and educational opportunities to participants.

For more information, please visit <https://mell-base.uce.auburn.edu/wconnect/wc.dll?acecode~CourseStatus~05S4C006>

Water Quality in Aquaculture

- Develop better water quality management procedures for aquaculture
- Assist producers to implement better practices
- Assist with the development with effluent regulations for aquaculture
- Develop information on agriculture and the environment in Alabama

The Water Quality in Aquaculture program helps develop best management practices for Alabama aquaculture, helps prevent environmental impacts, provides assistance to many aquaculture producers overseas in preventing environmental impacts of aquaculture.

For more information, please visit www.ag.auburn.edu/BC

Water Quality Information Network

- Develop an internet-based water quality information network
- Provide online educational materials
- Enhance citizens' understanding of water quality
- Enhance pollution control prevention education

<http://www.aces.edu/waterquality/cbri.htm>

Website Development for Alabama Rural Heritage Center and Foundation

- Facilitate economic growth and development in West Alabama
- Gain recognition for the Foundation and its mission
- Sell the products that are unique to the Center, thus providing jobs

The Website for the Alabama Rural Heritage Center and Foundation has helped the foundation's Heritage Shoppe increase sales by more than 52% in the span of one year.

For more information, please visit www.craftsofalabama.com

Weed Biology and Management in Southern Turf

- Identify ways to better manage weeds in warm-season turf grasses

The Weed Biology and Management in Southern Turf research is ongoing. Researchers have identified an herbicide practice that has been successfully demonstrated for two years on putting greens at the Grand National Golf Course in Opelika, Alabama. Warm-season turf grasses are the mainstays of southern turf landscapes.

West Alabama Feeder Cattle Marketing Association

- Hold a Joint Board Sale with the Central Alabama Feeder Cattle Marketing Association
- Train producers in better management and marketing techniques

Thanks to broad efforts by the Alabama Cooperative Extension System, cattle producers are trained in better management and marketing techniques and are now able to earn more money for their cattle. Additionally, the joint board sale has helped producers realize greater profits and increased savings in sales commissions, shrink and hauling. Cattle sold via the board sale have been bringing about \$70 per head more than conventional marketing.

West Alabama Learning Coalition

- Improve quality of education in 8 counties
- Form partnerships of K-12, higher education, community and business leaders focused on improving educational opportunities while also addressing community and economic development concerns
- Provide relevant professional development and learning opportunities for all adults involved in the program
- Conduct collaborative action planning
- Facilitate networking and resource/idea sharing across and among school systems and partners

The West Alabama Learning Coalition has involved hundreds of participants and helped improve student learning in some schools. New programs have been developed and teachers and administrators have learned from other school systems. The Coalition has also provided professional development and learning opportunities for participants.

<http://education.auburn.edu/resourcesservices/trumanpierceinstitute/walc.html>

When Good Animals Go Bad

- Assist clientele in dealing with urban/suburban wildlife damage issues
- Provide hands-on experience in control efforts

The When Good Animals Go Bad program assists clientele in dealing with urban and suburban wildlife damage issues and provides experience in control efforts to enable them to successfully eliminate damage.

Wildlife Management Education

- Teach youth skills to manage and conserve habitats and support natural resources
- Provide a State Wildlife Habitat Evaluation Contest
- 2003 - Provide a State-level emphasis on sportfishing

4-H wildlife and fisheries programs have attracted 8,000 youth to learn skills to manage and conserve habitats. In 2003, more urban youth (52) than rural youth (34) participated in a camp sponsored by a district about natural resources. High school-level aquaculture programs have been started in Baldwin and Mobile counties.

Women's Basketball Community Caravan

- Visit businesses, schools, and retirement communities in Auburn and Opelika
- Increase the visibility of the members of the women's basketball team in the community

The Women's Basketball Community Caravan visits businesses, schools and retirement communities in Auburn and Opelika and raises the visibility of the team in the community.

Women's Leadership Institute

- Develop and sharpen the leadership skills of future women leaders
- Educate women about past and present public leadership as well as possible barriers they may face as they pursue their careers
- Provide hands-on practice and experience
- Connect students with current women leaders and mentors
- Be the premiere women's leadership program in the Southeast
- Encourage more women to seek leadership positions in Alabama
- Expand diversity in leadership roles

The Women's Leadership Institute engages the participation of 45 women from around the United States. Many individuals, including local high-school students, attended the first Women and Politics conference in 2002. The institute educates about women's roles in public leadership and challenges that might be faced, provides practical experience, and connects students with current women leaders and mentors. The Institute focuses more on future women leaders and may be taken for college credit. This is the only program for women's leadership in the Southeast. It is affiliated with the nationally-recognized program at Rutgers University

<http://www.auburn.edu/outreach/womenleaders/>

Work Force Preparation

- Assist clients in obtaining employment

More than 10,000 adults received training face-to-face through the Work Force Preparation program. Six thousand children were contacted. The program has been largely successful. Seventy percent of 118 active clients in Lauderdale County obtained employment. The returned investment to the community and county is estimated at \$1.35 million. The newly-hired become contributing members of the community - where the dollars they spend have a multiplier effect within the local economy. Governments win because of the savings reaped in public assistance programs.

World Affairs Youth Seminar

- Promote a better understanding of international affairs

The World Affairs Youth Seminars teaches between 30 and 50 high-school students about international affairs each summer.

www.auburn.edu/outreach/wa

Wrights Mill Road Elementary Reading Program

- Encourage children to read

The Wright's Mill Road Elementary Reading Program has encouraged 150 first through fifth grade students to read.

Youth and Citizenship - Youth Development

- Assist youth in meeting demands of citizenship
- Assist youth in realizing their full potential
- Provide social economic, health, leadership, citizenship, and volunteerism programs
- Empower urban youth to become positive contributing members of society

In 2002, Extension provided "comprehensive services to address the diverse needs of Alabama's youth through youth development programs targeting urban and rural audiences", to include the program areas of leadership and volunteerism. SPACE volunteers reached more than 15,000 citizens in 2002. In 2003, programs were designed for on-going implementation with State and local agencies. A variety of different approaches were implemented during 2004. In Lawrence County, more than 1,500 young people were involved in 2004.

Youth Soccer League Outreach

- Invite children from the Auburn and Opelika communities to participate in Auburn soccer

The Youth Soccer League Outreach program has allowed over 100 children from the Auburn and Opelika communities to participate in Auburn soccer over the course of the season.
